TUBEROUS BEGONIAS Belgium Grown

GIANT BULBS—2 inches and up

Largest Size Double Camellia-flowered—2 inches and up

Even the beginners find them easy to grow. Next to roses, they are rapidly becoming one of the most popular subjects. Will thrive in shady places where other flowers fail. Follow the simple direction which we supply.

Separate colors of Copper, White, Red, Pink, Yellow, Orange. Large. 5 separate colors, our selection or Your selection: (Doz. \$2.89) (50 \$10.00). Add postage and packing: (Doz. 35c) (100 59c). Also see page 40.

Try These New and Proven Strains for Better Results
NEW VARIETIES COME, HAVE THEIR DAY, AND ARE REPLACED BY STILL
BETTER ONES. WE LIST IN THIS CATALOGUE THE BEST VARIETIES FOR
WESTERN PLANTERS.

VEGETABLES

F1 HYBRID ONIONS ABUNDANCE

An early productive Hybrid, yield about same as Sweet Spanish but keeps better. Bulbs high globe in shape, flesh firm. Scales straw color to light bronze.

OTHER VARIETIES AND PRICES SEE PAGES 14 AND 15

ONION, SWEET SPANISH NO. 28

The earliest strain of Yellow Sweet Spanish. See No. 14, Page 14.

ONION, GREEN BUNCHING WHITE LISBON

The most satisfactory and extensively used table onion. See No. 16, Page 14.

LETTUCE, GREAT LAKES 659G

A late improvement and proven the most dependable Great Lakes variety for Colorado and the western states. See Page 13.

RADISH, CHERRY BELLE

Produces more fine radishes and with shorter tops than other varieties. See Page 19.

SQUASH

BUTTERNUT AND BUTTERCUP (Turbin)

People who have used them acclaim they are the finest of the winter squashes. See Nos. 113D and 21B, Page 20.

CAULIFLOWER, SNOWBALL E6

An outstanding new strain recommended for second early and late crops. See Page 6.

CABBAGE, Early Wonder

A wonderful new cabbage. Produces finest early crop. See page 6.

CABBAGE, GREEN BACK

Excellent second early disease resistant variety. See No. 11A, Page 7.

CORN, Golden Beauty Hybrid

This fine quality very early Hybrid is a heavy yielder. See Page 10.

TOMATO, EARLY F-1 HYBRID, RUTGERS X VALIANT

Proved best for Western areas. See Page 21.

PEPPER, SWEET, SMALL PICKLING

A miniature Pimento. (Pkt. 25c.) See Page 18.

ENDIVE, ITALIAN MARVEL

New slow bolting and cold resistant variety. See Page 12.

FLOWERS

ROCKET SNAPDRAGON, F1 HYBRID ALL AMERICAN WINNER

Far superior to other garden types. Produces long, closely set, large, colorful spikes on strong 30 to 36 inch stems. Base branching, vigorous; come again when cut. All colors mixed. (Pkt. 40c)

NEW SNAPDRAGON PANORAMA F2 HYBRID

See Page 35.

VERBENA—EARLY DWARF: COMPACT

Earliest of all Verbenas. Upright, 8 in. tall, especially adapted for the plant trade. Contains a wide and unusual range of colors. This is the plant growers dream; blooms weeks ahead of other Verbenas. (Pkt. 25c)

NEW SWEET PEAS CUTHBERTSON FLORIBUNDA

See description on page 35.

PETUNIA F1 LA PALOMA

Pure white with yellow throat 3½ to 4 inch beautifully fringed flowers covering vigorous 15 to 18 inch plants with a 20 to 24 inch spread. (Pkt. 150 seeds 50c) (1/128 oz. of 2100 seeds \$4.50)

PETUNIA F1, FIRE DANCE

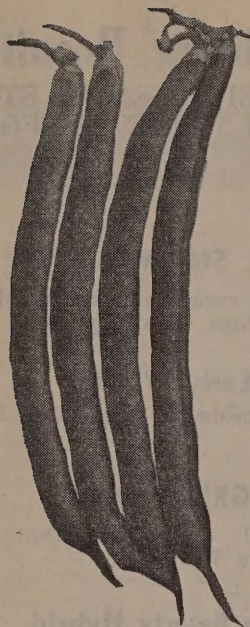

Brilliant salmon-scarlet with yellow throat. Large flowers deeply fringed. (Pkt. 50c) See Page 33.

PETUNIA F1 PEACH BLOSSOM

Bears an abundance of large beautiful bright rose pink flowers on vigorous 12 to 15 inch plants. (Pkt. 150 seeds 50c) (1/128 oz. of 2100 seeds \$4.50)

PETUNIA MIXED F2 CARNIVAL

Contains 13 colors plus many combinations of colors. Flowers average 3½ in. with mostly waved or ruffled petals. Plants compact. Are dwarf 12 to 15 in. tall to 2 feet across, heavy bloomer. (Pkt. 25c) (1/64 oz. 4,400 seed 85c)

CONTENDER

GREEN BUSH VARIETIES

Pkt. will plant 25 feet of row.

1 lb. for 150 hills; 60 lbs. an acre

CULTURE: Beans must not be planted until danger of frost is past and the soil is quite warm. For a continuous supply make sowings every 2 weeks until 10 weeks before the first expected frost.

75 CONTENDER. Very early. Exceptionally heavy yielder and fine quality. Pods stringless and fiberless, 6½ inches long, round, slightly curved. Resistant to most bean diseases. Excellent shipper.

66 TENDERLONG 15. Yields a heavy crop of medium dark green, round, 6x¾ inches, straight stringless, fiberless pods of very good flavor. Plants 18 to 20 in. tall. Erect. Resistant to mosaic.

42 STRINGLESS BLACK VALENTINE. With shippers and large market growers this is the most widely used and popular bean as it stands up in transit better than any other bush variety. Pods strictly stringless, 6¾ inches, dark green, slender, oval, nearly straight.

26 TENDERGREEN IMPROVED. General purpose bean. Pods stringless, straight, round, 6 inches long, dark green, meaty and free from fiber. Plants vigorous growing and very productive. Good canning and freezing variety.

64 FULL MEASURE. Produces an abundance of meaty pods 6 to 6½ inches long; stringless and fiberless; tender and meaty even after the bean is well matured. Recommended for home gardens, canning, and freezing.

89 TOP CROP. An early productive, hardy variety. Resistant to various diseases and bean mosaic. Yields an abundance of 6 inch round, stringless, medium green pods.

BEANS

50 LANDRETH STRINGLESS. A greatly improved Burpee's Stringless. Pods are longer, slightly more round, flesh more tender, less fibrous, and no strings.

WAX BUSH VARIETIES

THE FOUR BEST

43 PURE GOLD. A very prolific mosaic resistant wax bean of highest quality. The very golden yellow pods are 5½ to 6 inches long, straight, slim, round, and stringless.

52 BRITTLE WAX or ROUND POD KIDNEY. An outstanding sort for home use and for the market trade. Plants large, erect, medium green, vigorous and productive. Pods handsome in appearance, medium yellow, round, slightly curved, extremely brittle; fleshy, absolutely stringless and fiberless.

62 PENCIL POD BLACK WAX. A desirable home and market garden variety. Plants strong and productive. Pods round, clear rich yellow, slightly curved, brittle and absolutely stringless.

58 TOP NOTCH GOLDEN WAX. A much improved type of Golden Wax. Pods are stringless, smooth, symmetrical oval, light golden color, very tender, 5 to 6 inches long, almost an inch longer than improved Golden Wax. Very productive.

SHELL BEANS

78 RUBY HORTICULTURAL. (Speckled Cranberry.) Excellent as green shelled bean. Also used as snap beans and dried beans. Pods wide and 5 inches long. Beans green splashed with carmine.

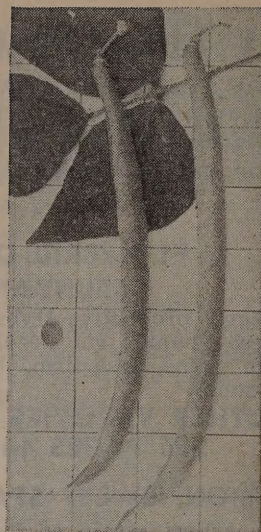

111E LONG WINDSOR or FAVA. Quite distinct from other beans, the upright plants bear 7-inch pods, containing 5 or 6 big flat oblong beans that are used in the green shell or dry stage. Cooked fresh or as a winter shell bean they have an unusual flavor. They are hardy and should be planted very early in the spring about 8 in. apart in 2½ to 3 ft. rows. Seed Seal-Gro-Treated.

BEAN PRICES

See next Page

FORDHOOK 242 BUSH LIMA

PURE GOLD

All Our Bean Seed Is

Increases Stand and Vigor

Prices Next Page

LIMA OR BUTTER

1 pound for 100 hills

CULTURE: Planting and care of Limas same as other Bush Beans, except 4 inches apart in row and for best yield a warm, sandy loam is desirable.

45 EARLY THOROGREEN. Green seeded strain of Henderson's Bush Lima, with green cotyledons, seed retaining its green color even when mature. Excellent flavor.

112E BABY LIMA or HENDERSON BUSH. Popular with home gardeners as a green shell bean, also as a dry bean.

76 FORDHOOK 242 BUSH. A top ranking lima bean similar to Regular Fordhook except 242 is earlier and has outstanding ability to set under adverse conditions. Pods broad and thick containing mostly four beans of light green and best flavor. Plants dwarf and spreading. Recommended for freezing.

79 BURPEE IMPROVED BUSH. Plants large and productive bearing pods containing three to four large flat beans.

POLE BEANS

65 KENTUCKY WONDER GREEN. The most popular green or snap pole bean. The tall, vigorous vines are enormously productive over a long season. Pods remarkably long, almost round and straight, thick, meaty, stringless, fine tasty flavor which makes them also so highly desirable for use as a shell bean.

119E SCARLET RUNNER. Outstanding bean for its ornamental purposes but may also be used for green shell beans. Has large beautiful scarlet blossoms.
Pkt. 10c; ½ lb. 60c; 1 lb. 90c; 2 lbs., \$1.60.

All Bean Seed **SEAL-GRO-TRETTED** for Better Germination and Crops.
KING SIZE PKT. 10c; 1/4 lb. 25c, postpaid.

WRITE FOR SPECIAL PRICES ON LARGER AMOUNTS

BEETS

We Catalog Only the Leading Varieties
 1 ounce will sow 50 feet of row; 5 to 6 pounds
 will plant an acre

CULTURE: Beets will grow in any fertile soil. Seed may be sown in the early spring as soon as ground can be worked; later sowings for continuous supply, every two or three weeks until the middle of July. Frequent light waterings are better than heavy soaking.

- 29 EARLY WONDER.** An excellent beet for early bunching. Roots dark red; flesh somewhat darker; medium tops; globe-shaped when young, slightly flatten later. Ours is a very fine superior strain.
- 19 CROSBY'S EGYPTIAN.** Roots almost globular in shape, very smooth of deep vermillion, interior deep red.
- 12E SHIPPERS CROSBY OR TEXAS CROSBY.** Roots attractive light brick red, globe shaped, flesh carmine red. Tops large, excellent for bunching.
- 30 DETROIT DARK RED.** A standard variety for home, market garden, shipping and canning. Tops uniform, small, slender, erect. Roots globe-shaped; symmetrical, with small collar and small tap root. Flesh very dark blood red, remains tender and of the highest quality until roots are full grown.
- 92 PERFECTED DETROIT.** Tops medium to tall, leaves green tinged with red. Roots globular, medium smooth, deep red; flesh dark red and practically free from zoning.

PERFECTED DETROIT

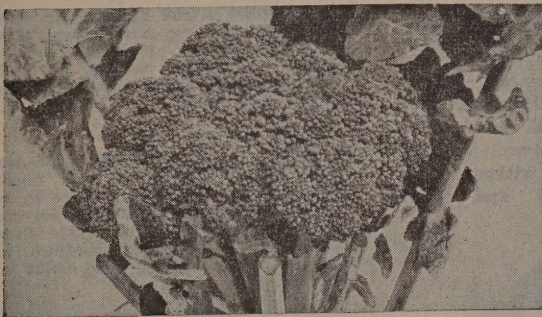

EARLY WONDER

BROCCOLI

CULTURE: Same as cabbage. Either start seed indoors for early crop or for later crop seed of the early varieties can be sown outdoors in May in field and thinned to 2 feet apart.

1C EARLY GREEN MOUNTAIN. A new extra early strain. Produces large, compact, dark green center heads on long stems. Buds are tight, uniform, and attractive. Large lateral heads are produced over a long season. Best variety for Rocky Mountain area.

2D WALTHAM No. 29. A new heavy yielding midseason and fall type. Plants stocky and vigorous, withstand increasing fall cold. Produces large firm center heads, followed by strong good size side tight shoots.

EARLY GREEN MOUNTAIN

CAULIFLOWER

1 ounce for 2500 plants; 5 ounces for acre

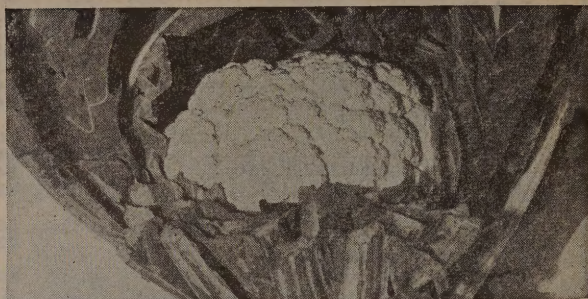

CULTURE: For early crops with altitude and climate about the same as Denver, start seed in hot beds in late February and transplant to field about May 1st. For midseason and late crops, sow about April 10 in cold frames or out of doors in open beds. For late crop many growers have found direct field sowing very satisfactory even in Colorado's 7 to 8 thousand feet altitudes.

1B MOUNT BLANC. A good extra early cauliflower. Even with adverse weather, will yield an abundance of fine, large, snow white heads. Plants short, stalky with heavy, broad, closely set foliage. Crop heads simultaneously; 3 cuttings usually clear the field.

SNOWBALL E6

4D SNOWDRIFT NO. 16 GOLD SEAL STRAIN. Medium late variety. Plants are vigorous, rather short setm; leaves broad, long and erect, protecting the deep, heavy, well rounded white heads. We prefer Snowball E-6.

SUPER MOUNT BLANC

1E SUPER MOUNT BLANC. Produces heavier, deeper, more solid, heavy based heads with pure white curds than any other early variety. Only a couple days later than the earliest varieties. Plants erect with large overlapping foliage.

B SNOWBALL E-6. A very wonderful strain of Snowball Cauliflower in that it produces a fine, heavy, quite concentrated crop under variable weather and soil conditions. Can be grown as a medium early or will produce an excellent late crop. Withstands heavy frost as plants are vigorous with ample erect foliage well protecting the large deep firm white heads.

CABBAGE

ALSO SEE NEXT PAGE

1 ounce for 2500 plants; 6 ounces for an acre
We List Only the Best Varieties

We test and try out on our vegetable farms, the new introduction of cabbages. The varieties we offer are those found to be the best adapted to the soil and climatic conditions of the West.

CULTURE: For very early crops sow seeds of the early varieties in hotbeds the first part of February. For second early and later crops sow in March and April, in hotbeds or cold frames. The plants should be set in rows 2 1/2 to 3 feet apart and from 10 to 12 inches apart in rows. Frequent cultivation is advised.

FIELD SOWING—VERY SUCCESSFUL
Most growers with surprisingly good results (even in altitudes up to 7500 feet) have gone entirely to field sowing. Some drill the seed in single rows; others to increase tonnage drill in double rows. Thinning in both methods usually is 6 to 8 inches apart in the rows.

19A BONANZA. Crop can be harvested early for small to medium heads if market justifies or can be held in the field for later harvesting and growth. Heads round, extremely hard, attractive with short core and good foliage.

19C OAKVIEW BALLHEAD. A selection from Ferry's Hollander for a greater tonnage. Produces heads about 10 days later which are larger and slightly flatter than Ferry's Hollander.

4A NEW EARLY WONDER. A new Superior earliest strain of Golden Acre. Has proven to be the ideal variety of early cabbage for market gardeners because of its uniformity, good yield of fine, beautiful, round heads with good wrapper leaves. Will remain long in the field without bursting. Plants compact and short stemmed.

NEW EARLY WONDER

11C GOLDEN ACRE ELITE. An extra fine good yielding, short stem strain of Golden Acre. Proven to be an ideal variety for market gardeners and shipping. Heads round, firm, uniform, good color.

7B EARLY ROUND DUTCH. The leading mid-early shipping and market variety. Follows Golden Acre in maturing about one week. Plants compact (allowing close setting). Stems short, heads uniform, medium size nearly round. Solid, good color and quality.

6A COPENHAGEN MARKET. A splendid second early, round head short stem sort, head averaging 4 to 8 pounds in weight. The compact growth of the plant, the solidity of the head, make it very popular with the market gardeners.

9B DANISH BALLHEAD SHORT STEM. Holland grown. Plants 12 to 16 inches tall, blue-green, medium large. Heads deep, round, very hard. Excellent home and market garden variety and makes fine quality kraut.

CABBAGE Continued

8C FERRY'S HOLLANDER BLUISH GREEN STRAIN. Heads very attractive, about 4 to 5 lbs., deep oval, very uniform outer leaves well rounded of bluish green color. Plants short stemmed. Yields heavy tonnage, as allows closer planting.

15E HOLLANDER N. K. STRAIN. One of the best late cabbages. Plants short stem, medium bluish green. Heads deep rounded shape, about 6 inches in diameter. Very desirable for shipping on account of size and uniformity.

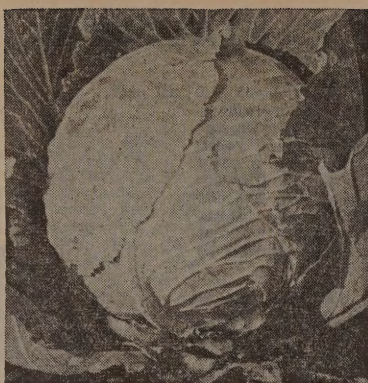

9E EVERGREEN HOLLAND SPECIAL STRAIN. We highly recommend this refined hard heading strain of Hollander. The short stemmed compact plants permit close planting and produce an early heavy crop of firm deep round blue green, small to medium size heads. Excellent for shipping, has good wrapper leaves.

DISEASE RESISTANT CABBAGE

Ground often becomes infested with a thread-like organism of fungi which causes a disease known as CABBAGE YELLOWS. Can be controlled in cabbage sick soils only by use of yellows resistant strains of seed.

The strains known as Wisconsin Golden Acre, Wisconsin Copenhagen, Wisconsin Globe, and Wisconsin Ballhead are the development of the University of Wisconsin and are all first generation seed.

12C WISCONSIN GOLDEN ACRE. The earliest of resistant round head cabbages. Selected from Elite Golden Acre. Heads globular, firm, clear white interior of fine quality. Plants short stemmed, very uniform, marketable heads usually 3 to 4 lbs. Outer leaves smooth, dark green. 85 per cent disease resistant.

WISCONSIN GLOBE

11A GREENBACK Y. R. A new attractive, second early, yellow resistant variety developed from Round Dutch but greener in color. Small to medium round head, short stem. Good shipping variety.

1A WISCONSIN COPENHAGEN. An early new development of the Resistant Copenhagen Strain. Heads uniformly round and very compact; matures evenly; can be planted close together for an abundance of medium size heads. For market gardening, distant shipping and kraut.

2E WISCONSIN GLOBE. The most widely used and leading shipping midseason variety in the Western area. A truly fine variety, producing excellent globe-shaped, medium sized, very compact heads with small core. Plants are sturdy with short stem. Heads are uniform and long retain their fine green color. Produces a heavy crop even when closely planted.

18A WISCONSIN BALLHEAD. The best resistant of all Holland or Ballhead varieties. Heads nearly spherical, solid and compact. Foliage blue-green. Plant is short stem. Will produce a heavy tonnage of uniform, medium size heads even if planted close. Matures so that 90% of the heads can be harvested at first cutting. Also sold as Resistant Evergreen Holland.

RED CABBAGE

8E EARLY HOLLAND ROUND RED ELITE. The best strain for the profitable cabbage market. Heads small to medium round and hard, of beautiful deep red color. Plants compact and highly productive.

18E RED ALL SEASON (Yellows Resistant). A fine new introduction. Head round, very uniform, solid medium size when matured. Purple red variety. Few days later than Red Acre. Can be held in field for later harvesting. Crop failure.

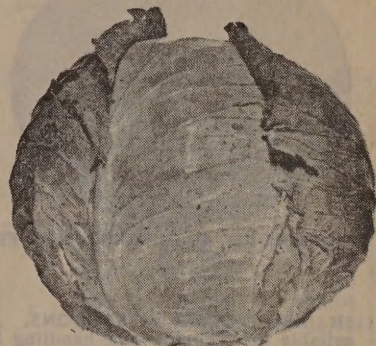

SAVOY CABBAGE

9A GREEN BALL SAVOY. The best of the savoy cabbages. Very attractive market gardener variety; very dark green; heavily savoyed; medium size; round heads.

CHINESE CABBAGE

CULTURE: Same as turnip or lettuce. For spring crop plant as soon as danger of frost is over. For fall crop, plant in July. Sow seed in rows 24 inches apart and after established thin out to 12 inches apart in the rows. Irrigate and cultivate well. Do not allow ground to dry out.

26D MICHIHLI. Improved Chihli but far superior. Is early and sure heading. Will remain in prime condition for a long time. Heads attractive, dark green, 18 in. tall, 3½ to 4½ in. thick tapering at top. Blanching pure white inside. Crisp, tender with sweet, spicy flavor.

CANTALOUPE

1 oz. will plant 60 hills; 2 to 3 lbs. to an acre

CULTURE: A rich sandy loam and good seed are necessary for success in raising the best melons. Muskmelons or Cantaloupes should not be planted on the same ground two years in succession. Seed should not be planted until the ground has become dry and warm. Ground should be deeply plowed. Plant in hills 5 to 6 feet apart each way, dropping 8 seeds to the hill. Cover with 2 inches of soil. When the plants have five or six leaves thin to two or three of the strongest plants per hill. Cultivate often but not too deep. Should be watered thoroughly about every two weeks.

11D HALE'S BEST IMPROVED No. 36. A beautiful melon developed from regular Hale's Best No. 36 for uniformity in shape and complete netting. Fruits oval, with exceptionally thick, deep, sweet, aromatic flesh. An outstanding, very fine quality melon for shipping and market and home garden. Weight, 3 lbs., packing mostly 36 to a crate.

15D HALE'S BEST 936. A hardy, larger fruited strain of Hale's Best. Fruits, oval, mostly 4 to 4½ lbs., heavily netted and uniform. The salmon flesh is sweet and of excellent quality.

29C EARLY SIERRA GOLD A selection from Imperial 45, mildew resistant. Several days earlier. Very attractive having all the fine qualities of 45. Slightly larger and good shipper.

17E GOLD CUP 55. An excellent shipping melon. Fruits are uniform with hard rind and very thick salmon orange, excellently flavored flesh. Small seed cavity. Yield is high and concentrated. Resistant to Powdery Mildew.

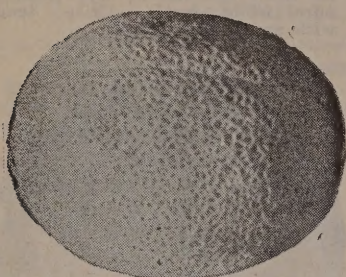

14C RESISTANT NO. 45 IMPROVED SHIPPER. Most widely planted cantaloupe. Fruits uniform, oval, medium to large netted with distinct ribbing. Meat salmon to light orange, thick, firm, fine texture and sweet. Can be picked ripe and still stand shipping. Resistant to most forms of powdery mildew.

HALE'S BEST NO. 36

14E HEARTS OF GOLD. Grown extensively for local markets. Fruits nearly round, 3 lbs.; distinctly ribbed, deep green, covered with fine gray netting. Flesh very thick, deep salmon; tender, juicy sweet and aromatic.

12D ROCKY FORD or NETTED GEM. Green flesh. Fruits are small to medium, nearly round, weight 2½ to 3 lbs., with no ribs, but heavily covered with hard grey netting; flesh thick, green in color, with gold tinge at the center; juicy, delicious and of fine quality and texture.

RESISTANT NO. 45 IMPROVED SHIPPER

MUSKMELONS

6C GOLDEN DELIGHT, All American. New early outstanding melon. Very popular with local market trade and home gardens. Fruit large oval, gray green skin with coarse netting. Has almost indistinct ribs, flesh very thick, fine grained, salmon colored, sweet and very juicy. Will produce high quality melons under adverse weather conditions. Best flavored melon in its class.

10B HONEY ROCK, NEW SPECIAL STRAIN. Bears early medium size melons. About 3 lbs. each having firm, heavily netted, slightly ribbed, gray green skin. Flesh bright orange, thick, amazingly sweet with fine texture. Vines vigorous and productive. Excellent for home and market.

19B BENDER'S SURPRISE TIP-TOP. Fruit large; roundish to broad-oval, commonly 7½ inches long; skin slate-green ripening to yellowish; furrowed, but sparsely netted. Flesh thick; salmon-yellow; very juicy, sweet, and of good rich flavor.

115E NEW YORKER or SCHOONS. A high quality melon suitable for shipping and handling because it has a hard, firm shell which is deeply ribbed. Skin gray-yellow. Fruits average about 5 to 7 lbs. Flesh salmon color, very sweet and spicy.

118C GREELEY WONDER (True). Fruits weigh 5½ to 7½ lbs.; nearly round with prominent ribs and sparse coarse netting. Flesh thick, sweet and very juicy. Specially desirable for roadside trade and home gardens. We prefer Golden Delight or Honey Rock.

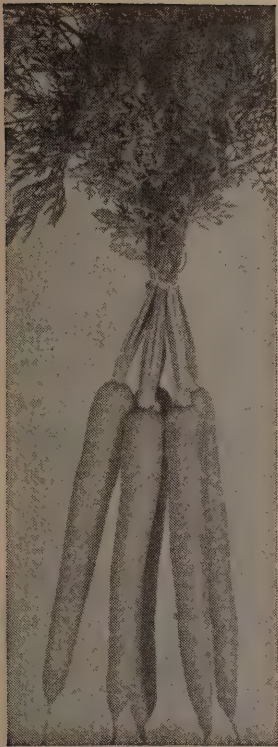

13D HONEY DEW GREEN FLESH. Fruits large, globular with smooth, hard ivory colored rind. When ripe flesh thick, very sweet, juicy, of pale emerald green.

MUSKMELON-CANTALOUPE MIXTURE. This mixture is made of all the varieties we carry; the old-fashioned muskmelons; new varieties of cantaloupes.

GOLD SPIKE

CARROTS

One oz. will sow 100 ft.; 3 lbs. for an acre.

CULTURE: A mellow, deeply worked soil gives the finest carrots. For early crop, sow as soon as soil can be worked in the spring and continuous plantings may be made as late as July 5th. Sow by scattering the seed in 3 inch broad strip rows not less than 15 inches apart. Cover seed with $\frac{1}{2}$ inch soil. Carrots do not require a great deal of water but should be kept moist until young plants are 2 inches above the ground. Frequent cultivation is very beneficial.

93 IMPERATOR LONG STRAIN. The most widely grown topping, pre-packaging and bunching carrot. Roots long 9 inches, well colored, smooth and slender, slightly tapered to a point with good strong tops. Our seed is the new improved type.

5A GOLD SPIKE. A good shipping and pre-packaging variety. Roots average 8 to 10 in. long with a deeper, attractive color. Flesh solid deep orange with small core.

3A FRENCH SHORT DELICACY. New and different. Should be in every home garden. Roots short, small and extra sweet, finest texture, mostly cooked whole. A delicacy from Paris. Pkt. 15c.

IMPERATOR LONG STRAIN
All-American Selection—Award of Merit
RECOMMENDED FOR CELLO PACK

9 ROYAL CHANTENAY. A longer, slimmer strain of Chantenay with shorter top, but with longer, deep orange, 7 in. roots.

11 DANVERS HALF LONG (Red Core). An attractive long strain of Danvers. Roots 7 in. tapered to a blunt end, bright orange with core of similar color, tender and of good quality.

GOLD PAK. An excellent Variety for cello-pack, market and home gardening. Roots long, very uniform, smooth. Color deep orange with interior bright reddish-orange. Small indistinct core. Remains in good condition in field.

8A TENDERSWEET. Has a richness and quality of flavor not found in other carrots. Even when they have grown large, remain tender and sweet. Roots medium long, tapered, bright orange tinged with red. Flesh deep orange very small core.

18 NANTES LONG STRAIN. One of the most popular carrots for the home garden; 6 to 7 in. long; perfectly cylindrical, slightly tapered and stump rooted. Flesh deep orange. small core. Ideal for quick freezing.

CORN PRICES—TURN PAGE

SWEET CORN

ALSO SEE NEXT PAGE

1 lb. plants 150 hills; 10 lbs. plant an acre

CULTURE: A rich, warm sandy soil is the best, but excellent sweet corn can be raised on any good, ordinary soil if it is deeply and thoroughly worked before planting. For first crop plant as early as can be done without risking great loss from frosts. If planted in rows, make the rows about 3 feet apart and place the seed 14 to 16 inches apart in the rows, covering 1 inch deep with fine soil pressed firmly down. If planted in hills, make the hills 3 to 3 $\frac{1}{2}$ feet apart and plant 6 kernels to the hill. When 6 inches high thin so as to leave 3 or 4 plants in the hill. Give frequent and thorough but shallow cultivation until the tassels appear.

HYBRID VARIETIES

WESTERN GROWN STRAINS are preferred because of more vigor, better quality of more and larger ears.

28 SPANCROSS IMPROVED. Extra early, somewhat resistant to cold. Ears 6 to 7 inches with about 12 rows of yellow kernels, uniform in maturity, good quality, stalks 4 feet, stocky.

81 CARMELCROSS. An early hybrid that yields large good quality ears.

FOR PRICES TURN PAGE

HYBRID SWEET CORN (Continued)

28 SENECA SUNBEAM. A new early 64 days fast growing hybrid. Has consistently out yielded other early hybrids throughout the Northern states. Ears are large, 7½ inches; 12 to 14 rows of compact, excellent quality kernels.

EARLY GOLDEN BEAUTY

38 EARLY GOLDEN BEAUTY. An All-America Winner. A new early large hybrid. Stalks 5 feet, ears 7-8 inches long, slightly tapered with 12-14 rows of medium width excellent flavored yellow kernels. Our trials have proved this a very outstanding hybrid and the best early variety.

83 IOCHIEF. In many sections, Iochief is now the top favorite. Produces 9 in. slightly tapered ears packed with 16 or more rows of extra deep, glossy, golden kernels. Flavor and sweetness are excellent surpassing most other varieties. Stalk tall, strong, and very leafy.

67 EARLY GOLD RUSH. One of the best first early yellow Hybrids. Ears as large as Golden Cross and 10 days earlier. Stalks 6 ft., good foliage. Ears 7 in., well filled, 12 to 14 rows. Kernels tender, sweet.

51 MARCROSS C13-6. Ears 8 inch early variety with 12 to 14 rows of tender, sweet, deep kernels; stalks 5½ to 6 feet. For main early crop we recommend Golden Beauty.

GOLDEN CROSS BANTAM ELITE

STANDARD NON-HYBRID YELLOW VARIETIES

25 EXTRA EARLY GOLDEN BANTAM. A new strain of Golden Bantam producing marketable ears about a week earlier than regular Golden Bantam. Ears 7 inches. Cob small filled with 8 rows of rather broad, good quality, tender, golden kernels. Stalks 6½ feet.

17 IMPROVED GOLDEN BANTAM. A strain of Golden Bantam that is extremely hardy withstanding unfavorable weather. Produces 1 and 2 uniform large thick ears of 10 to 14 rows of yellow, tender, deep kernels on 7 ft. stalks.

17T EARLY GOLDEN SWEET. A fine extra early sweet corn, 5 to 10 days earlier than Golden Early Market. Especially recommended for sections with short growing season. Ears good size; kernels deep yellow, tender, and sweet.

STANDARD WHITE VARIETIES

74 STOWELL'S EVERGREEN. 97 days. The best late white variety of sweet corn. Highly desirable for home and market garden. Stalks sturdy, leafy and erect; ears 2½ inches thick, uniform, 16 to 20-rowed. Kernels clear white, deep.

66 COUNTRY GENTLEMAN. Used widely by canners. Also desirable for home and market gardens for late crop. Stalks often with two ears. Kernels very deep, slender, sweet, with tender hull, and set irregularly without row formation.

20 GOLDEN CROSS BANTAM ELITE. An extremely uniform strain; outstanding main crop hybrid corn among market gardeners, home gardeners, freezers, and shippers as it is very productive and excels most other varieties in eating qualities. Stalks 6 feet, heavy foliage bearing two fine ears 8 inches long of 10 to 14 rows of yellow, plump, excellent flavored kernels.

57 TENDERGOLD (Top Cross). Stalk sturdy with good foliage; highly resistant to disease. Ear nearly cylindrical, 12-14 rowed, kernels medium in width and depth; golden yellow.

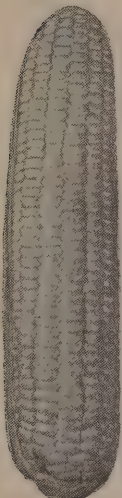

EARLY GOLD RUSH

EXTRA EARLY GOLDEN BANTAM

IMPROVED GOLDEN BANTAM

POPCORN

HYBRID SOUTH AMERICA. This new four way or double cross hybrid is a large, vigorous grower with tremendous root system. Produces 6 to 8 in. ears with 14 to 16 rows of orange-yellow kernels with popping expansion of 28 to 30 volumes. Stocks sturdy 6 to 6½ feet. Prices post-paid. (1 lb. 80c) (5 lbs. \$3.50).

All Corn SEAL-GRO-TREETED for Better Germination, Better Crops

CELERY

1 oz. for 5000 plants; ¼ lb. for an acre

CULTURE: For earliest crop, to be ready for market or home use about July 15, seed should be sown indoors or in hotbeds around March 5, and for later crops seed may be sown any time up to the last of April. Late seeding can be started in cold frames or even in beds out of doors. For early crop transplant to open ground or field about May 1 and for later crop transplanting can be successfully done as late as July 20. Usually grown in rows 30 to 36 inches apart and plants set 8 inches apart in rows or can be grown in double rows 8 to 3½ feet apart. Regular dusting or spraying is advisable.

3E HARTNER'S COLORADO GIANT PASCAL. This is the old, well known, delicious Colorado pascal and surpasses all other celery in table quality. Plants are of medium height; have thick, large, well-rounded firm stalks of finest nutty flavor and crispness so highly esteemed for trenching and use during winter months.

21D GIANT PASCAL. Winter trenching variety. Stalk 7 in. long; outer stalks dark green; inner stalks smooth, rounded, thick, brittle, large heart and when papered or trenched, bleaches to a creamy white of exceptionally fine quality.

116A SUMMER PASCAL or SUMMER QUEEN. Ours is the Waltham strain which has proven best. Plants 25 to 26 inches, erect, compact, full hearted; stems thick, rounded, smooth, waxy, brittle and of excellent quality. Blanches more readily than other large green varieties. No other strain of celery has met such great acceptance. A very good variety for keeping in storage or trenches.

115A GOLDEN SELF-BLANCHING (TALL STRAIN). Best self-blanching celery for Western culture. Plants tall, 20 to 30 inches. Stalks medium thick, blanches very readily to a golden yellow color.

116C TALL UTAH 52-70H. Tallest of Utah varieties. Plants erect and compact. Stalks are numerous, long, straight, thick, rounded, medium green with a waxy sheen, crisp, fleshy and of good quality. In comparison to Tall Utah No. 15 and 10B, plants are 1 to 2 inches taller; leaves darker green; stems 1 to 2 inches longer, thicker, smoother with a more waxy sheen and show less disease symptoms.

120B TALL UTAH 52-70H or COM-PACT. An improved new strain of 52-70 which is slightly taller. Overall height 29 to 31 inches with 2 inch longer ribs and higher rib count; of very good keeping quality.

118A UTAH NO. 15. Plants are large with full heart, erect; height 26 inches. Stems 8 to 10 inches, broad, somewhat rounded and crisp leaves. Dark green.

CHICORY

CULTURE. Sow one inch deep in open ground in May in rows 18 inches apart. Thin plants to 4 inches apart, give frequent cultivation. In late fall roots should be lifted, the leaves and side-roots trimmed off, and the main roots placed upright in a trench and covered with leaves or dirt.

11B WITLOOF (French Endive). Market Gardener's Strain (Pkt. 15c) (½ oz. 30c) (¼ lb. \$1.30) (lb. \$3.95).

18T LARGE ROOTED or COFFEE. The roots are popular as a coffee substitute. The young leaves may be used for salad. Culture the same as carrots. (Pkt. 10c) (oz. 30c) (¼ lb. 90c) (lbs. \$3.25).

CUCUMBERS

PICKLES

NEXT PAGE FOR PRICES

One oz. to 60 hills; 2 lbs. per acre in hills, 4 lbs. in drills. WE CATALOG ONLY THE LEADING AND BEST VARIETIES

MARKETER LONG STRAIN

CULTURE: Cucumbers prefer a heavy loam. After danger of frost has passed, plant the seed ¼ inch deep in rows 4 feet apart. Drill about 8 pounds seed to the acre and when plants have 4 or 5 leaves, thin to 1 plant every 18 inches. Can also be planted in hills 8 to 4 feet apart. Cultivate often and irrigate about once a week. Keep the cucumbers picked as fast as they reach the size desired.

116F STRAIGHT "8" or STAY-GREEN. Cylindrical, almost from end to end. Average about 8 inches long. Produces very few ill-shaped fruits. We prefer Marketer.

1D MARKETER LONG STRAIN. The best in fine cucumbers. Very smooth, exceptionally deep green color over the entire fruit, 7 to 8 inches long, trim in appearance. The crisp, white flesh is unusually firm with small seed cavity. Marketer produces heavily from early to late. Our strain is uniform and true type.

4E THE COLORADO. (Or A. and C.) A beautiful straight, long slender, dark green cucumber, heavy yielder.

FOR ALL CUCUMBER and PICKLE PRICES SEE NEXT PAGE

3C IMPROVED LONG GREEN. Excellent for home garden. Where a two-purpose variety is desirable it is suitable for small pickles and dill size as well as slicing cucumbers. Hardy and prolific. Fruits deep green, straight, slightly tapered; flesh very white and crisp.

CUCUMBERS HYBRID F1

117A EARLY MARKETER F1 HYBRID. 55 days. A new hybrid bred for extra high early yield of fine quality. Resistant to both Downy Mildew and Mosaic. Fruit uniform, 9 inches long, 2½ inch diameter. Very dark green.

113A TOTAL MARKETER F1 HYBRID. 65 days. Produces high yield of excellent 8 to 9 inch, dark fruit, as the vines stay alive, vigorous and productive long after most varieties have wilted because Total Marketer is so highly resistant to Mosaic and Downy Mildew.

PICKLING CUCUMBERS

3B NATIONAL PICKLING. A late development by the National Pickle Association and is claimed to produce more pickles of uniform shape and size than any other variety.

5B CHICAGO PICKLING. Grown extensively for the large pickling establishments throughout the country. Fruit is medium, pointed at each end, deep green color.

118D GHERKIN WEST INDIA. Bears small cylindrical green fruits 1½ inches in diameter covered with small elastic spines. Excellent as sweet pickles. Seed very small.

118B LEMON CUCUMBER. For preserves and pickling.

NATIONAL PICKLING

ENDIVE

1 oz. to 100 ft. of drill;

4 lbs. will plant an acre

CULTURE: For early crop, sow soon as ground can be worked. For main crop, sow June 15th to July 10th. Sow seed in rows 12 to 24 inches apart and when well established, thin to 1 plant per 10 inches.

7C ITALIAN MARVEL. New, large, deep heart, green curled type which is slow bolting to seed and more resistant to frost than other varieties.

2C GREEN CURLED RUFFEC. Best of the green curled varieties because this is a white, not a pink ribbed type. The dark leaves are very finely cut with crumpled edges. Inner leaves readily blanch to creamy white.

5C DEEP HEARTED FRINGED. Is between Full Heart Batavian and Green Curled, but more upright in growth than either. Has large, dark green leaves with well crumpled and curled edges; heart compact which readily blanches itself to clear, creamy yellow.

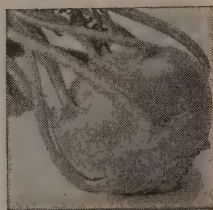

7E FULL HEART BATAVIAN (Escarole). The finest of broad leaf endive. Plants medium large with compact hearts that are full, well bleached and tender.

KOHLRABI

1 oz. will sow 200 ft.

CULTURE: Same as Cauliflower. This vegetable is very good for table use. Easily prepared.

22A EXTRA EARLY WHITE VIENNA, SHORT-LEAVED. New early strain, short-leaved with slender stems; bulbs globular light green. When 2 to 3 inches in diameter best eating stage; flesh clear white, tender and crisp.

EXTRA EARLY WHITE VIENNA

(Pkt. 10c) (¼ oz. 20c) (oz. 35c) (¼ lb. 90c) (1 lb. \$2.90).

MUSTARD

1 oz. to 100 ft.; 1 lb. drilled to acre, 2 lbs. broadcast

SOUTHERN GIANT CURLED LONG STANDING

11E SOUTHERN GIANT CURLED LONG STANDING. The large light green leaves are beautifully curled and fringed at the edges and are produced in great abundance. This strain is slower to go to seed.

11B GREEN WAVE. New, All-America. Plants extra long standing. Very attractive darkest green. Very much curled. Grows erect. Even after plant matures will stand and stand without bolting to seed. Seed crop failed.

15A TENDERGREEN or SPINACH MUSTARD. Quick growing, fine, tender mustard, with spinach flavor. Leaves oblong, broad, fairly smooth.

FORT MEYERS MARKET

EGGPLANT

CULTURE: A rich loamy warm soil produces the best plants and yields the highest number of fruits. Seed should be started indoors or in hotbeds sometime during February. After danger of frost has passed (or if earlier planting is desired), plants should be protected with hotcaps. Set plants 2 ft. apart in the rows which are 3 ft. apart.

119B FORT MEYERS MARKET. The most

handsome of all eggplants. A productive high bush variety. Fruits large, smooth, egg shaped, 9 to 10 in. long, 5½ to 6½ in. in diameter at base, of deep purplish black. Plants 30 in., vigorous and upright holding the fruit well off the ground.

2B BLACK BEAUTY. Plants 24 to 28 inches tall. Usually bears 4 to 6 large, broad to oval, rich dark purple firm fruit.

117B FLORIDA HIGH BUSH. Plants are large and upstanding in growth, bear fruit off the ground. Fruits are elongated, cylindrical and purple in color. It is a heavy yielder.

HEADING VARIETIES

1 oz. for 2000 plants or 100 ft. of drill; 1 to 2 lbs. per acre

CULTURE: For large acreage, plant in double rows on beds 16 inches wide and with 24 inches between the beds for the irrigation ditch, or can be planted in single rows 20 inches apart. After two weeks of growth, plants are usually large enough to be thinned to at least 14 inches apart. Cultivate thoroughly but not deep. Ground should not become dry but care must be used in irrigating.

For home gardens, sow in row 2 ft. apart and after plants are about 2 weeks old, thin out leaving one plant every 12 in.

GREAT LAKES NO. 659G

HEADING VARIETIES

4 PREMIER GREAT LAKES — EARLY GREAT LAKES. Especially suited for Colorado and the Rocky Mountain Area. Outer leaves not as crinkled, with smoother base, and smaller ribs than other Great Lakes. Yields a very high per cent of early, well rounded, large, uniform heads. Slow to bolt, rather resistant to tipburn.

91 GREAT LAKES NO. 660. An improvement over Great Lakes 66 in base color and uniformity of head, and head protection, has large upright frilled dark green wrapper leaves. Plants vigorous.

8 GREAT LAKES NO. 118A. Plants are large, slow to bolt, resistant to tip burn. Heads large, uniform, with good dark green wrapper leaf protection. Concentrated heading assures heavy first cutting. An improvement on old 118 in color and holding qualities.

5 GREAT LAKES SHIPPERS STRAIN. One of the most widely planted strains of Great Lakes. Heads large round, very firm, completely covered with dark green fringed leaves. Resistant to cold.

17B GREAT LAKES PRIMIVERDE. Produces a uniform, early crop of large round, dark green, compact heads, protected by good wrapper leaves. Good shipping variety.

10 GREAT LAKES NO. 659G is an improvement in uniformity, base color and base formation over regular 659. Heads are large, round, very firm and covered with dark green fringed leaves, a protection against sunburn and frost. Particularly resistant to tipburn. A good warm weather variety. Most widely planted strain of Great Lakes.

2-A NEW YORK P.W.55. Has proven the best of the New York strains. Especially adapted for Denver and eastern Colorado. Produces high percentage of beautiful, hard, medium to large firm heads.

LEAF AND LOOSE HEAD VARIETIES

CULTURE: Sow in 15-inch rows and thin the leaf varieties to 4 inches apart as soon as a few leaves are formed. For an early crop plants can be sown in hotbeds and transplanted to the open field.

117C RUBY RED. New All-American Winner. Rather large, finely savoyed, crisp, ruby red leaf with well bleached inner leaves. Ideal for summer salads.

12A SALAD BOWL. All American Gold Medal. Produces a bushy, rosette plant 6 to 8 inches in diameter; leaves are rather short, closely set, deeply cut of very tender texture; grows fast, slow to bolt, even in hot weather retains its table quality.

4B PRIZE HEAD. A large, loose-headed variety, leaves large, very curly, bright green tinted on edges with reddish brown; very crisp, sweet and tender. Desirable for home garden.

13E GRAND RAPIDS TIPBURN RESISTANT. Most extensively used leaf lettuce. This strain is heavier in structure, plants upright. Leaves light green, large, broad, much waved and frilled. Slower to seed than regular strain.

3D BLACK SEEDED SIMPSON. Withstands summer heat better than other varieties. Plants large, attractive, compact, with broad, light green leaves crumpled and frilled on the edges; crisp and tender.

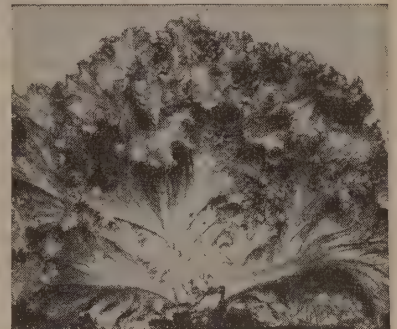

114B OAK LEAF. Tender and delicious. Fine for all seasons. The delicate, tender leaves are oak-shaped, grow close together in a compact attractive plant. The leaves may be cut repeatedly. Easy to grow.

112C BIBB. The most palatable lettuce. A very dark green butter-head variety; rather small loosely headed; leaves smooth with thick main rib; excellent quality. Does best if planted early.

ROMAINE

114C TRIANON COS. The earliest and tallest romaine; leaves broad and long, medium green, slightly crumpled.

14D PARRIS ISLAND DARK GREEN. Excellent new highly uniform dark green, surest heading cos. The upright heads are firm and well blanched and show less tip burn and slower to bolt. Sweeter than other Romaine and Mosaic resistant.

ONIONS

PRICES

SEE
NEXT PAGE

1 oz. will sow 100 ft.; 3 to 4 lbs. for an acre

CULTURE: Onions can be grown on any good soil but with fertilizer better results will be obtained. Ground should be well worked and pulverized. Seed can be sown in the spring, just as soon as the ground can be prepared, as onion seed will germinate in cool weather. Sow about $\frac{1}{4}$ in. deep and in rows 12 to 16 inches apart. After they show above the ground give them a good light hoeing. For extra large bulbs, thin out gradually so that they stand 3 to 4 inches apart. For real early onions sow seeds indoors in early February and transplant to field in April.

YELLOW VARIETIES

14 UTAH JUMBO SWEET SPANISH NO. 28. Produces a heavy yield of beautiful uniform, large, firm, globe shaped, small neck bulbs with tough, tight, dark skins. Under normal conditions crop is almost free of doubles and thick necks and about 6 days earlier than regular yellow Sweet Spanish. Good keeper.

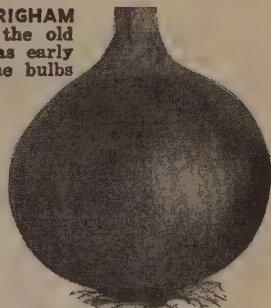

UTAH JUMBO
SWEET SPANISH NO. 28

13C SWEET SPANISH, P.W. UTAH. A carefully selected strain of Sweet Spanish. Produces a large crop of very uniform, large, dark golden globular bulbs. Flesh is firm and of mild flavor. Very few doubles and thick necks.

5E COLORADO No. 6 SWEET SPANISH. Selection for keeping qualities, small neck, firmness and tight, tough dark skin. Slightly shorter tops, almost no thick necks or doubles.

33B MOUNTAIN DANVERS BRIGHAM STRAIN. Much better than the old Mountain Danvers. Equally as early but a heavier yielder and the bulbs are deeper, more globe shaped, very solid, well covered with a tight dark skin. An excellent keeper.

MOUNTAIN DANVERS
BRIGHAM STRAIN

16C YELLOW BERMUDA EXCEL (U. S. 986). Much earlier than the regular strain of Yellow Bermuda. It is deep flat shape, large bulbs. Skin yellow, flesh white and mild. Resistant to bolting and in every way a great advance in the Bermuda class.

ONION PRICES—See top next page

ONION SETS—See page 24

F-1 HYBRIDS

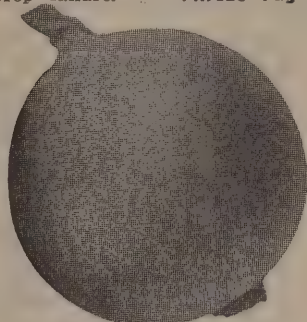

SEED SUPPLY VERY SHORT
ABUNDANCE See page 3

22D X-100 F-1 HYBRID SWEET SPANISH. This exceptionally uniform first generation hybrid with its towering characteristics excels in yield and as a keeper. Bulbs are globular, very firm, with tight, heavy, dark copper brown, overlapping skin. A very high percent of jumbos free of bottle necks may be expected when not over crowded.

EARLY HARVEST HYBRID. U. S. Department of Agriculture Introduction. A promising F1 Hybrid primarily used for early crop. Matures from direct seeding about the same time as standard varieties grown from sets. Bulbs yellow, medium to large globe shaped.

4C BROWN BEAUTY. A somewhat early maturing Sweet Spanish type hybrid. Bulbs large, almost round with a full base. Entire onion covered with an attractive dark copper brown, tough skin which is retained in storage. Crop short.

25D FIESTA. An exceptionally good keeper. Deep globe shape, quite pungent with a firm coppery bronze skin. Crop failure. PRICES Page 15

F-1 HYBRID
X-100

WHITE VARIETIES

12 JUMBO WHITE SWEET SPANISH. Improved strain that yields a high percentage of large bulbs which are uniformly globe shape with small neck, snow white skin and flesh. A heavy yielder with very few thick necks and a good keeper.

22B WHITE SWEET SPANISH. This strain is the result of year after year of careful selection of the largest and finest bulbs of Sweet Spanish to get size and uniformity. Supply of seed this year very short.

160D SOUTHPORT WHITE GLOBE. Best keeping white. Bulbs round, flesh solid, waxy white. We have two excellent strains, medium size and large.

14B ECLIPSE EARLY CRYSTAL-WAX. Bulbs clear white, medium size, thick and flat. Flesh white and mild. Slow bolting, resistant to splitting and pink root.

JUMBO
WHITE
SPANISH
UTAH
IMPROVED

GREEN BUNCHING VARIETIES

15B EVERGREEN LONG WHITE BUNCHING. Hardy. Used mostly for fall planting to winter over for early spring crop. When spaced, will multiply to several stalks per plant.

31 WHITE SPANISH BUNCHING. A strain of Sweet Spanish. The long white slender onions when young are excellent for bunching.

16 WHITE LISBON BUNCHING GOLD SEAL. For over 36 years, this Gold Seal strain has never failed the critical market gardener (whose requirements are the finest quality green onions) produces long, slender, pure white, mild, fine flavor and most tender of all table onions with long, erect, dark green tops. Very slow to form a bulb even under adverse growing conditions.

CELERIAC

121B LARGE SMOOTH PRAGUE. An improved variety producing large tubers of nearly globular shape and comparatively smooth surface.
(Pkt. 15c) (oz. 50c) (1/4 lb. \$1.50).

COLLARDS

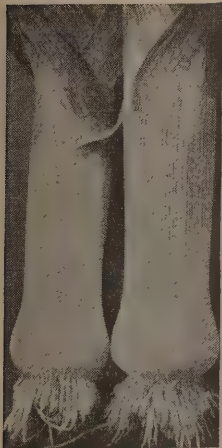

GEORGIA or SOUTHERN. A non-heading type of cabbage. Forms loose clusters of tender juicy cabbage flavored leaves at the top of the 2 1/2 ft. plants.
(Pkt. 10c) (1 oz. 25c) (1/4 lb. 45c) (1 lb. \$1.35).

SALSIFY OR VEGETABLE OYSTER

Easily grown. A delicious vegetable when cooked surpassing in richness of flavor both carrots and parsnips with somewhat the flavor of cooked oysters. Habits and culture similar to those of parsnips. Roots for early winter use should be lifted in the fall and stored in sand, or can be left in the ground; in fact, frost improves the quality.

10A MAMMOTH SANDWICH ISLAND.

(Pkt. 15c) (oz. 35c) (1/4 lb. \$1.10) (1 lb. \$3.90). Postpaid.

LEEK

1 oz. will sow 100 ft.; 4 lbs. will sow an acre.

A species of onion which does not form a bulb, but is used for its mild, delicious root stem or neck. It is much sweeter and milder than the onion; used extensively for flavoring in stews, roasts, etc., where the onion taste is desired, or it can be boiled the same as onions and served with butter and seasoning. Culture same as onion but can be left in ground all winter.

113B GIANT CARENTAN or ELEPHANT. A large, vigorous strain with long, thick, clear white stalks.

(Pkt. 15c) (1/2 oz. 30c) (1/4 lb. \$1.50) (lb. \$4.75). Postpaid.

GARLIC SETS. We supply mother bulbs made up of several sections, called cloves, which should be separated and planted 2 inches deep, 4 inches apart.

Postpaid (1/4 lb. 25c) (1/2 lb. 45c) (lb. 80c) (5 lbs. \$3.75).

KALE

7A DWARF GREEN CURLED (Scotch). Plants 12 to 15 inches tall with 30 inch spread. Compact, leaves plumelike, finely curled, deep yellowish-green. Makes excellent "boiling greens."
(Pkt. 10c) (oz. 20c) (1/4 lb. 50c) (lb. \$1.75).

CHIVES

117A CHIVES. Attractive small perennial plant that can be grown almost anywhere. Culture same as onions. The green tops have a fine mild onion-like flavor, and are used for flavoring cottage cheese, soups, sauces, and meats, and also in salad. Also used successfully as a border plant. Forms a globe-shaped plant covered with small 1 in. round fully double purple flowers.

(Pkt. 15c) (1/2 oz. 40c) (oz. 60c).

Chives Plants see Page 24.

CRESS

11T GARDEN CRESS (or "Peppergrass"). 45 days. Finely cut and curled leaves. Very handsome and has a pleasant, pungent flavor. Used largely in salads and for garnishing. Very easy to grow.

(Pkt. 10) (1/2 oz. 15c) (oz. 25c) (1/4 lb. 75c).

115D TRUE WATER. The pleasant, peculiar flavor of water cress makes it one of the most delicate salads for table use. Will grow where there is a supply of fresh water.

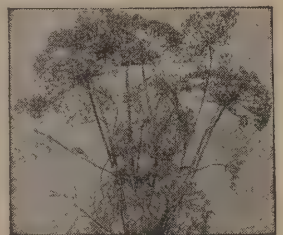

(Pkt. 10c) (1/2 oz. 40c) (oz. 75c) (1/4 lb. \$2.50).

111T CORN SALAD. Large Leaved. Quick grower. Sow in early spring or September. Large leaves can be served like lettuce or excellent in mixed salads or cooked like spinach.

(Pkt. 10c) (oz. 20c) (1/4 lb. 60c).

113C DILL. Annual. 2 to 2 1/2 ft. The green leaves are nice for flavoring soups, stews and sauces; also used extensively in a minced state with lettuce. Dry or green branches and seeds are much prized for flavoring dill pickles and making dill vinegar.

(Pkt. 10c) (oz. 30c) (1/4 lb. 60c) (1 lb. \$1.80). Postpaid.

DILL

OKRA or GUMBO

CULTURE: When the ground has become warm, sow thickly in drills 3 feet apart, and when large enough thin out to a foot apart in the rows. One ounce will sow 30 feet of drill.

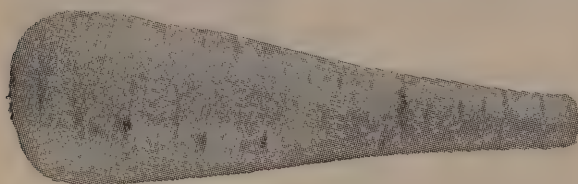

33A CLEMSON SPINELESS. A very uniform spineless strain of Perkins long podded type. Plants have less foliage, 3½ to 4 feet tall. Pods pointed 7 to 9 in. Rich green, moderately ridged and straight.

29A DWARF LONG POD GREEN. Selected earliest variety and very productive. Plants dwarf, 2½ feet high; sturdy and well blanching pods, 4 to 4½ inches long; tender and fleshy.

PARSNIPS

1 oz. will sow 150 ft.; 4 to 5 lbs. required for an acre

CULTURE: Parsnips grow best in a loose, rich sandy loam, but will make good roots in any soil that is reasonably rich and deep. Sow as early as practicable in rows 2 to 2½ feet apart and after plants are 3 to 4 inches high thin to 3 inches apart. Keep the ground well worked and fairly moist. Parsnips are improved by freezing, and a portion of the crop can be left in the ground all winter.

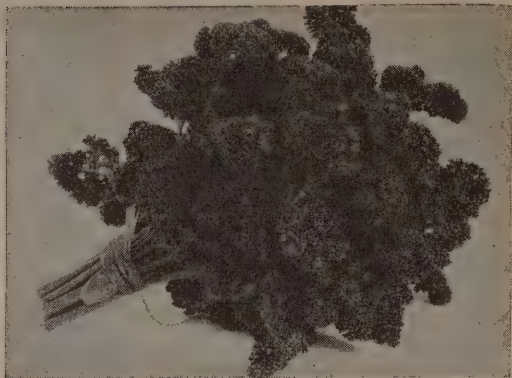

ALL AMERICAN

31 ALL AMERICAN. Has become very popular for home and market. Roots are smooth, tapered, almost white; of medium length, broad shouldered with very few side roots. Flesh is white, tender, fine flavor with small core.

31T HOLLOW CROWN or GUERNSEY. Roots are 12 to 15 inches long; 2½ to 3 inches thick at the shoulder. Tapered uniformly to the tip. Smooth, easily taken from the ground. Flesh fine grained, and good quality.

PARSLEY

1 oz. will sow 100 ft.; 2½ lbs. will sow an acre

TRIPLE CURLED

CULTURE: Parsley seed is very slow to germinate, so plant the seed very early in the year, January is not too early. Have ground free from lumps and sticks. Sow in rows 1 foot apart or broadcast. Cover seed firmly ¼ inch deep. With Hamburg Rooted parsley, broadcasting is best and thin to 8 inches apart each way.

TRIPLE OR MOSS CURLED. A strain of double curled. Plants somewhat more dwarf and compact. We recommend Evergreen.

18B NEW DARK GREEN PLAIN LEAVED. The leaves of this variety are dark green, borne on strong stems; are flat, deeply cut and not curled. Esteemed by many because it has a stronger flavor than other sorts.

16A EVERGREEN. An excellent strong growing strain of dark green closely curled leaves. Definitely more frost resistant than other varieties.

112T ROOTED or HAMBURG. Has plain leaves, can be used just like parsley. Roots resemble a medium size parsnip. Adds pleasing flavor to soups and stews.

SEED POTATOES

CULTURE: Potatoes can be grown in almost any soil providing it is fairly rich. Cut the potatoes in 4 or 5 pieces so there is at least one eye on each piece. Plant one piece 3 to 4 inches deep in hills 12 to 14 inches apart and rows 30 to 36 inches apart. Keep the soil loose about the hills. Do not water until soil becomes quite dry. Do not water by overhead sprinkling. For Pyllid or Purple Top, dust with Sulphur. For worms, use 5% or 10% DDT.

LASOTA. Leading early red variety but used for both early and late crops. Does exceptionally well in most localities. Tubers almost round, skin beautiful red. Is fast replacing RED TRIUMPH as is a heavier yielder, better all round potato.

IRISH COBBLERS or EUREKA. Earliest white variety. Vines somewhat small and erect. Tubers irregular, tending to roundness, keep well in storage. It is quite resistant to mosaic, heavy yielder.

KATAHDIN. Result of breeding program of U. S. Department of Agriculture. Resistant to mild mosaic. Vines strong,

upright. Tubers smooth cream-colored, short oval to roundish, with few very shallow eyes. Very heavy yielder.

RED McCLURE or PERFECT PEACHBLOW. Probably most popular variety in the state. Round red tubers. Late in maturing. Vine strong, upright.

RUSSET BURBANK; NETTED GEM; IDAHO RUSSETS. Require fertile soil and even moisture. Will not tolerate heavy soils or hot weather. Succeeds best at altitudes 6,000 to 8,000 feet. Medium size vine. Tubers cylindrical in shape; shallow eyes.

POTATO EYES BY MAIL

(8,000 to 12,000 Eyes to Acre)

We send potato eyes delivered, all transportation charges paid. We select the seed potatoes using only the smoothest and the firmest. Then we remove the eyes, leaving enough flesh to assure a good plant that will produce potatoes.

(25 eyes, 85c) (50 eyes, \$1.35) (100 eyes, \$2.25) (300 eyes, \$4.90) (500 eyes, \$6.85) (1000 eyes, \$11.00).

ALL PRICES POSTPAID

PEAS AND PEPPERS

One pound will sow 60 ft., 80 to 100 lbs., will sow an acre.

CULTURE: Peas require moderate temperature, plenty of moisture and good, fairly rich soil. The earliest crop can be planted when the ground is ready to work and later plantings can be made which will give you fresh peas all summer long, especially if you are growing them in the higher altitudes. Can be sown in single or double rows with about 2 inches between the seeds and rows 1½ to 2½ feet apart. The seed should be planted about 1 inch to 1½ inches under the surface.

61 EARLY ALASKA. Vines slender, light green, 30 inches high. Pods single, 3 inches long, blunt, light green, round, straight. Seeds small, round, smooth, bluish green. Can be planted very early.

48 LITTLE MARVEL (Gold Seal). Majority of planters consider Little Marvel the sweetest and best flavored of all table peas. Bears an early heavy crop of well filled, plump, dark green, 3 inch pods on sturdy 18 inch vines. For the home garden three to one favorite.

49 LAXTON'S PROGRESS or No. 9. The earliest large podded shipping variety, pods well filled, 4½ inches long, dark green vines grow 18 in. tall. Excellent for home garden and shipping.

63 WORLD'S RECORD or EARLY GIANT. The earliest of all the large podded market garden peas. The vine is 22 inches and is very dark and heavy. The pods are about 5 inches long and very dark green, pointed, plump and round.

63 GRADUS. Same as World's Record.

68 LAXTONIAN or HUNDREDFOLD. Vines short, dark green. Bears abundance of 4½-inch well filled pods with sweet large wrinkled peas.

55 AMERICAN WONDER. Vines 14 in. pods 2¾ in. We recommend Little Marvel.

60 GIANT STRIDE NO. 95 or 40. Vines are vigorous, 27 inches tall, wilt resistant. Pods 4½ to 5¼ inches, plump and dark green. Heavy yielder.

44T WANDO. Vines 28 in., pods 3 in., dark green, fine quality. Withstands more adverse conditions; good yielder.

53 DARK DWARF TELEPHONE. Very popular in the mountains and it is very hardy and a very heavy yielder, of fine well-filled pods which measure about 4½ inches long. Vines are dwarf, grow 2½ to 3 feet high.

40 THOMAS LAXTON. An excellent all purpose variety especially for home garden and freezing. Vines 80 inches. Pods 3½ to 4 inches; well filled of high quality large peas.

40T VICTORY FREEZER — IMPROVED FREEZONIA. All-America Winner. Home garden variety, ideally suited for freezing. Vines 29 inches high, wilt resisting. Pods 3½ in. Excellent quality.

44 EVERBEARING PEAS. Grow about 36 inches high; pods are about 3 inches long; of very fine quality. A constant and heavy bearer.

32D MELTING SUGAR. The leading edible pod variety. The entire pods, when half grown, are excellent when cooked the same as Snap Beans. Pods 4½ inches long, flat. Vines 4 feet long, heavy producer.

All Pea Seed SEAL-GRO-TREETED for Better Stand—Better Crop

PEPPERS

1 oz. for 1200 plants; ¼ lb. will plant an acre

CULTURE: Peppers require good soil, but the lighter type of soil seems to produce the best crops. Seed should be started in hotbeds or cold frames and transplanted to the open as early in May as possible but only after danger of frost is over. Plants should be set out in rows 2 to 2½ feet apart and 20 inches apart in the rows. Some rich fertilizer or commercial fertilizer worked into the soil when the plants are about 9 inches high will be found very beneficial.

FOR MORE VARIETIES AND PRICES NEXT PAGE

15C CALIFORNIA WONDER. The most popular pepper for market gardening and shipping. Plants vigorous, upright, and prolific. Fruits mostly 4 lobed, upright, chunky, and very thick fleshed, sweet, and mild. Continues to bear a long time.

16B RUBY KING. Grows about 4 to 5 inches long and is often 3 inches in diameter. Very productive.

CALIFORNIA WONDER

SWEET PEPPERS (Continued)

12B YOLO WONDER. All America Selection. A heavier yielding larger California Wonder type pepper yields a heavy tonnage of large, thick walled, blocky peppers; widely grown, especially where Mosaic disease is a problem.

14A PIMENTO or PERFECTION. Plants vigorous, upright, very productive. Fruit 3 inches long, heart shaped, smooth, glossy, deep green. Flesh very thick, very mild flavored.

120D MINIATURE SWEET PICKLING. (New) This excellent small $\frac{1}{4}$ inch heart shaped mild thick meated dark green pickling pepper is not at all pungent. Becoming very popular as a relish pepper.

115B HUNGARIAN YELLOW WAX SWEET. An early sort. Plants dwarf and prolific fruit. Sweet pendent pods $1\frac{1}{2}$ inches diameter at base and often 8 inches long of waxy yellow turning to crimson.

Miniature Sweet Pickling

HOT PEPPERS

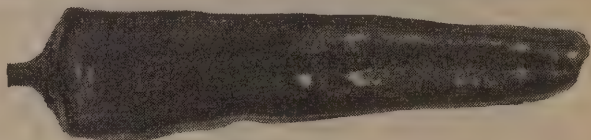

20A ANAHEIM CHILI. A semi hot variety, used in salads and in cooking; also for canning, drying, and in making chili and tamales. Fruits large, 6 to 8 inches long and $1\frac{1}{4}$ inches in diameter with tip tapering to a point.

119D LARGE RED CHERRY. Plants vigorous, upright, prolific. Fruits round, smooth, solid, somewhat pungent. Color deep green changing to deep scarlet. Used in sauces, condiments and canned whole.

119C SMALL RED CHILI. Used in the manufacture of pepper sauce. Bright red pods are about 2 inches long, tapering to a sharp point and exceedingly pungent.

121C CAYENNE LONG RED THICK. New variety having a slender, twisted and pointed pod about 4 inches long, bright red in color, extremely strong.

121B HUNGARIAN YELLOW WAX HOT. Same as Hungarian Wax Sweet but pods are hot and pungent.

SPINACH

HOLLAND GROWN SEED

Produces the heaviest crop. Slower to bolt to seed as contains fewer male plants.

CULTURE: Spinach thrives in any ordinary soil but rich soil increases the size and quality and its cultivation is a very simple matter. For a succession, sow early in the spring and every two weeks thereafter. Sow seed in rows 16 to 20 inches apart. The best crops and heaviest yields are obtained when the growing plants are not crowded; 4 inches apart is best, or seed may be broadcast and thinned out to 5 inches. As spinach likes cool weather it does exceptionally well in our mountain valleys.

FIELD OF BLOOMSDALE DARK GREEN (Re-Selected)

90 BLOOMSDALE DARK GREEN (Re-selected). Distinguished by its deep colored leaves which are thick, broad, heavily crinkled and savoyed. Plants sturdy and spreading. Heavy yielder. A hardy variety which may be used for early spring sowing or for planting in the fall to winter over. Extensively used in cello packaging.

SPINACH PRICES—See Top next page

BETTER STANDS, BIGGER CROPS OF SPINACH

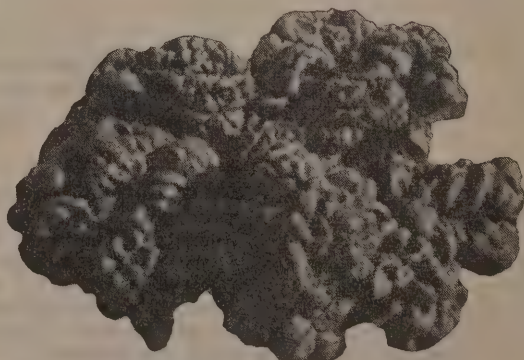

At No Extra Cost to You

85 AMERICA. America is the best spinach for warm weather. It is darker green and longer than any other spinach. It grows slowly but the thick, dark green, heavy crumpled, tender glossy leaves hold up in summer long after most spinach has gone to seed. Plants are low-growing, more compact than other kinds, and the yields are exceptionally heavy. All American Medal Winner.

87 BLOOMSDALE LONG STANDING DARK GREEN. A quick growing hardy variety. Plants large, uniform, erect and sturdy. Leaves dark green, heavy and intensely crumpled. Remains a long time without bolting to seed. It is very valuable for both spring and fall crops. For mid-summer crop, we recommend America.

13A NEW ZEALAND. While this is not a true spinach, it furnishes an abundance of excellent greens throughout the summer. The large, spreading plants produce thick, fleshy leaves, and as the leaves are picked, the plant will continue to produce succulent new growth of leaves.

1 oz. to 100 ft. of drill; 12 lbs. per acre in rows, 25 lbs. if broadcast

1 oz. will sow 100 ft. of row

RADISHES

8 lbs. to an acre in drills, 12 lbs. if broadcast

CULTURE: One of the easiest crops to grow. Radishes will succeed in any good fertile soil. Sow about ½ inch deep in rows 1 ft. apart, or sow in bed by scattering the seed on the surface and rake well into the soil. Make successive plantings every week or ten days. When sowing beets, carrots, parsley, and parsnips, a few radish seed mixed in will help these other vegetables come through the surface crust and insure more young plants.

27 CHERRY BELLE ORIGINATORS STOCK.

This true strain of Cherry Belle has become the Standard Round Radish. Will produce more marketable, uniform, firm radishes than any other variety of round radish. Our seed comes direct from the originator. Is of the highest quality and germination, tops are dark green, short; plants compact; radishes almost round, smooth and bright cherry red. Flesh pure white and very mild. Will remain solid and crisp after all other radishes have become pithy.

88 COMET. Very good strain of Scarlet Globe. Has the good qualities of Cavalier but a rounded instead of an olive shaped root which is bright scarlet; tops short to medium. We recommend Cherry Belle.

19C CRIMSON GIANT. A good home garden variety for out-of-door planting. Roots large, spherical, slightly top-shaped; beautiful deep crimson; the white flesh holds its firmness well.

CHERRY BELL ORIGINATOR SEED

17A FRENCH BREAKFAST. Early home garden variety. Roots oblong, blunt; about 1½ inches long and ½ inches through; rich scarlet with white bottom; flesh white, crisp and firm.

35 SPARKLER WHITE TIP. Outstanding quality. Tops small, roots almost globular with small tap root, skin rosy carmine with lower third area a definite white.

24 LONG WHITE ICICLE. The best early white variety. Particularly popular in home and market gardens. Tops small. Roots long, tapered; very white throughout and brittle; of splendid quality 5-6 inches long and ½ inch thick or larger.

ALL SEASON RADISH MIXTURE. This is a well-balanced mixture including early, midseason and late varieties. It is quite interesting to have a mixed bed. We suggest you broadcast when planting.

FALL AND WINTER RADISHES

These are the varieties usually grown for late fall and winter use. If stored in a cool place, will keep until late winter. The varieties should not be sown earlier than the middle of June. Culture same as other varieties, but should be thinned out to 2½ inches apart.

17C ROUND BLACK SPANISH. A winter sort with round roots, somewhat top-shaped, 3 to 4 inches in diameter; skin black, with cracked longitudinal lines; flesh white, crisp and of strong flavor. An excellent keeper.

18D CHINESE WHITE WINTER or WHITE CALIFORNIA MAMMOTH. Largest of all winter radishes and a favorite with the Japanese gardeners. Root grows 8 inches long and 2 to 3 inches in diameter. Pure white skin and flesh. May be used in all stages of growth. Flesh is solid, crisp and mildly pungent.

SWISS CHARD

CULTURE: 60 days. Easily grown; healthy and nutritious leaves cooked the same as spinach and mid-rib, when boiled, served as asparagus. Also makes delicious fritters. Culture is the same as table beets.

15 FORDHOOK GIANT. This variety continues as the favorite. Leaves much crumpled, dark green, very large, quite tender. The stems are pure white, fleshy, broad and thick. (King Size Pkt. 10c) (oz. 20c) (¾ lb. 45c) (lb. \$1.25). Post-paid.

36 LUCULLUS. Large, light green crumpled leaves. The broad white stalks are splendid creamed. (King Size Pkt. 10c) (oz. 20c) (¾ lb. 40c) (lb. \$1.10).

32A RHUBARB CHARD. Same as other chard except stocks and leaf veins are translucent, crimson. Leaves much crumpled, dark green, fine flavor. plants often used in flower bed borders. (King Size Pkt. 10c) (oz. 20c) (¾ lb. 45c)

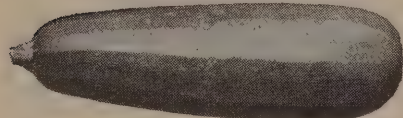

FORDHOOK GIANT

SQUASH

CULTURE: Thrive on almost any soil and require but little cultivation. Plant seed after all frost danger. Sow 4 to 5 seeds to the hill 1 in. deep, thin to 3 plants to each hill. Summer bush varieties should be planted in rows 3½ ft. apart and hills 3 ft. apart in the rows. Winter trailing varieties 5 ft. apart each way. Use summer varieties at any size but are best and most delicious at baby stage. Winter varieties, if carefully handled, can be kept a long time if stored in a cool, dry place.

BUSH or SUMMER VARIETIES

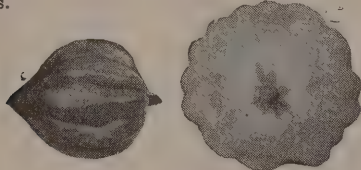

SENECA F-1 HYBRID ZUCCHINI

33D SENECA F-1 HYBRID ZUCCHINI. The earliest, most vigorous and heaviest yielding Zucchini. Fruit are straight, cylindrical, skin smooth, black green. Connoisseurs rate it most highly.
(King size pkt. 20c) (oz. 50c) (¼ lb. \$1.75) (lb. \$6.00)

24E ZUCCHINI (Black). Becomes more popular each year. Fruits cylindrical. Attains 18 inches long, 4 inches diameter. Smooth, rich, dark greenish black, no striping or mottling; flesh firm, greenish white; delicate flavor, but most suitable for table when 6 to 8 inches long.

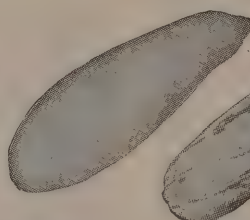

119F CASERTA. A bush squash of the Italian Cocozella type. Yellowish green fruits mottled with dark green. Flesh is tender and of delicious flavor. Extremely prolific. Extra early. Best eating when quite young.

21C EARLY WHITE SCALLOP. Fruits pie shaped with scalloped edges. Have a deep green tint turning to cream color at maturity. Free of warts or knots.

EARLY YELLOW
PROLIFIC

CASERTA OR
COCOZELLA

BUTTERNUT

FALL and WINTER VARIETIES

28E BLUE HUBBARD. Average a third larger than other Hubbards and more prolific. Superior in edible quality to other Hubbard strains. Fruits large, round, pointed at both ends with very hardy blue-gray rind. Weight 12-14 lbs. Flesh yellow-range, thick, of fine flavor.

34 HUBBARD IMPROVED. Also called True Hubbard. It is one of the best for general purposes. The size is medium, the color deep green with a fair amount of warts. The rind is hard, the flesh thick and of fine texture and it keeps very well. The fruits are pointed at both ends.

21 HUBBARD WARTED. The largest of the green Hubbards. Color very dark green. Shell hard and heavily warted. Flesh deep orange-yellow, dry, fine grained, and of excellent quality.

22E BANANA (BLUE). A long type of winter squash 20 inches long, 6 to 7 inches in diameter and becoming very popular. Color is slate blue, flesh thick, fine grained of yellowish orange and of sweet flavor.

21E EARLY PROLIFIC STRAIGHTNECK. Strictly bush compact, high-yielding summer squash. Fruits straight, almost smooth, of delicate creamy yellow color. Quality unsurpassed.

19E EARLY SUMMER GOLDEN CROOKNECK. Bears fruit of medium size, with curved neck, of a golden yellow color, and thickly covered with warts. Very prolific.

20D TABLE GREEN or ACORN (Green). Desirable for home, market garden and also for shipping. Convenient for baking and serving in halves. Weighs only about 1½ pounds. Acorn shaped fruits. Ribbed, smooth thin shell of very dark green color. Flesh light yellow, with inviting flavor. Trailing in habit.

23C MAMMOTH TABLE QUEEN (Royal Acorn). Identical with Standard Table Queen except third larger; thicker flesh.

113D BUTTERNUT. Fast becoming one of the most acceptable and satisfying medium winter squash. An excellent meaty variety of the finest quality. The bulb and thick necks are solid with delicious orange flesh, excellent quality void of coarse texture. Splendid for baking and pies. Fruits 3 to 6 lbs., 10 to 12 inches long. Although it matures early, a very good keeper.

21B BUTTER-CUP. Turban shaped 6x8, weight 3½ lbs. Flesh thick, fine grain, deep orange. Cooks dry and sweet. Excellent flavor.

PUMPKINS

4 oz. will plant 100 hills; 3 lbs. will plant an acre

CULTURE: Sometimes grown in cornfields, but if grown as a separate crop, seed should be planted in hills 8 to 10 feet apart each way after weather and soil get warm. Hoe often till vines begin to run. Pumpkins do not require much water. Cut pumpkins from vine after leaves die, leaving 3 or 4 inches of stem attached and store in a dry place. Handle carefully and avoid bruising.

117F CONNECTICUT FIELD. Also known as Large Yellow. Popularly known for home use as a pie pumpkin, as stock feed, canning, and Halloween decorations. Fruits large, 15 to 20 lbs., have a hard orange, smooth and slightly ribbed skin; the thick flesh is deep yellow in color, coarse textured and sweet.

22 SMALL SUGAR. Also known as New England Pie. This fine variety is the most generally used of all the pumpkins. The round fruits are flattened at both ends, and slightly ribbed, average 7 lbs., very prolific. The thick, bright orange flesh is dry, sweet and of unusually fine quality.

SMALL SUGAR

1 oz. produces 1500 to 2000 plants; ¼ lb. per acre.

TOMATOES

PRICES NEXT PAGE

CULTURE: The best crops are grown on light, rich soil. In most sections the seed should be sown in hotbeds early in April or about 6 weeks before transplanting to the field. Sow seed in rows 4 inches apart and not over ½ inch deep. Enough plants for a small garden may be grown in shallow boxes or flower pots in a sunny window in the house. When the weather becomes warm out of doors, gradually harden them by exposing them to the air. When all danger of frost is past, set out in the open 3 or 4 feet apart each way. During the growing season do not allow the ground to cake or harden. Give plenty of cultivation until the vines cover the ground.

28A BOUNTY, EARLY. Especially recommended for dry land and sections with short season. Fruits are scarlet averaging 6 ounces, semi-globular of good quality. Plants small, short, may be set 2 feet apart in row.

28C BEAUTY, Gulf State. Very prolific; large smooth and a glossy crimson with a tinge of purple; grows in clusters of four to six large fruits, retaining its splendid size throughout the entire season. Flesh is very firm, has a tough skin and few seeds; seldom rots or cracks. A hardy grower.

29D BEEFSTEAK — See Crimson Cushion.

28D CHALK'S EARLY JEWEL. One of the most satisfactory of second early varieties. Fruits flattened, bright red, firm and meaty, heavy producing. One of the finest for the home garden and canning.

25A JUNE PINK. The earliest of the pink-fruited varieties. Vine is open, spreading, and rather short. Fruits medium sized, flattened, smooth; color purplish pink.

EARLY F1 HYBRID
RUTGER'S X VALIANT

EARLY F1 HYBRID. Rutgers X Valiant. Many trials the past two years throughout the country have proved this the best F1 Hybrid. Comes in a week before and bears fruit larger than Rutgers. Plants have unusually hybrid vigor and give much greater yields than other tomatoes. Performs well even under adverse conditions. Very meaty. (Pkt. 30c) (¼ oz. \$1.00) (¼ oz. \$1.75) (1 oz. \$5.50) (¼ lb. \$18.00).

YELLOW PLUM RED CHERRY

SEE TOP
NEXT PAGE

29D CRIMSON CUSHION or BEEFSTEAK. An improved Ponderosa in that it is a red-fruited variety; smoother, earlier. Gardeners prefer Crimson Cushion or Beefsteak over Pink Ponderosa as it is a better all around tomato. Both bear large, somewhat irregular, fruit.

PONDEROSA—(See Crimson Cushion)

32C PEARSON CERTIFIED. Leading tomato in this area. A splendid all-around, heavy yielding tomato. Fruits are medium-large, semi-globe, smooth, of good even red color. Thick skinned, inside rose scarlet, very meaty and full. Vine compact with ample foliage to protect the heavy set of fruit. Unusually free from cracks and other defects.

24A EARLY STONE. Certified. A new development. One week earlier than the Improved Stone. Vines heavy, large, deep green, and prolific; fruit larger than the Improved Stone, semiglobular, smooth, deep scarlet red and ripens well to the stem. Interior deep red.

24B PRITCHARD CERTIFIED. Fruit rich scarlet, medium large, nearly globular with thick walls. Partially resistant to Fusarium Wilt and Nailhead Rust. Medium early.

20E MARGLOBE Certified. This main crop variety has come into wide use among large and small growers. Plants vigorous with heavy foliage, resistant to Fusarium Wilt and Nailhead Rust. Fruits medium large, nearly globular, deep red, smooth, solid with thick walls and cross sections.

22C RUTGERS Certified. A heavy favorite in nearly all important tomato growing areas. Uniform wilt resistant, with deep red skin and flesh. Ripens from inside out. Especially recommended as a shipper and market garden variety.

23A STOKESDALE. Certified. An Early scarlet fruited variety maturing about 10 days earlier than Marglobe. Plant rather open in habit with medium heavy foliage. Fruits large, globe or sub-globe, smooth and well colored. Recommended where length of growing season is less than average.

PEARSON CERTIFIED

(Other Varieties and Prices Page 22)

TOMATOES (Continued)

PONDEROSA—(See Crimson Cushion)

25E LANDRETH. A second early fine general purpose tomato; highly praised by market and home gardeners; a good canner. Fruits deep scarlet red, oblate to nearly round, medium size, smooth, solid, of good quality. Adapted to pruning and staking if desired.

24C JOHN BAER (Bonne Best). Splendid for market gardening and canning. Vines are of medium height, fruit medium size, semiglobular, very attractive bright red, smooth and quite firm.

26C LIVINGSTON GLOBE. An excellent variety, well adapted to greenhouse production. Vine strong, with heavy foliage; prolific. Fruits large, full globe, smooth; purplish pink, ripens evenly.

SMALL FRUITED TOMATOES. Popular for preserves, pickling, salads, etc. Gives high yields.

26B RED CHERRY.
Bright red.

26E YELLOW PLUM.
Bright yellow.

TURNIPS

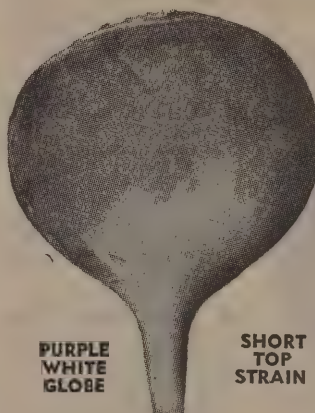

1 oz. will sow 150 ft.; 1 1/2 to 2 lbs. in rows,
4 to 5 lbs. broadcast will plant an acre.

CULTURE: As soon as ground can be worked, spade or plow deeply, and prepare the surface finely, raking off the clods and trash. Sow the seeds at once in the freshly dug soil; sow very thinly in rows 1 to 3 feet apart or broadcast by raking the seeds into the soil 1/2 inch deep. When up, thin out to 3 inches apart. Soil should not be allowed to become hard or dry, for turnips to be good and mild must be grown quickly. Sowings at intervals of 10 days can be made until the end of August.

23 PURPLE TOP WHITE GLOBE. (Smith Strain). Fine appearance, being globe-shaped, flesh firm and white, skin smooth, pure white, except crown or upper portion, which is richly colored, maroon to deep purple. It is exceptionally sweet and mild. Flesh is crisp, not stringy. Quick grower with heavy yield.

6D PURPLE TOP WHITE GLOBE, SHORT TOP. Different from other Purple Top White Globe strains in that during hot summer season the tops grow shorter, sturdier and dark green. The roots uniform globe shaped, flesh pure white.

23B GOLDEN BALL (Orange Jelly). A delicate and sweet-flavored yellow-fleshed turnip, not of large size but firm, hard and superior quality. Keeps well.

**PURPLE

Our Watermelon seed is a superior product, grown under absolute isolation. No commercial picking is allowed.

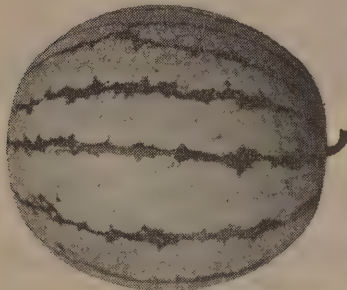

3 ozs. to 100 hills; 4 to 5 lbs. will plant an acre.

CULTURE. Watermelons do best in light, rich, well-drained sandy loam. Prepare hills about 8 feet apart each way. Drop 7 or 8 seeds in the hills, covering about ¾ inch deep. As soon as plants commence to run, thin out to three best plants in a hill. Be careful not to irrigate too often. Watermelons are lovers of drought and frequent deep cultivation. A liberal amount of manure or commercial fertilizer will increase the yield. For extra early melons, use our Hotkaps. See page 68.

23D WILSON SWEET. Especially adapted to midwest area. Flesh is bright rose, firm, sweet flavor, like the famous Klondikes. Average size 16 to 18 lbs., sometimes to 24 lbs. Slightly oblong. Seed whitish with brown edges.

111C NEW HAMPSHIRE MIDGET. We recommend Sugar Baby.

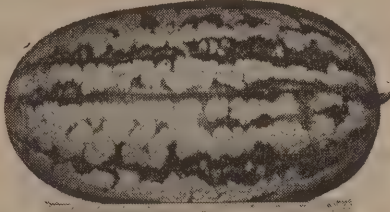

30B DIXIE QUEEN. (Wilt Resistant). An excellent home garden and shipping melon. Bears an unbelievable number of almost round fruit weighing around 28 pounds. Rind thin and tough, light green color with dark green irregular stripes. Flesh rich scarlet, fine grained, tender, luscious flavor. Seeds small and white.

DIXIE QUEEN

WATERMELONS

21A SUGAR BABY. The best of the icebox varieties. Early maturing. Melons round dark green with faint black green stripes. Average weight 8 lbs. Flesh firm, excellent flavor, and sweet; free of white heart. Seed small dark brown.

KLONDIKE STRIPED RS-57

32B KLONDIKE STRIPED RS-57. A new wilt resistant variety. An improvement over Klondike No. 11, and higher sugar content. Melons large with medium thin, tough, light green rind with dark green stripes. Flesh bright red of delicious flavor.

32 EARLY KANSAS. Has rapidly gained wide popularity on the markets of the midwest. Fruits are large, nearly round, dark green with alternate stripes of lighter shade. Flesh is firm, a rich red color, exceptionally sweet; seed reddish-brown.

29B KING AND QUEEN. Winter. A unique variety because when stored in a cool place it retains its good flavor and quality for months. Medium strong rind. Very light green. Flesh brilliant red with small black seeds. Normal weight 12 to 14 lbs.

33C BLACKLEE (Wilt Resistant). A good shipper, very resistant to Fusarium Wilt. Fruits are medium large, cylindrical and blocky, averaging 30 to 32 pounds; dark blue-green with a thin but tough rind. Flesh is deep red, firm and sweet.

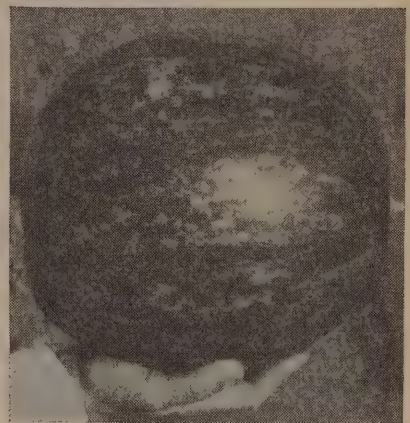

29E KLONDIKE SCARLET PEACOCK. Similar to Klondike Black Seeded. Splendid as a market and shipping variety. Flesh is crimson; good texture and flavor. Melons good size, dark green with firm rind.

31E KLONDIKE NO. 7. (Wilt Resistant). Melons 16 inches long, 8 inches in diameter. Exterior dark green, thin rind but rather tough. Flesh very dark pink, sweet, free from fiber and very fine quality.

29E PEACOCK. Similar to Black Seeded Klondike No. 7 but with a much tougher rind. Melons oblong, blocky ends, many slightly furrowed lengthwise, 15 to 17 inches long and 9 inches in diameter. Skin dark green. Flesh distinct orange-red, good quality.

25B KLECKLEY SWEET NO. 6. An improvement over the regular Kleckley Sweet. Shows a very good degree of resistance to Fusarium Wilt. The long and cylindrical (22 x 12 in. and a weight of between 30 and 35 pounds) melons are very dark green with fine quality, bright-red flesh. Rind is very dark green and strong. A good shipper.

ROCKY FORD. Same as Kleckley Sweet.

VEGETABLE ROOTS—PLANTS—ONION SETS—HERB SEED

(No Plants or Nursery Stock Sent C.O.D.)

ASPARAGUS ROOTS

An asparagus bed is easy to start and will supply an abundance of spears for over 10 years. Roots should be planted 3 in. deep in good soil as early in the spring as the ground can be worked, spacing them 15 in. apart in rows 2½ ft. or more apart.

TWO-YEAR-OLD ROOTS

	Per 25	50	100
Any Variety	\$.75	\$1.40	\$2.35
Add Postage and Packing35	.44	.69

Write for prices on larger quantities.

ASPARAGUS SEED

SEED should be sown as early in the spring as ground can be prepared. When the roots are 1 or 2 years old, transplant them to their permanent location.

113E MARY WASHINGTON. Very productive; very uniform; large, dark green spears.

30C WASHINGTON 500 or CALIFORNIA 500. A new early prolific, rust-resistant strain of Mary Washington producing extra large spears up to 1 inch in diameter, which are uniform and dark green to the very tip.

HERB SEED

BASIL, SWEET, LARGE LEAVED. The flavor of the leaves is spicy and it is desirable for salads and dishes containing tomato and cheese, egg plant, squash, carrots, peas and meat. (Pkt. 10c) (½ oz. 25c) (oz. 40c).

BORAGE. Annual; leaves used in salads and drinks. Excellent for bees. (Pkt. 10c) (½ oz. 30c) (1 oz. 50c).

CARAWAY. Biennial; 18 inches, produces seed first year, used in flavoring bread, cakes, cheese, etc. (Pkt. 10c) (oz. 30c).

CATNIP. Perennial; 2½ feet, young leaves and shoots used for seasoning. Dried leaves for tea. (Pkt. 15c) (½ oz. 40c) (oz. 60c).

CHIVES—See page 15.

CORIANDER. Annual; 2 feet, seed chiefly used by packers and confectioners. Also used in medicine. (Pkt. 10c) (oz. 45c).

DILL—See page 15.

FENNEL, SWEET. Perennial; seed used for flavoring confections. Leaves used in salads and sauces. (Pkt. 10c) (½ oz. 30c).

HOREHOUND. Perennial; has strong aromatic odor, leaves used for seasoning; extract used in medicinal preparations. (Pkt. 10c) (½ oz. 20c) (oz. 30c).

MARJORAM, SWEET. Perennial; of aromatic and pungent flavor, tender leaves used in seasoning. (Pkt. 15c) (½ oz. 40c) (oz. 55c).

ROSEMARY. Perennial; fragrant leaves used in sachets, also to flavor roasts and stews. (Pkt. 20c) (½ oz. 60c).

SAGE, BROADLEAVED. Used in dressing, sausage, etc. When once started will last for years. Should be in every garden. Sow in the open ground. Thin to six inches apart. (Pkt. 15c) (½ oz. 30c) (oz. 50c).

SUMMER SAVORY. Annual; 10 inch leaves and shoots used for seasoning. (Pkt. 12c) (½ oz. 25c) (oz. 40c).

THYME, BROADLEAVED. Perennial; used for seasoning, also used as tea for nervous headache. (Pkt. 15c) (½ oz. 40c).

MIXTURE of above ANNUALS or PERENNIAL HERBS. (Large Pkt. 15c) (½ oz. 40c).

Top Quality ANNUAL FLOWER SEEDS in King Size Packets

ANNUAL FLOWERS are those which grow, bloom, seed and die in one season. Usually they are the most continuous bloomers. The seed of most annuals may be sown directly in their permanent place; for earlier blooms seed should be started indoors. If that is not convenient, select a warm location in the yard for a seed bed, and after plants are established reset them to their permanent place. A fine, loose, mellow soil is best. Seed can be sown in rows or broadcast. Do not plant flower seed too deep. Usually a covering with fine pulverized soil equal to four times the diameter of the seed is best. Very fine seed may be merely pressed firmly in the soil. Never allow the covering soil to become dried and caked. A mixture of one-third fine peat moss and two-thirds fine soil used as a covering (especially for the finer seeds) will help considerably in getting a stand. When watering be sure to use a fine spray until the plants have gotten well through the surface.

PERENNIAL FLOWER SEED — See Pages 38 and 39

ALL FLOWER PRICES POSTPAID

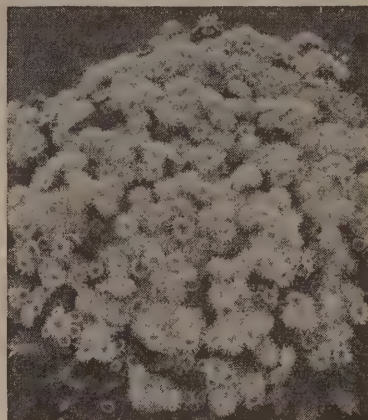

AGERATUM (Floss Flower)

Very attractive free blooming dwarf border and rock garden flower. Easily grown from seed.

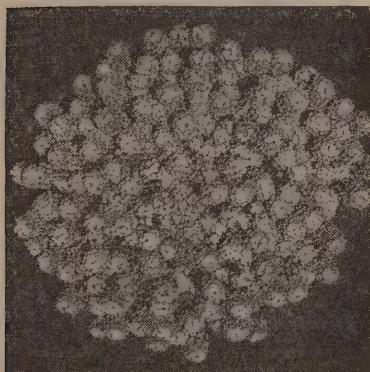

102A Blue Bedder. One of the best. Produces an abundance of medium sized bright blue flowers. Plants 6 inches tall. Medium early. (Pkt. 15c) (¼ oz. 45c).

103A Blue Island. Large flowers, deep blue. Plants 8 inches, heavy bloomer, uniform, compact; habit medium early. (King Size Pkt. 15c) (¼ oz. 50c).

104A—Imperial Lavender Blue. Blooms early. Plants 8 inches, compact, above which stand clusters of large, lavender blue flowers. (Pkt. 15c) (¼ oz. 40c).

AGERATUM, BLUE BEDDER

ALYSSUM, ROYAL CARPET

ALYSSUM

One of the easiest flowers grown. A quick bloomer, for borders, baskets, pots, rock work and for cutting. Blooms all season. In borders, sow thickly so as to form masses.

107A—Royal Carpet. All-America Winner. Plants are low and spreading, 2 or 3 inches high, 10 or more inches across, fully covered with large heads of rich Violet or vibrant purple flowers. Distinct. (Pkt. 20c) (1/16 oz. 50c) (½ oz. \$1.50).

108A—Violet Queen. Plants are dwarf compact, neat in habit, covered with small sweet scented flowers of a rich, very deep shaded violet from early summer until late fall. Excellent for borders. (Pkt. 12c) (¼ oz. 30c) (½ oz. 40c).

111A—Snow Cloth (Improved Carpet of Snow). Extra dwarf, 8 inches, covered with delicate white flowers. (Pkt. 12c) (¼ oz. 20c) (½ oz. 30c)

112A—Little Dorrit. Forms perfect little bushes 4 inches smothered with miniature white flowers. (Pkt. 15c) (¼ oz. 25c).

Alyssum Perennials. See page 38.

AMARANTHUS

Plants are hardy annual and are grown for their brilliant foliage. Especially suitable for backgrounds, centers of beds.

115A—Rising Sun. (Joseph's Coat). Plants 3 to 3½ feet, foliage scarlet, crimson, richly variegated with yellow and bronze-green. (Pkt. 12c) (¼ oz. 35c).

116A—Caudatus (Love-Lies-Bleeding). Long drooping crimson flower spikes with yellowish green foliage. 3½ feet tall. (Pkt. 10c) (¼ oz. 20c) (oz. 45c).

ANCHUSA (Capensis)

118A—Blue Bird. One of the best blue annuals. 2 feet tall covered with intensive blue flowers with white eyes, blooms all summer. (Pkt. 15c) (¼ oz. 25c).

Also see Perennial Varieties of ANCHUSA, page 38.

ANTIRRHINUM. See Snapdragon, page 35.

ARCTOTIS. See African Daisy, page 22.

AMARANTHUS, RISING SUN

ASTERS

Asters are easy to grow. They prefer rich, well-drained soil and a warm, sunny location. Seed can be sown outdoors but for earlier blooms seed should be sown in March or April in the hotbed or in boxes, and when the plants have three or four leaves transplant to the open, 18 inches apart each way.

DISEASES OF ASTERS

The two main diseases of asters are aster wilt and aster yellows. Wilt can be avoided by using wilt resistant seed. But Yellows is a virus, and is somewhat more difficult to control. Regular spraying with Isotox or D.D.T. helps considerably to kill the leaf hoppers that carry the disease.

EARLY QUEEN OF THE MARKET—Wilt Resistant. Two weeks earlier than most others. Branching habit. $1\frac{1}{2}$ feet tall, beautiful shades of nearly round, fully double flowers, long stems.

122A—Mixed. (Pkt. 12c) ($\frac{1}{4}$ oz. 45c).

PRINCESS—Wilt Resistant. Plants $2\frac{1}{2}$ feet, branching. Very attractive new cutting type. Early blooming. Flowers 8 to $8\frac{1}{2}$ inches with full crested yellow centers surrounded by several rows of dainty plumelike petals.

130A—Mixed Colors. (Pkt. 15c) ($\frac{1}{4}$ oz. 50c).

BABY'S BREATH
(Gypsophila)

ASTERS

CREGO GIANTS OR OSTRICH FEATHER—Wilt Resistant. This is the finest of the Comet Asters. Flowers large, double and have long, narrow, gracefully curled petals. Plants grow about $2\frac{1}{2}$ feet tall.

131A—Deep Rose.

132A—Crimson.

133A—Royal Purple.

134A—Shell Pink.

135A—Light Blue.

136A—White.

137A—Mixed.

Any of above: (Pkt. 15c) ($\frac{1}{4}$ oz. 45c) (oz. \$1.25).

EARLY AMERICAN BEAUTY—Wilt Resistant. Identical with American Beauty but blooms earlier. Plants branching $2\frac{1}{2}$ feet tall. Flowers fully double with prettily incurved petals 4 inches across, compact; unusually long stemmed; excellent cut flower.

140A—Mixed all colors.
(Pkt. 15c) ($\frac{1}{4}$ oz. 45c).

BABY'S BREATH

(Gypsophila)

Small, fragrant flowers, borne on long feathery stems. No flower adds more of light and grace to a bouquet and when once grown will be found indispensable.

142A—Convent Garden—Florist Strain.

An Improved Giant, pure white, 8 to 9 overlapping petals. Best white.

(Pkt. 10c) ($\frac{1}{2}$ oz. 30c).

143A—Elegans Crimson. Beautiful shade of carmine. (Pkt. 10c) ($\frac{1}{4}$ oz. 20c). Perennial Varieties, see Gypsophila, page 39.

BABY BLUE EYES

(Nemophila)

Hardest of annuals. Easy culture, likes semi shade.

145A—Insignis Blue. Lovely cup-shaped sky-blue flowers with white centers. Rock garden plant. (Pkt. 15c) ($\frac{1}{4}$ oz. 30c).

BACHELOR BUTTON

Plants grow 2 to $2\frac{1}{2}$ feet tall and if faded flowers are kept cut they will produce continuously double blooms on long stems throughout the summer and fall. Fine for beds, borders and cutting. Also called Ragged Sailor, Ragged Robin and Cornflower. Do well in cool, partly shaded location. Easy to grow.

147A—Blue Boy. Double. Exquisite cornflower blue.

148A—Maroon Boy. Double. Maroon.

149A—Red Boy. Double deep red.

150A—Snow Man. Double. Graceful large white.

151A—Pinkie. Double. Lovely true pink.

152A—Mixed. Double. All colors mixed.

Any of the above: (Pkt. 10c) ($\frac{1}{4}$ oz. 25c).

153A—Jubilee Gem. Extra dwarf. Bushy. Double, dark blue flowers. Vivid green foliage.
(Pkt. 15c) ($\frac{1}{4}$ oz. 35c).

BALSAM CAMELLIA

BALSAM (Lady Slipper)

A very easy and satisfactory annual to grow, plants 18 inches tall, bushy, bears a profusion of many colored flowers in the axils of the leaves.

155A—Camella Flowered. Mixed.

156A—Rose Flowered. Mixed.

Either of the above, mixed colors:
(Pkt. 12c) ($\frac{1}{2}$ oz. 30c).

BALLOON VINE

Hardy annual climber growing 10 feet in height. Foliage light green. Bears small white flowers, followed by inflated seed pods resembling small balloons. Used mostly to cover fences, etc., free and rapid grower.
(Pkt. 15c) (oz. 25c).

BELLS OF IRELAND

141A—Seed sown outdoors after soil has become well warmed gives excellent results. The 2 foot graceful stems thickly surrounded by 2 inch bright green flowers with small white corolla, lends so well to flower arrangements. (Pkt. 15c) ($\frac{1}{4}$ oz. 50c).

BURNING BUSH. See Kochia.

BACHELOR BUTTON, BLUE BOY

CALIFORNIA POPPY (Eschscholtzia)

CALLIOPSIS

Easily grown in almost any location. Very showy, daisylike flowers in a wide variation of yellow and orange tones with finely cut foliage. Blooms continuously.

159A—Golden Wave. Semi-dwarf plants covered with large, golden yellow flowers with reddish brown center circle. (Pkt. 10c) (1/4 oz. 25c).

160A Bi-Color Dwarf Mixture. Shades of yellow and orange, mahogany-brown and crimson. (Pkt. 12c) (1/4 oz. 25c).

CALIFORNIA POPPY (Eschscholtzia)

Hardy annual, produces an abundance of bright, cheerful blooms on plants 1 to 1 1/2 feet high with finely cut foliage. Sow in a sunny location where plants are to remain. Does well in locations up to 8,000 ft. altitude.

163A—Orange King (True California Poppy). Pure orange, large.

165A—Golden West (California). Yellow with orange center.

167A Carmine King. Crimson Carmine.

168A—Brilliant Prize Mixture. Single.

169A—Double Mixed. A mixture of the best double and semi-doubles in an excellent color range. Also gorgeous bi-color effects. Profuse bloomers.

Any of the above—(King Size Pkt. 15c) (1/4 oz. 35c) (oz. 80c).

CALENDULA

Large double flowers blooming all summer. Plants grow 1 1/2 to 2 feet high. They are easy to grow, a constant bloomer and a very desirable flower.

Pacific Beauty (Heat Resistant). A new class of Calendula with extra large, graceful blooms that are less formal, have straighter stems. Colors clearer, more heat resistant than the regular strains.

175A — Apricot Beauty. Bright two-tone apricot.

176A—Persimmon Beauty. Persimmon orange.

177A—Lemon Beauty. Pure lemon, long petals.

178A—Pacific Beauty. Mixed.

Any of above: (Pkt. 12c) (1/4 oz. 25c).

CALENDULA—Continued

180A—Sunshine. Large Chrysanthemum. Canary yellow. Fine for cutting.

(Pkt. 12c) (1/4 oz. 20c).

182A—Ball's Gold. Beautiful variety especially adapted to forcing. Deep glowing orange.

(Pkt. 10c) (1/4 oz. 20c).

CANDYTUFT (Iberis)

Easy to grow. Requires little care. Sow any time in spring. Blooms all summer. 12 inches high.

185A—Rose Cardinal. Bears an abundance of rose colored flowers.

(Pkt. 15c) (1/4 oz. 35c).

186A—Giant Hyacinth Flowered. Large spikes of purest white flowers, erect habit and a free bloomer. Recommended for cut flower and bedding.

(Pkt. 10c) (1/4 oz. 25c).

187A—Dwarf Large Flowering. Mixed.

(Pkt. 10c) (1/4 oz. 25c).

CASTOR OIL PLANT (Ricinus)

192A—Zanzibar, Mixed. A large growing ornamental, tropical appearing plant, beautiful in backgrounds. Does best in warm locations. Attains a height of 10 to 12 feet with large-lobed leaves in green, red, and bronze.

(Pkt. 10c) (oz. 15c) (1/4 lb. 50c).

CALENDULA, PACIFIC BEAUTY

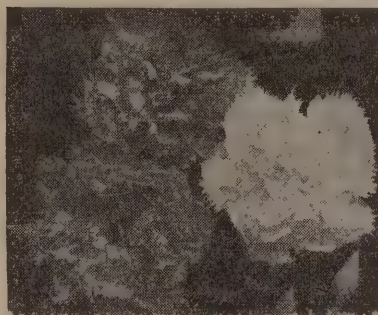

CARDINAL CLIMBER

191A—Quick growing climber, 15 ft. tall, fiery red blooms 1 to 1 1/2 inches borne in clusters of five to seven blooms each. Does best in a warm sunny location, and rich soil.

(Pkt. 15c) (1/4 oz. 25c).

CARNATIONS

GARDEN CARNATIONS. They are very neat in habit and are remarkable for their rich profusion of flowers. Can be sown in early spring but most satisfactory method is to start indoors and transplant to the open about 18 inches apart. All are biennial if given some protection through the winter.

CARNATION, GIANT CHABAUD DOUBLE

MARGUERITE CARNATION DOUBLE. An early strain of Chabaud. Plants more compact and shorter. Produces a high percent of double but somewhat smaller blooms of excellent colors.

200A—Best Mixed. (Pkt. 15c) (1/4 oz. 35c).

Giant Chabaud Double. Most satisfactory of the annual carnations. This strain reselected for larger more double flowers which are deeply fringed, clove scented. Plants are 16 inches tall, upright habit with strong stems.

194A—Nero. Deep dark crimson.

195A—Jeanne Dionis. Large white.

196A—Marie Chabaud. Yellow.

197A—Etincelant. Bright scarlet.

198A—Mixed. Finest of all colors.

Any of above: (Pkt. 20c) (1/4 oz. 45c).

CALLIOPSIS, BI-COLOR

CANDYTUFT, GIANT HYACINTH FLOWERED

CHRYSANTHEMUM DAISIES (Annual)

Flowers of easy culture, fine for cutting. Sow seed in May. For earlier blooms sow seed indoors and transplant to 10 inches apart.

- 203A—Painted Daisy Merry Mixture. Single. Plants 2½ feet, strong stems, profusion of daisylike flowers mostly in shades of yellow, orange, scarlet, white with 2 zones of contrasting darker colors encircling center. (Pkt. 12c) (¼ oz. 25c)
- 204A—Dunnits Hybrids Double Mixed. Flowers golden yellow, white, and scarlet daisylike flowers. (Pkt. 12c) (¼ oz. 30c).

CLARKIA

A very pretty and graceful plant. Bushy light green foliage. Blooms early and freely with quantities of delicately colored double flowers in rosettes. Covering entire stock of the plant. Height 2 feet. Does well in semi-shade.

- 205A—Choice Double Mixed. (King Size Pkt. 12c) (¼ oz. 25c).

COLEUS

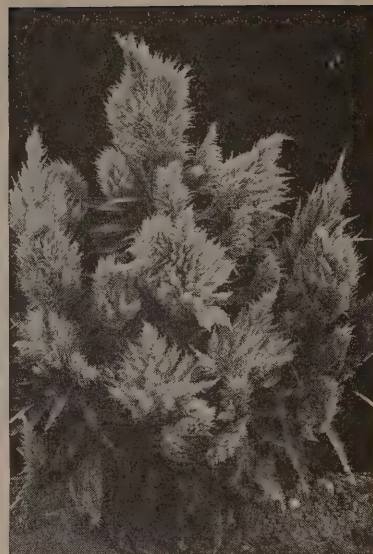

Handsome decorative plant with brilliantly varied colored foliage. Plant in full sun.

- 207A—Rainbow Mixture Improved. Handsome medium to large leaves; distinguished by its beautiful colors and markings and robust compact growth. Finest strain. (Pkt. 30c) (¼ oz. 80c).

CRESTED COCKSCOMB (Celosia)

The large showy heads of odd-shaped flowers are like immense rooster combs. Bright red and golden yellow on medium height plant staff.

- 209A—Best Mixed. (Pkt. 10c) (¼ oz. 30c).

COCKSCOMB, CELOSIA

FEATHERED COCKSCOMB (Celosia)

Plume Types. Showy, well-branched 80-inch plants. Each branch crowned with long, silky, fiery-red, yellow, golden-orange feathery plumes.

- 210A—Golden Plume. Golden yellow. (Pkt. 15c) (¼ oz. 40c).
- 211A—Scarlet Plume. Glowing scarlet crimson. (Pkt. 15c) (¼ oz. 40c).
- 212A—Pampas Plume. A mixture of many new shades with large, dense plumes and long stems. (Pkt. 15c) (¼ oz. 40c).

COSMOS (King Size Packets)

A strong, tall-growing annual, with bold flowers of exquisite daintiness and airiness, heightened in effect by their foliage setting of feathery green. Effective when planted in broad masses or along background. Sow outdoors.

- 218A—Klondyke Orange Flare. Grows 8 feet tall with beautiful golden orange blooms 3 inches across. (Pkt. 15c) (¼ oz. 35c).

Early Sensation Cosmos

(Extra Early Mammoth). Plants 4 to 6 feet high. Bears a profusion of early, giant flowers 4 to 6 inches in diameter with over-lapping fluted petals. Stems long, excellent for cutting.

- 220A—Dazzler. Rich deep crimson; yellow eyed center.
- 221A—Radiance. Deep rose overlaid with rich crimson towards yellow eyed center.
- 222A—Pinkle. Charming rose-pink.
- 223A—Purity. Large pure white with satin sheen and deep yellow center.
- 224A—Mixed Sensation. All best varieties.

Any above Cosmos. (King Size Pkt. 15c) (¼ oz. 35c) (½ oz. 50c).

DAHLIA, MIGNON

DAHLIAS, DWARF GROWING

There is a fascination in growing dahlias from seed as they always produce many new types and colors. They will flower the first season if sown early or started in boxes and transplanted. Protect the tubers over winter in a dry cellar in sand.

- 227A—Mignon Mixed. Finest of single Dahlias. Will give profusion of color first year, and ideal for bedding and cutting. Plants dwarf, grows 14 to 16 inches; rounded single flowers in bronze, apricot, orange, scarlet, lavender and striped. (Pkt. 10c) (¼ oz. 30c) (½ oz. 50c).
- 228A—Unwin's Double Dwarf Mixed Hybrids. Exquisite semi double dahlias in a varied assortment of colors. Early flowering. Bushy plants 1½ to 2 ft. tall. (Pkt. 15c) (¼ oz. 35c) (½ oz. 55c).

DAISIES

- 230A—African (Dimorphotheca). Is a rare and very showy annual from South Africa. Has daisylike flowers of orange, salmon and white with black central ring on 12 in. plants. Mixed. (King Size Pkt. 10c) (¼ oz. 45c).

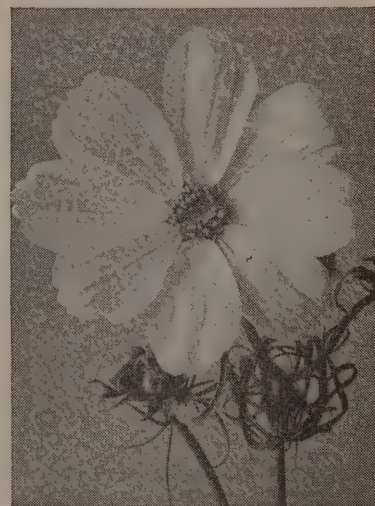

- 231A—Swan River (Brachycome). Free-flowering dwarf annuals covered during the greater part of summer with a profusion of pretty many-colored flowers. Suitable for edgings. 9 inches. Mixed. (King Size Pkt. 10c) (¼ oz. 40c).

- 232A—Blue Eye Daisy, (Arctotis). Bears profusion of 3-inch daisy-like flowers with silvery lilac petals and mauve centers. Foliage gray-green, fine for cutting. Does well in sunny location. (King Size Pkt. 10c) (¼ oz. 30c).

PAINTED DAISY. See Chrysanthemum, No. 208A.

DATURA (Angel's Trumpet)

- 234A—An annual very easily grown from seed. Requires very little water. Produces large bushes filled with large white trumpet-shaped flowers. Mixed. (Pkt. 10c) (½ oz. 25c).

COSMOS, SENSATION PINKIE

DUSTY MILLER (Centurea)

235A—Candidissima. 10 inches. Thick, broadly cut, silvery white leaves. (Pkt. 20c) (1/4 oz. 35c).

236A—Gymnocarpa. Finely divided silver-white leaves of a wooly texture. Attractive for borders and beddings. 15 inches. (Pkt. 15c) (1/4 oz. 25c).

EVERLASTING FLOWERS

The following may be used freshly picked or may be dried and used for winter bouquets: *Acroclinium*, *Cockscomb*, *Gypsophila*, *Honesty*, *Helichrysum*, *Statice*, *Globe Amaranth*. See pages 25, 28, 39.

FEVERFEW (Matricaria)

238A—Balls Double White. Pretty and neat. Small, double white flowers, being hardy annual, growing 2 feet. (King Size Pkt. 15c) (1/4 oz. 50c).

FORGET-ME-NOT MYOSOTIS, VICTORIA

Plants very dwarf, compact, large flowered.

240A—Azure Blue.

241A—White.

242A—Rose.

Any above (Pkt. 15c) (1/4 oz. 40c) (oz. \$2.25).

FORGET-ME-NOT, CHINESE (Cynoglossum).

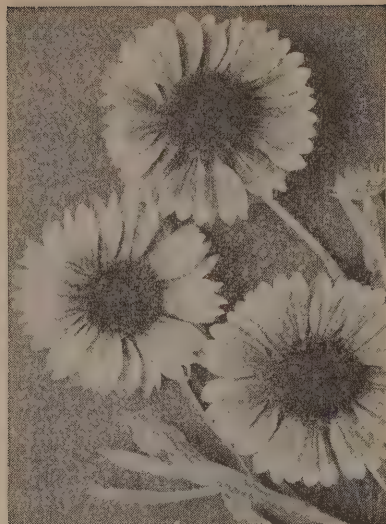

An easily grown hardy annual of brisky habits. Bears throughout the summer graceful sprays of Forget-Me-Not like flowers. Recommended for beds and borders.

244A—Firmament. Plants bushy, dwarf; flowers sweet scented, violet blue. (Pkt. 10c) (1/4 oz. 20c).

FOUR O'CLOCK (Marvel of Peru)

An easily grown thrifty annual. Plants 2 feet tall with spreading branches; requires plenty of room; bears profusion of red, yellow, pink, lilac, white and variegated flowers which fully open about 4 o'clock in the afternoon.

245A—Mixed Colors. (Pkt. 12c) (1/4 oz. 25c).

GAILLARDIA

GAILLARDIA PICTA

Sow in April or May. Provide a continued show of bright flowers from early summer until frost. Hardy varieties, see Perennial list.

247A—Lorenziana Double Mixed. Continuous bloom. Orange, yellow, red and rose ball flowers. Plants 1 1/2 feet. (Pkt. 10c) (1/4 oz. 30c).

248A—Indian Chief. Copper red flowers with bronze center. (Pkt. 10c) (1/4 oz. 30c). Gaillardia Perennial—See Page 39.

GLOBE AMARANTH (Gomphrena)

Everlasting. Produces small, very showy, globe-shaped flowers in rose, ruby, violet, white and flesh colors. When about half-bloom, flowers can be cut, hung up to dry. Will hold their colors all winter.

249A—Finest Mixed. (Pkt. 10c) (1/4 oz. 25c).

GODETIA (Satin Flower)

Attractive bushy plant with masses of large colorful blooms throughout the summer and fall. Thrives best in cool moist soil and half shady location.

251A—Grandiflora. Double mixed 18 in. tall, gladiolus like flowers in long trusses, excellent for cutting. (King Size Pkt. 15c) (1/4 oz. 35c).

HELICHRYSUM

(Giant Strawflowers)

Beautiful in the garden. Excellent for cut flowers which are double, 2 1/2 inches across, are freely borne on strong, upright plants from midsummer until fall. 2 to 2 1/2 feet. Also grown for winter bouquets. If wanted for winter use, cut when partially open. Remove foliage, bunch loosely, and hang with the heads downward in a cool, dry, shady place until dry.

257A—Finest Double Mixed. (Pkt. 12c) (1/4 oz. 30c).

HELIOTROPE

These well known greenhouse and bedding favorites are highly valued for their sweet scented flowers.

258A — Mammoth Flowering Hybrid Mixed. (Pkt. 15c) (1/4 oz. 45c).

HOLLYHOCKS (Annual)

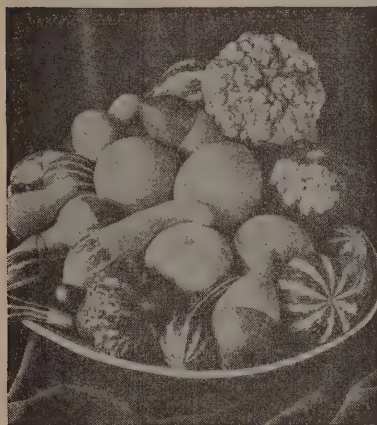

Blooms first year and lasts several years; grows 4 feet tall, stalks covered with a continuous profusion of single and semi-double crinkly-edged blooms. Easy to grow.

Description and price see top next page.

HOLLYHOCKS, PERENNIAL, see page 39

HELICHRYSUM
(Giant Straw Flowers)

GOURDS, FINEST MIXED

GOURDS (Ornamental)

Climber. Quick growing vines; excellent for covering arbors, walls and waste places. Gourds grow in curious shapes and are used for house ornaments.

253A—Finest Mixed Large Varieties. (Pkt. 10c) (2 pkts. 15c) (oz. 20c).

256A—Finest Mixed Small Varieties. (Pkt. 10c) (2 pkts. 15c) (oz. 20c).

HOLLYHOCK, INDIAN SPRING
Seed treated for sturdy growth.

HOLLYHOCKS

260A—Indian Spring Everblooming. Beautiful semi-double flowers in shades of pink.

261A—Everblooming Allegheny. Single and double mixed.

Price on above: (Pkt. 12c) (1/4 oz. 30c).

HYACINTH BEAN (Dolichos)

A fine climber with spikes of purple and white pea-like flowers.

270A—Mixed Colors.

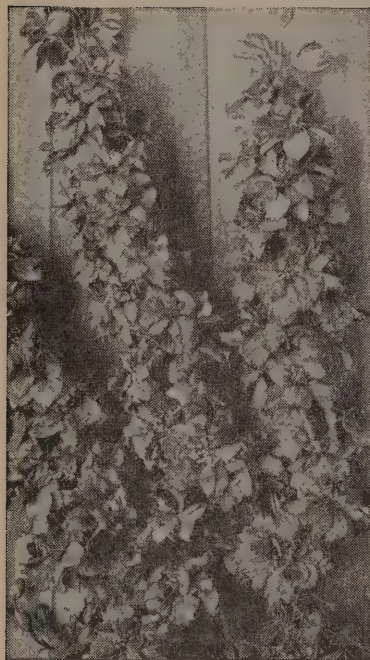

(Pkt. 10c) (1/2 oz. 25c).

IPOMEA (See Morning Glory)

JAPANESE HOP (Humulus)

272A—There is no hardier vine than this. Resists drought and insects will not bother it. It is a rapid climber and one of the best for covering fences, trellises.

(Pkt. 10c) (1/4 oz. 20c).

LARKSPUR, REGAL SUPREME

LOBELIA EMPEROR WILLIAMS

KOCHIA (Childs)

LARKSPUR

These free-blooming annuals are very quick growers. Produce beautiful flowers, borne on long, stately spikes. Very effective in beds or masses and furnish fine cutting material. Height, 3 to 4 feet. Since the seed requires cool conditions for germination, sow it just as early as possible.

Regal Supreme. This new Larkspur produces vigorous base branching plants with unusually long stems and large double florets placed close together. The plants produce bloom throughout most of the summer and the petals do not easily shatter as in older types. Colors are especially clear and bright. 3 feet.

280A—Regal Dark Blue. Rich deep blue.

281A—Regal Pink. Pink on salmon.

282A—Regal Lilac. Soft lavender blue.

283A—Regal Rose. Bright clear rose.

284A—Regal White. Large white.

285A—Regal Mixed. All color balanced blend.

Any one of above (King Size Pkt. 15c) (1/4 oz. 50c).

Giant Imperial. Flowers double, and carried continuously on stems 3 feet tall, which branch from the base of the plant. Upright and compact.

288A—Giant Imperial. Mixed or straight colors of Blue, Carmine, Lilac, Rose and White.

(Pkt. 15c) (1/4 oz. 40c).

LARKSPUR GIANT IMPERIAL

LINUM

290A—Scarlet Flax. Brilliantly colored summer annual, grows 14 inches high. Flowers rich crimson. (King Size Pkt. 12c) (1/4 oz. 20c).

BLUE FLAX—see Perennials, page 39.

LOBELIA

Easily grown, covered with flowers throughout the season, fine for borders and rock gardens.

291A—Crystal Palace Compacta. Superior strain. Grows 3 to 4 inches in height; leaves and stems dark. Plants a mass of deep blue flowers. (Pkt. 15c) (1/8 oz. 35c).

292A—Emperor William. 4 inches tall, light foliage, gentian blue flower. (Pkt. 15c) (1/8 oz. 35c).

293A—Hamburga. Flowers pale blue. Trailing habit excellent for hanging baskets. (Pkt. 15c) (1/8 oz. 40c).

LUPINS HARTWEGI

Easily grown, sow seed in April in partial shade, thin out 10 inches.

295A—Giant King Hybrids Mixed. 3 1/2 feet tall, produces 4 to 5 long erect spikes with large dark blue, sky blue, rose and white flowers. (King Size Pkt. 10c) (1/2 oz. 25c).

Russell Lupins—See Perennials, page 39.

JOB'S TEARS (Coix)

273A—Ornamental grass. Slate colored seeds used for beads. Valuable for winter bouquets.

(Pkt. 10c) (1/4 oz. 20c).

KOCHIA

(Burning Bush)

Resembles a small closely clipped ornamental evergreen. The pyramidal bushes are compact, dense and of green color, but in late autumn the whole bush becomes blood-red. Suitable for hedges, backgrounds, or may be grown singly.

276—CHILDSI. New strain of Burning Bush 2 to 2 1/2 feet tall. Does not turn red with the first light frost. (King Size Pkt. 10c) (1/2 oz. 35c).

MARIGOLDS

Easily grown annual; sow soon as ground is warm, in sunny location, avoid overcrowding; fine for cutting. The odor which is objectionable to some comes from the leaves, not the blossoms. If allowed to stand overnight in water, odor will disappear, however, a number of varieties are odorless.

LARGE CHRYSANTHEMUM FLOWERED AFRICAN

- 297A—Mammoth Mum. The true mum, ball-like, fluffy, light yellow blooms are $3\frac{1}{2}$ in. borne on long stems. Plants upright, 30 inches. (Pkt. 15c) ($\frac{1}{4}$ oz. 35c).
- 298A—Glitters. All America Winner. Large, $3\frac{1}{2}$ to 4 inches, bright clear yellow, double Chrysanthemum flowers with long cutting stems. Plants erect, $2\frac{1}{2}$ feet. Earlier and dwarfer than Mammoth Mums. Blooms continuously early summer until frost. (Pkt. 15c) ($\frac{1}{4}$ oz. 40c).
- 301A—Colorado Sunshine. Odorless. 20 inches tall. Bright canary yellow. Flowers large fully double, ruffled and fringed. An excellent variety. (Pkt. 15c) ($\frac{1}{4}$ oz. 50c).
- 302A—Guinea Gold. Early, 25 inches tall. Odorless foliage. Flowers larger than Burpee Gold. Bright orange flushed with gold. (Pkt. 10c) ($\frac{1}{4}$ oz. 40c).
- 303A—Burpee Gold. Plants odorless, $2\frac{1}{2}$ feet. Flowers $3\frac{1}{2}$ inches, bright orange, (Pkt. 10c) ($\frac{1}{4}$ oz. 35c).
- 296—Sunset Giants Mixed. Flowers come in shades of orange and yellow. 80 % extra large and double. Plants $3\frac{1}{2}$ ft. tall. (Pkt. 15c) ($\frac{1}{4}$ oz. 35c).
- 304A—Chrysanthemum Double Mixed. Large globular flowers of compact quilled petals, orange and yellow. Height $2\frac{1}{2}$ ft. (Pkt. 10c) ($\frac{1}{4}$ oz. 25c).

MARIGOLD, GLITTERS

MEDIUM AND SMALL FLOWERED MARIGOLDS

- 305A—Lemondrop. A trim, miniature, compact plant; grows about 9 inches tall. Early and a profuse bloomer. The blooms are $1\frac{1}{2}$ to $1\frac{3}{4}$ inches across, of pleasing canary yellow. Ideal for borders and display beds. (Pkt. 15c) ($\frac{1}{4}$ oz. 40c).
- 307A—Rusty Red. Outstanding for earliness and color. Plants 15 in., ball shaped, covered with sparkling reddish brown, giant double flowers from June till frost. (Pkt. 15c) ($\frac{1}{4}$ oz. 40c).
- 308A—Cupid. 9 inches, bushy and compact; covered with Chrysanthemum-like, golden yellow, 2 inch flowers. Foliage free from Marigold odor. Excellent for bedding and borders. (Pkt. 20c) ($\frac{1}{8}$ oz. 40c).
- 309A—Tangerine. New. Bright Tangerine Orange. Double 2 inch flowers completely covering bushy 14 inch plants. (Pkt. 15c) ($\frac{1}{4}$ oz. 40c).
- 316A—French Double Dwarf Mixed. Early flowering plants 1 foot, uniform and bushy, blooms range in color from lemon, yellow, deep orange to maroon-brown. (Pkt. 10c) ($\frac{1}{4}$ oz. 25c).

MARIGOLD, HARMONY

- 310A—Harmony or Orange Crown. Excellent bedding and cut flower variety; plants dwarf, compact, flowers golden yellow, border maroon red. Best Marigold to grow in semi-shade. (Pkt. 10c) ($\frac{1}{4}$ oz. 15c) ($\frac{1}{2}$ oz. 30c).

FREE OFFER
See Page 1

MESEMBRYANTHEMUM

- 319A—Livingston Daisy. A beautiful annual that will grow in crevices or old walls. Thrives in poor and sandy soils. Of spreading habit, covered with many colored daisy-like flowers. (Pkt. 10c) ($\frac{1}{4}$ oz. 35c).

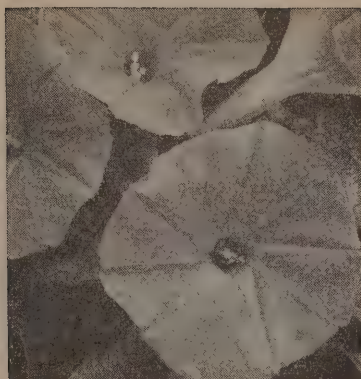

MIGNONETTE

A well known favorite annual in all gardens. Cultivated for its fragrant flowers, which come quickly. Set in compact spikes. Sow in early spring.

- 320A—Giant Machet. Extra select sweet scented Mignonette of dwarf habit and heavy broad spikes. (Pkt. 12c) ($\frac{1}{4}$ oz. 30c).
- 321A—Giant Red Rubin. Large flowering deepest red. (Pkt. 12c) ($\frac{1}{4}$ oz. 35c).

MIGNONETTE, GIANT MACHET

MORNING GLORY, CLARKE'S BLUE

MORNING GLORY (Ipomea)

Easily grown. Soil should not be very rich. Plant outdoors when ground is warm. Soaking seed in warm water overnight hastens germination. For earlier blooms start seed indoors in early April and set in garden when frost danger is past.

325A—Clarke's Early Flowering Heavenly Blue. The finest of all morning glories; the earliest flowering variety; flowers measure $3\frac{1}{2}$ to 4 inches across deep sky blue; shading light golden yellow in throats. Vines grow 15 feet tall and covered with blooms from early summer until frost. (Pkt. 12c) ($\frac{1}{4}$ oz. 20c) (oz. 40c).

326A—Scarlet O'Hara. Rapid climber. Flowers beautiful, rich wine red of good size. Gold Medal All-American. (Pkt. 10c) ($\frac{1}{4}$ oz. 25c).

327A—Crimson Rambler. A strong climber; has ruby red flowers with white throat. (Pkt. 12c) ($\frac{1}{4}$ oz. 20c) (oz. 40c).

328A—Cornell. The early large bright carnelian red flowers edged pure white. Vigorous grower. (Pkt. 12c) ($\frac{1}{2}$ oz. 30c).

329A — Tall Mixed. Rapid grower. Flowers are bell-shaped, of many bright colors. (Pkt. 10c) ($\frac{1}{2}$ oz. 15c) (oz. 25c).

330A—Royal Ensign (Bush). Plants 1 foot, covered with small deep, bright, ultra-marine blue morning glory flowers with a white halo and gold throat. (Pkt. 12c) ($\frac{1}{2}$ oz. 30c).

331A — Dwarf Mixed Bush Morning Glory. Grows 1 foot tall, bears small trumpet flowers which stay open all day. For beds, borders and rock gardens. (Pkt. 10c) ($\frac{1}{2}$ oz. 20c).

PANSY, ENGLEMAN'S GIANTS

MOURNING BRIDE (Scabiosa)

They commence to bloom early in July, continuing until frost. The flowers are borne on long stems and last a long time when cut. Fine for beds or borders, growing two feet in height.

334A—Blue Moon. The large full double blooms are a beautiful deep lavender blue, are borne on long stems highly recommended for cutting. (Pkt. 12c) ($\frac{1}{4}$ oz. 30c).

335A—Giant Double Mixed. This mixture is composed of the new giant varieties. Have very large flowers in an unusual number of pleasing colors. (Pkt. 10c) ($\frac{1}{4}$ oz. 25c).

NASTURTIUM

Of easy culture. Ordinary soil is best as over-rich will cause plants to produce more leaves than flowers. Sow outside late April.

TRAILING AND TALL VARIETIES

338A — Golden Gleam Double (Semi-trailing). Large fragrant, golden yellow flowers borne above the foliage. (Pkt. 10c) ($\frac{1}{2}$ oz. 15c) (1 oz. 25c).

339A — Scarlet Gleam Double (Semi-trailing). Flowers brilliant scarlet, sweet scented. (Pkt. 10c) ($\frac{1}{2}$ oz. 15c) (1 oz. 25c).

340A — Gleam Hybrids Mixed Double (Semi-trailing). Beautiful shades and combinations of cream, white, yellow, orange, red, mahogany, cerise, crimson. (Pkt. 10c) ($\frac{1}{2}$ oz. 15c) (1 oz. 25c).

342A—Single Tall Varieties Mixed. Used for trailing over fences, trellis, etc. Wide variety of colors. Valuable for cutting. (Pkt. 10c) ($\frac{1}{2}$ oz. 15c) (1 oz. 25c).

BUSH VARIETIES

Plants 1 ft. high, globular in form.

344A—Golden Globe Double. Same as Golden Gleam except plants bushy, globe shaped; heavy bloomer. (Pkt. 10c) ($\frac{1}{2}$ oz. 15c) (1 oz. 25c).

345A — Fire Globe Double. Flowers flaming red with dark green leaves. Plants compact, globe. (Pkt. 10c) ($\frac{1}{2}$ oz. 15c) (1 oz. 25c).

346A—Double Globe Mixed. Contains yellow, red, primrose, mahogany, scarlet varieties. (Pkt. 10c) ($\frac{1}{2}$ oz. 15c) (1 oz. 25c).

NASTURTIUM, GOLDEN GLEAM

347A—Single Bush Nasturtium Mixed. Contains yellow, red primrose; plants 1 ft. high; attractive foliage; variety of blooms. (Pkt. 10c) ($\frac{1}{2}$ oz. 15c) (1 oz. 25c).

NICOTIANA (Flowering Tobacco)

A free-flowering annual, blossoms resemble the petunia, and emit a very powerful perfume. As soon as soil is warm, sow in open; easily grown.

349A—Crimson Bedder. Dwarf, compact; 16 inches tall covered with rich crimson petunia like blooms. (Pkt. 10c) ($\frac{1}{4}$ oz. 30c).

350A—Daylight (Hybrids Mixed). Plants bushy, 18 inches. Wide color range. Remain open even during brightest day. (Pkt. 12c) ($\frac{1}{4}$ oz. 35c).

NIGELLA

Easy to grow; quick to bloom; very desirable annual for many purposes, especially graceful as cut flowers. Blooms early and long.

352A—Miss Jekyl (Love in a mist.) Double, sky blue. (Pkt. 10c) ($\frac{1}{4}$ oz. 20c).

353A—Double Sorts Mixed. Contains white and shades of blue. (Pkt. 10c) ($\frac{1}{4}$ oz. 20c).

PANSIES

One of the most popular flowers and easily grown. Best adapted to partly moist and somewhat shaded places. For large blooms, rich soil is best. Seed sown in spring will blossom in midsummer. For early spring flowers, sow seed in August and protect plants in cold frames or with light litter but do not smother during winter.

390A—Westland Giants. Largest flowering strain of Pansy in existence, in beautiful color variation and of compact growth. The best strain for Market Growers. (Pkt. 20c) ($\frac{1}{4}$ oz. 65c) ($\frac{1}{2}$ oz. \$2.50).

391A—Maple Leaf Canadian Giants. Mixed. Plants of this lovely variety are vigorous, low growing; leaves giant size and flowers up to 4 inches diameter. (Pkt. 15c) ($\frac{1}{4}$ oz. 65c) ($\frac{1}{2}$ oz. \$2.25).

397A—Swiss Giants, Mixed. Outstanding for size of perfectly round flowers and full range of colors. (Pkt. 25c) ($\frac{1}{4}$ oz. 85c) (1 oz. \$3.00).

398A—Giller's Super Giants Mixed. Highly recommended for florists and those who make a specialty of growing plants and blooms for commercial trade. Blooms are amazing in size as well as in the large range of colors. (Pkt. 25c) ($\frac{1}{4}$ oz. \$1.25) ($\frac{1}{2}$ oz. \$4.50) (1 oz. \$8.50).

399A—Engelman's Giants. Very vigorous growing, compact and early flowering, produces huge flowers in a great variety of shades and colors with good percentage of red and bronze shades. (Pkt. 15c) ($\frac{1}{4}$ oz. 50c) ($\frac{1}{2}$ oz. \$1.75).

400A—Ice Pansy. (Hiemalis). Early giant flowers, withstands cold, continues to bloom well in to the winter, all colors mixed. (Pkt. 15c) ($\frac{1}{4}$ oz. 40c).

401A—American Beauty or Peter Pan Mixed. An extra fine, well-balanced mixture of most beautiful colors and markings. (Pkt. 15c) ($\frac{1}{4}$ oz. 45c).

TUFTED PANSY, see Viola Cornuta, page 36.

PETUNIA

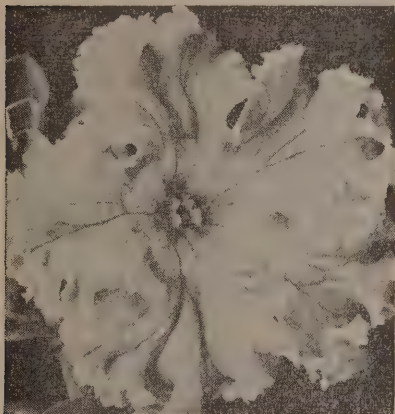

CULTURE: There is no flower more highly prized for use in beds, massing, borders, window-boxes, baskets and vases. Succeeds in almost any soil and produces very frequent blooms the entire season. Sow thinly in early spring when soil has become warm or for earlier blooms start seeds indoors in pots or shallow boxes of fine soil. Cover seeds very lightly, never more than 4 times diameter of seed.

X—MAYTIME (All America for 1958). Plant very uniform, 12 inches high, compact and spreading. Bears abundance of flowers $3\frac{1}{2}$ to 4 inches in diameter. Color clear light salmon pink.

X—FIRE DANCE—F-1 (All America for 1956). Plant uniformly dwarf 12 to 15 in. with a spread of 24 inches, and covered with $3\frac{1}{2}$ to 4 in. brilliant Salmon-Scarlet, deeply fringed with golden throat flowers.

X—PRIMA DONNA (All-America F-1). Plants grow to 15 in. high and 2 ft. wide, covered all summer with $3\frac{1}{2}$ to 4 in. brilliant salmon-scarlet, deeply fringed flowers.

X—BALLERINA. All-America Selection. Blooms soft, glowing scarlet salmon, large, single fringed which almost cover the plant, $3\frac{1}{2}$ inches across. Plants dwarf and compact, 12 inches high, 30 inches across. Vigorous grower.

PRIMA DONNA

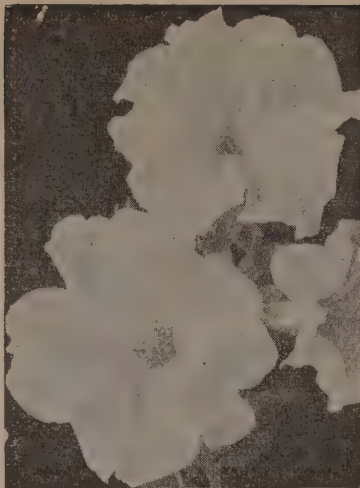

X—CRUSADER—Plants bushy, 15 in. tall. Flowers large, bicolor, heavily ruffled, almost white, with very light rose shading stripes extending from the throat to the edge of the bloom.

X—TANGO. Plants uniformly dwarf. Base branching. Flowers 4 inches; bright, deep scarlet salmon; deeply fringed.

PRICES—Any of the above: Pkt. 150 seeds 50c; $\frac{1}{128}$ oz., 2100 seeds, \$4.50.

X—COMANCHE. New All-America Selection. The deepest red Petunia, plants are base-branching, semi-compact, 15 inches high, 18 inches spread. Covered with a profusion of $2\frac{1}{2}$ to 2 $\frac{3}{4}$ inch scarlet-red flowers over a long period. (Pkt. 150 seeds 50c) ($\frac{1}{128}$ oz. 2100 seeds \$3.50).

X—SNOWSTORM FRINGED. One of the finest white petunias. A compact grower, covered with glistening 4-inch snow white fringed flowers with shaded yellow throat. (Pkt. 150 seeds 35c). ($\frac{1}{64}$ oz. \$1.20) ($\frac{1}{32}$ oz. \$2.00).

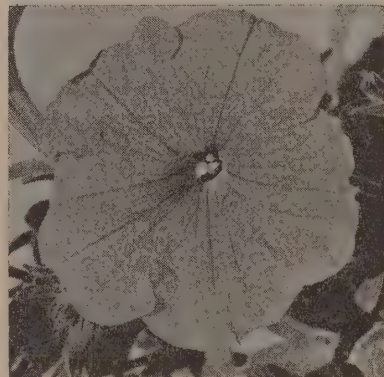

PETUNIA, POPCORN

X—POPCORN. The best white plain edged petunia plant is dwarf, compact and very uniform. Bears a profusion of early giant pure white waved flowers. (Pkt. 50c) ($\frac{1}{64}$ oz. \$1.80) ($\frac{1}{32}$ oz. \$2.80).

X—PETUNIA, SABRE DANCE. The only F1 Grandiflora in this striking color. Plants dwarf, compact, covered with beautiful huge, bright crimson $4\frac{1}{2}$ inch flowers with large white star pattern. (Pkt. 150 seeds 50c) ($\frac{1}{128}$ oz. 2100 seeds \$3.50).

X—PETUNIA, BLUE BELL—F1 Hybrid, Best Blue. Grandiflora, medium, violet blue. Plants vigorous, dwarf, compact, heavy bloomer. Weather resistant. (Pkt. 150 seeds 50c) ($\frac{1}{128}$ oz. 2100 seeds \$3.50).

385X—FLUFFY RUFFLES (Giant Single Fringed). Flowers large and so ruffled and frilled they have the appearance of being double. An excellent mixture of all colors and shades. Grows 14 to 16 inches, covered with blooms. (Pkt. 35c) ($\frac{1}{64}$ oz. \$1.25).

PETUNIA, COMANCHE

X—GIANT DOUBLE, Finest All Double. Many flowers measure 5 inches across, full double and fringed with the widest range of distinct colors. Carmine, Rose, Pink, Orchid, Violet, White, Purple, Salmon, variegated, etc., on extra dwarf bushy plants. Mixed (Pkt. 100 seeds 75c) ($\frac{1}{128}$ oz. 1800 seeds, \$6.00).

SINGLE DWARF GRANDIFLORA

Much used in beds or masses as it grows erect and bushy, 12 to 15 inches high. Blooms freely; flowers are large and showy.

372A—LIPSTICK. Glowing carmine rose overlaid with a touch of salmon. Compact plants with a wealth of $2\frac{1}{2}$ -inch flowers. (Pkt. 25c) ($\frac{1}{8}$ oz. 95c).

378A—ELK'S PRIDE, DWARF. Deep velvety purple; grows 10 inches; heavy bloomer. (Pkt. 25c) ($\frac{1}{64}$ oz. 85c).

376A—FIRE CHIEF. Dwarf compact plant. Flowers single, intense scarlet red. (Pkt. 20c) ($\frac{1}{8}$ oz. 70c).

386X — GIANTS OF CALIFORNIA, FRINGED. Dwarf sturdy plants. A super blend of brightest colors. Flowers often 5 inches across. (Pkt. 40c) ($\frac{1}{64}$ oz. \$1.35).

PETUNIA, CELESTIAL ROSE

370A—Celestial Rose. Plants bushy, low growing. Covered with an abundance of bright rose flowers.

368A—Blue Bedder. Heavenly blue. Plants dwarf compact.

369A—Rose of Heaven. Rose with lighter throat. We prefer Celestial Rose.

373A—Snow-Ball Improved. Uniform compact plants covered with pure white flowers.

363A—Radiance. Soft cerise rose with underlying salmon, golden yellow throat, large-flowered.

360A—Howard Star. Reddish purple with white star.

367A—Special Dwarf Mixed. Is made by blending together only the best distinct varieties and colors.

Any of the above six varieties (Pkt. 15c) ($\frac{1}{8}$ oz. 40c).

SEMI TALL (Single). A branching variety, 16 to 24 inches high. Flowers large single, with plain edges. Recommended for background, porch boxes, etc.

380A—Mixed. (Pkt. 10c) ($\frac{1}{4}$ oz. 30c).

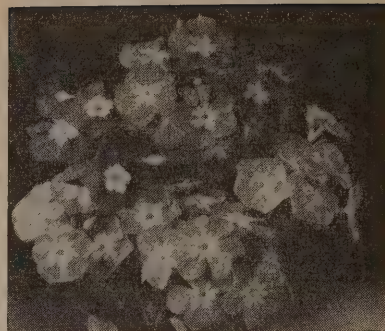

PHLOX (Drummondii Annual)

Being one of the prettiest annuals, phlox should occupy a prominent place in every garden. Of easy cultivation and remarkable for profusion of bloom, which starts early and continues until frost. The rich and numerous brilliant colors produce an elegant effect in beds or borders. Fine for cutting. Sow seed outdoors. Do not transplant.

402A—Drummondii Semi Tall. Finest mixed. Plants 15 inches tall, large clusters of beautiful blooms of many colors, shades and markings. (King Size Pkt. 15c) (1/4 oz. 40c).

403A—Drummondii, Nana Compacta. A very beautiful bedding and border variety. Flower heads large and compact. (King Size Pkt. 20c) (1/4 oz. 55c).

405A—Sta. Phlox. Extra fine mixed. Grows 15 inches, bears star flowers of wide range of colors. (King Size Pkt. 15c) (1/4 oz. 45c).

PHLOX, DRUMMONDII

PINKS, GARDEN (Dianthus)

This satisfactory old-fashioned flower blooms in profusion all summer long. They bear marvelous, brilliant, and contrasting flowers, which are emphasized by stripes and dots. Sow seed in open in April, will bloom in July until late fall.

406A—Chinensis Double (China Pink). Produces profusion of handsome blooms in clusters on strong stems, flowers extra double of many colors and markings. (Pkt. 10c) (1/4 oz. 30c)

407A—Gaiety Single Mixed. Beautiful color-range of large, finely-fringed, single zoned lacy flowers. (Pkt. 10c) (1/4 oz. 35c).

408A—Gaiety Double Mixed. Fringed and laciniated carnation-like flowers in wide range of colors. Plants semi-dwarf and compact. Very satisfactory Annual. (Pkt. 15c) (1/4 oz. 35c).

POPPIES

This is a quick, easily grown flower; blooms few weeks from seed; sow early in open and later thin to 8 inches apart; will not transplant.

409A—American Legion. Brilliant orange scarlet with yellow anthers. (Pkt. 10c) (1/4 oz. 20c).

410A—Single Shirley. Beautiful satin flowers with crumpled petals on long stems. Large range of colors. (Pkt. 10c) (1/4 oz. 20c).

412A—Peony Flowered Mixed. The flowers resemble the double tuberous rooted Begonias in form, and contain an assortment of lovely light shades. (Pkt. 15c) (1/4 oz. 25c).

CALIFORNIA POPPY. Eschscholtzia, see page 27
Also see Perennial Poppies, page 39

PYRETHRUM

417A—Aureum (Golden Feather). Beautiful dwarf gold-leaved plant, flowers white with gold centers. Fine for borders. Easily grown. (Pkt. 10c) (1/2 oz. 25c).

SALPIGLOSSIS

(VELVET FLOWER)

Very easily grown. 14 inches high. Flowers showy, large, funnel-shaped, mottled, veined and self-colored. Requires good soil. Blooms early.

419A—Emperor Grandiflora Mixed. Extra large flowers of wide range of colors. (Pkt. 15c) (1/4 oz. 35c).

SALVIA (Scarlet Sage)

A hardy annual blooming the first year from seed. Well-known bedding plants with long, striking flower spikes, displayed with striking effect against the deep, green foliage.

420A—Bonfire. Early flowering, popular sort. Plants 16 to 24 inches long, scarlet spikes. (Pkt. 15c) (1/8 oz. 30c).

421A—St. Johns Fire. The earliest Salvia. Plants oval, erect, dwarf, 12 inches, bears uniform long scarlet spikes. (Pkt. 25c) (1/8 oz. 85c).

SCABIOSA. See Mourning Bride, page 32.

SCARLET RUNNER BEAN

Rapid ornamental climber with bright scarlet blooms. Excellent for porches and trellis. Also used as food.

444A—(King Size Pkt. 10c) (1/2 lb. 60c) (1 lb. 90c).

PINKS GAIETY

PORTULACA (Moss Rose)

This little 6 inch annual is unexcelled for brilliancy among the flowers of low growth. Grows and blooms best in the hot sunlight or partial shade, sandy soil, requires very little water, carpeting the ground with a mat of foliage, which in the afternoon is hidden with gayest flowers. Sow seed in the open ground.

414A—Double Mixed Large Flowering. (Pkt. 15c) (1/4 oz. 45c).

415A—Single Mixed Large Glossy Cup Flowers. (Pkt. 10c) (1/4 oz. 30c).

PORTULACA

SALVIA, ST. JOHNS FIRE

SNAPDRAGONS (Antirrhinum)

Very satisfactory annual, easily grown in full or partial shade. Either start seed indoors or sow in open when ground is warm.

499A—PANORAMA F2 HYBRID MIXED. This new continuous blooming Snapdragon has delighted the plant grower and home gardeners. Plants are robust, healthy, 2½ ft. tall. Stems are long and sturdy, covered with very large flowers of at least 8 beautiful colors and shades. Easy to grow.

(Pkt. 25c) (¼ oz. \$1.25).

Majus Giant Flowering Rust Resistant. Produces numerous spikes and is base branching; excellent for bedding and cutting. 2½ feet tall.

448A—Alaska. White.

449A—Brilliant Rose. Rose pink.

450A—Yellow Giant. Clear yellow.

451A—Indian Summer. Copper scarlet.

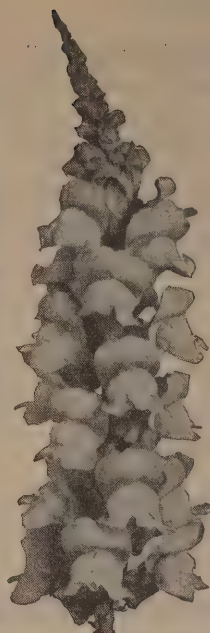

452A—Campfire. Bright scarlet.

453A—Finest Mixed.

All above seed treated. (Pkt. 12c) (¼ oz. 45c).

454A—Majus Naum Semi-Dwarf Large Flowered. Finest Mixed. Bushy, compact growth, 15 inches tall, very free bloomer, flowers large. Unusual colors and markings.

(Pkg. 10c) (¼ oz. 25c).

PANORAMA F2

STATICE (Sinuata)

An easily grown everlasting annual. They prefer a sunny situation. Very satisfactory as cut flowers, also for winter bouquets after being dried.

457A—MARKET GROWERS' BLUE. Deep blue, sturdy free bloomer. Makes fine cut flowers. Plants bushy, 22 in. tall.

458A—MARKET ROSE. Abundance of deep warm rose flowers on 18 in. sturdy plants.

459A—Bonduelli Superb (New). Large flower heads of deep yellow.

460A—Finest Mixed. Contains lavender, rose, blue, pink and white.

Prices on above Statice: (Pkt. 12c) (½ oz. 35c).

SWEET PEAS

Money Saving Sweet Pea Collections See Page 2

CULTURE: Sweet Peas like rather cool soil and can be grown in partial shade. Ground should be worked to a depth of 1 ft. Mix with soil 1 lb. Soiltone fertilizer to 5 ft. of row. Plant seed 1 oz. to 10 ft. in a trench 5 in. wide, 3 in. deep. Cover seed firmly with 1 in. pulverized soil. Plant any time from middle of March to 20th of April. After plants are 3 in. high, cultivate, scatter a little more fertilizer alongside of plants and fill trench with soil. After vines are 1 ft. high, give first dusting of 2 parts sulphur, 1 part Lindane, repeat in 10 to 20 days. Keep soil moist, flowers picked.

NEW-FLORABUNDA CUTHBERTSONS

Extremely vigorous, long stemmed and heat resistant. This florabunda possesses all the attributes of the regular Cuthbertson but under ordinary care will produce 5 or more per stem of better formed flowers.

49C—Ronnie. Deep orange.

50C—Connie. Chamois.

53C—Kenneth. Crimson.

54C—Lois. Rose pink.

55C—David. Bright rose crimson.

57C—Ruth. Rose carmine.

58C—Jimmy. Dazzling bright scarlet.

59C—Joy. Deep salmon pink.

60C—Hazel. Light blue.

61C—Tommy. Medium blue.

62C—Danny. Navy blue.

63C—Frank G. Rosy lavender.

64C—Daisy. Best white.

65C—Mixed. All colors.

Cuthbertson Straight Colors: (King Size pkts. 15c) (oz. 25c) (¼ lb. 80c) (1 lb. \$2.75) postpaid.

Cuthbertson Special Mixed: (Pkt. 10c) (oz. 20c) (¼ lb. 70c) (1 lb. \$2.30) postpaid.

CUTHBERTSON FLORABUNDA

EARLY MULTIFLORA

Plants extremely vigorous, producing very long stems that have 5 and 6 Florets of good sized flowers.

45M—Western Mixture. A complete blend of all colors. (Pkt. 20c) (oz. 35c) (¼ lb. \$1.10).

EARLY FLOWERING SPENCER

EARLY FLOWERING SPENCERS

Bear an abundance of large, waved flowers on long stems 2 to 3 weeks earlier than other varieties. Very satisfactory variety for June-July blooms.

BLUE

1E—Princess Blue. Belladonna Blue.
2E—Florist Blue. Bright clear Mid Blue.

CERISE

3E—Cavalcade. Golden Cerise.

CRIMSON

4E—Cranberry Red. Deep Red.
5E—Mars. Oxblood Crimson.

LAVENDER

6E—Orchid. Deep Lavender.

ORANGE

8E—Balls Orange. Improved Orange.

PINK and ROSE

10E—Beauty Rose. Rich Rose Pink.

WHITE

11E—Hope. Large White.

Straight Colors: (King Size Pkts. 15c) (½ oz. 20c) (oz. 30c) (¼ lb. \$1.10) (lb. \$3.75) postpaid.

MIXED COLORS

(Pkt. 10c) (½ oz. 15c) (1 oz. 20c) (¼ lb. 70c) (lb. \$2.10) postpaid.

EVERBEARING SWEET PEAS — See Lathyrus page 39.

STOCKS (Ten Weeks)

Desirable for cut flowers and bedding. To secure early flowers, start seed in window boxes or under glass in March or April, and transplant to the open ground in the middle of May. Do best in rich soil and in cool locations. Stocks never run entirely double.

465A—Double Early Giant Imperial or Bismarck. Exquisite, well-rounded, large fully double blooms on long stems. Valuable for garden and greenhouse forcing. 2 to 2½ ft. tall. (Pkt. 15c) (¼ oz. 35c).

467A—Non-Branching Double Excelsior (Column). Grows 2½ feet long spikes with large closely set flowers on strong stems. (Pkt. 15c) (¼ oz. 55c).

468A—Sweet Scented (Mattheola). 15 inch lilac flowers, which in the mornings, evenings and afternoons emit a delicious perfume. (Pkt. 10c) (¼ oz. 30c).

SUNFLOWER

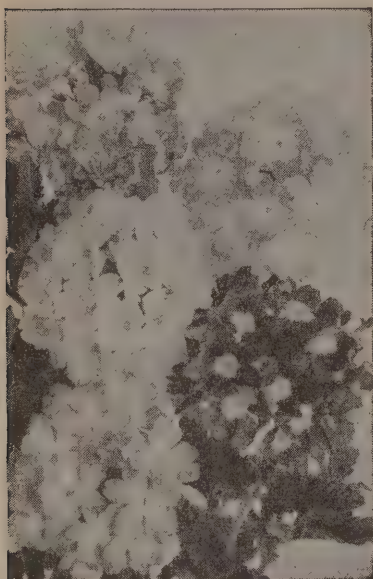

Thrives in any sunny location.

469A—Sun Gold. Fully double, golden yellow, Chrysanthemum-like flowers, 4 inches across; plants 4 feet. (Pkt. 12c) (½ oz. 35c).

SWEET SULTAN (Giant Imperialis Centaurea)

Very satisfactory for garden decoration and cutting. They bloom freely for many weeks during the summer in partly shaded places. The large, long stemmed, sweet-scented flowers are exquisitely fringed and most graceful in appearance.

470A—Mixed. Composed of purple, yellow, rose, lavender and amaranth red. (Pkt. 10c) (¼ oz. 20c) (oz. 50c).

VERBENA, Hybrid Mixed

STOCKS, DOUBLE BISMARCK

TITHONIA (Flower of the Incas)

472A—Torch. A new 1951 all American early 2½ feet tall, blooms from August till frost. Orange red, single dahlia-like flowers charming for cutting. (Pkt. 25c).

VERBENA HYBRID

Colorful dwarf varieties, ideal for edgings, ground cover, rockeries. Tall varieties fine for cut flowers. Flowers are borne in large trusses from midsummer until late fall. Plant in a sunny location.

VERBENA HYBRID DWARF COMPACT

474A—Sparkle. Dwarf, 9 inches compact. Large bright scarlet flowers with white eye.

475A—Spectrum Red. Dwarf, scarlet without eye.

476A—Violet Banquet. Dwarf, deep violet blue.

477A—White Bouquet. Dwarf, upright, pure white.

Any above (King Size Pkt. 15c) (¼ oz. 65c).

478A—Large Flower Dwarf Mixed. King Size (Pkt. 15c) (¼ oz. 50c).

VERBENA HYBRID GRANDIFLORA

483A—Gigantic Flowering Mixed. Brightest colors of all large flowering varieties. (King Size Pkt. 15c) (¼ oz. 50c).

VERBENA VENOSA

485A—Upright spreading plant 1 foot tall, covered with large panicles of purplish blue flowers from July to frost, largely used for bedding. (Pkt. 20c) (¼ oz. 40c).

VIOLA HYBRID (LARGE FLOWERING)

Bears large, fully rounded beautiful flowers of perfect form, on erect stems well above the foliage. Of the three strains of Violas this large flowering is the best and the most satisfactory. With some winter protection will thrive 2 or 3 years.

488A—Admiration. Deep violet blue in great profusion.

489A—Arkwright. Bright ruby crimson, shaded terracotta, robust habit.

490A—Blue Perfection. Light blue, robust.

491A—Chantreland. Apricot yellow, tinged orange.

492A—White Perfection (Snowdon). Large flowering creamy white.

493A—Yellow Gem. Bears an abundance of pure golden yellow flowers.

494A—Gold Seal Scotch Mixed. Contains all the large flowering colors.

Price on any above: (Pkt. 25c) (¼ oz. 60c) (¼ oz. \$1.00) (Oz. \$3.75).

WALLFLOWER (Annual)

498A—Early Paris Market. Flowers very fragrant of rich reds, browns and yellows. Plants 18 inches. Sow seed early spring indoors. Blooms quickly and profusely. In mild climate or when protected will bloom 2 years. (Pkt. 15c) (¼ oz. 35c)

VIOLA HYBRID, Mixed

ZINNIAS

Colorado Grown Seed King Size Packets All Postpaid

Few flowers are so easily grown, they require so little attention. They are heat-loving plants. Seed should not be sown until ground and atmosphere are warm to get most completely double flowers. Grow in a rich soil in a sunny spot. Water freely. They bloom abundantly and continuously throughout the entire season.

GIANT DAHLIA FLOWERED ZINNIAS

Grow 2 to 3 feet tall, strong, robust, bearing many large fully double flowers, often measuring 6 inches in diameter, with petals closely imbricated, resembling Show Dahlias.

505A—Canary Bird. Rich canary yellow.

506A—Will Rogers. Dazzling scarlet red. Flowers very large on long strong stems.

507A—Dream. Deep rosy lavender.

508A—Exquisite. Light rose, deep rose center.

510A—Luminosa. Deep rose.

511A—Oriole. Orange and gold.

512A—Polar Bear. Large creamy white.

513A—Royal Purple. Deep purple.

514A—Crimson Monarch. Crimson. Straight colors: (Pkt. 15c) (1/4 oz. 25c) (oz. 70c).

515A—Finest Mixed. (King size pkt. 10c) (1/4 oz. 25c) (oz. 70c).

Any 6 King Size Pkts. (69c) Postpaid.

LILLIPUT or POMPON ZINNIAS

Bears a continuous profusion of pleasing colorful small pompon flowers 1 1/2 inches in diameter on bushy 15 to 18 inch plants, from early summer until frost.

528A—Finest Mixed. (King Size Pkt. 15c) (1/4 oz. 25c) (oz. 40c).

GARDEN FLOWER MIXTURES

105A—SPECIAL CUT FLOWER MIXTURE. Produce a fine assortment of cut flowers over a long season. (King Size Pkt. 15c).

106A—ROCK GARDEN MIX. A fine mixture of plants for Rock Gardens. (King Size Pkt. 15c).

109A—ANNUAL CLIMBERS MIXED. A beautiful mixture of flowering climbers of rapid growth. (King Size Pkt. 15c) (1 Oz. 45c).

ALL FLOWER SEED POSTPAID

PEPPERMINT STICK

UNUSUAL VARIETIES ZINNIAS

500A—Peppermint Stick. An early variety, flowers medium size which are 70% uniquely striped in wide range of colors; produced in profusion until frost. (King size pkt. 15c) (1/4 oz. 30c) (oz. 75c).

502A—Ortho-Polka. Like the Peppermint Stick the flowers are 70% attractively striped in contrasting colors. Ortho-Polka blooms are twice the size, over 4 inches, giving a most interesting and startling effect. (Pkt. 25c) (1/4 oz. 75c).

501A—Blaze. Bears large cactus type brilliant mandarin-red flowers and, as the flowers attain size, change to fiery orange-scarlet. (Pkt. 25c) (1/4 oz. 50c). Postpaid.

503A—Giant Fantasy Hybrids. Immense, fluffy flowers in a gorgeous range of colors and color combinations with graceful, curved petals like those of a Giant Chrysanthemum. Entirely free of stiffness. Mixed Colors. (Pkt. 15c) (1/4 oz. 35c) (oz. 85c).

GIANT FANTASY HYBRIDS MIXED

GIANTS OF CALIFORNIA, Scarlet King

GIANTS OF CALIFORNIA ZINNIAS

Plants grow 3 to 4 feet tall, flowers very large, 5 to 6 inches across. The petals are more loosely placed than in the Dahlia Flowered type of zinnia and the flowers themselves are more flattened. Ideal for cutting.

518A—Crimson Queen. Rich crimson.

519A—Brightness. Bright pink.

520A—Daffodil. Canary yellow.

521A—Lavender Queen. Deep rosy lavender.

522A—Violet Queen. Deep purple.

523A—Purity. White. Best white in zinnias.

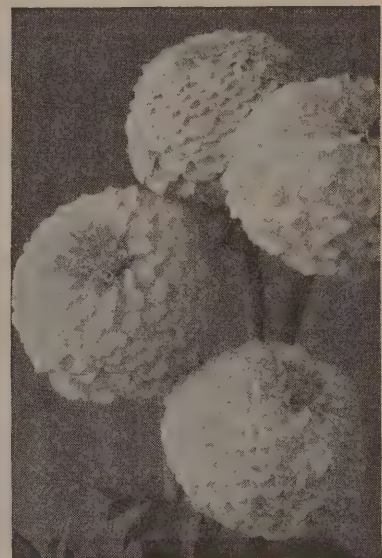

524A—Scarlet King. Glowing scarlet.

525A—Miss Willmott. Soft rose pink.

Straight colors: (Pkt. 15c) (1/4 oz. 25c) (oz. 70c).

526A—Finest Mixed. (King Size Pkt. 10c) (1/4 oz. 25c) (oz. 70c).

Any 6 King Size Pkts. (69c) Postpaid.

ZINNIA, LILLIPUT POMPON

PERENNIAL AND BIENNIAL FLOWER SEED

These produce plants which live from year to year and increase or multiply. A few exceptions are the biennials as *Myosotis*, *Bellis*, *Campanula*, *Foxglove*, which bloom second year and then usually die.

CULTURE. The seed is generally started outdoors from June to September and the young plants are either set in their permanent places in the fall and given light protection the first season, or carried over the first winter in a cold frame and set out the following spring.

1P—ACHILLEA (The Pearl). 2 feet. Clusters of hundreds of small, double, white *Chrysanthemum* like flowers from June to frost. (Pkt. 20c) (1/8 oz. 65c) (1/4 oz. \$1.25).

2P—ALYSSUM, Saxatile Compactum. Clusters of golden yellow. Plants spreading habit; silver gray foliage. Height 10 inches. (Pkt. 10c) (1/4 oz. 25c) (1 oz. 75c).

4P—ANCHUSA, Italica, Dropmore. Tall spikes of rich gentian-blue blooms from June to September, on 4 to 5-foot stately plants. (Pkt. 10c) (1/4 oz. 20c) (1 oz. 60c).

5P—ANCHUSA, Myosotidiflora. Sprays of clear blue Forget-me-not flowers on large round-leaved plants. Height 12 inches. For annual varieties see page 25. (Pkt. 20c) (1/8 oz. 60c) (1/2 oz. \$2.00).

7P—ANTHEMIS, Saneta Johannis. Bears profusion of bright orange flowers; excellent for cutting throughout summer; 2 foot plants, elegant foliage; will bloom first year if the seed is started indoors early. (Pkt. 15c) (1/4 oz. 40c).

AQUILEGIA. See Columbine.

AUBRIETIA. One of the daintiest and most beautiful dwarf creeping plants for carpeting beds or rock gardens.

9P—WHITEWELL GEM. Hardy, very early, low-spreading. Covered with violet blue flowers. Will last 10 years or more. (Pkt. 20c) (1/8 oz. 35c) (1/2 oz. \$1.25).

BELLIS. See English Daisy.

10P—CAMPANULA (Cup and Saucer—Canterbury Bells). Plants 2 1/2 feet, erect, bearing spikes of bell shaped flowers with dark blue, lilac, rose and white calyx as well as petals. **Finest Mixed.** (Pkt. 25c) (1/8 oz. 50c) (1/2 oz. \$1.75).

12P—CANDYTUFT. (Sempervirens). The beautiful, pure white flower-heads form a sheet of bloom completely covering the dark green foliage. Excellent for edging and for rock gardens. Height 10 inches. (Pkt. 15c) (1/8 oz. 40c) (1/2 oz. \$1.40).

14P—CARNATION. Teicher's Double Giant Flowered. Mixed. Plants very hardy, extra large double flowers, fine range of colors, large stems. Also see Annual Carnation, page 27. (Pkt. 20c) (1/8 oz. 60c) (1 oz. \$3.50).

15P—COLUMBINE, Rocky Mountain. Very beautiful perennial, native of Colorado. Color range from light to dark blue, cream centers. (Pkt. 15c) (1/8 oz. 35c) (1/2 oz. \$1.00).

16P—COLUMBINE, Mrs. Scott Elliott's Hybrids. A mixture of delightful shades including many soft pastel tones. Large flowers with broad guard petals and very long spurs are gracefully poised on long stems, on 3-foot plants. (Pkt. 20c) (1/8 oz. 60c) (1/2 oz. \$2.00).

17P—COLUMBINE, Double Finest Mixed. An extra selection of all finest long and new spurred varieties. (Pkt. 10c) (1/4 oz. 25c) (1 oz. 70c).

18P—COLUMBINE, Single Mixed. Beautiful combination of all single varieties of blue, red, pink, yellow, etc. (Pkt. 10c) (1/4 oz. 20c) (1 oz. 60c).

19P—COREOPSIS, Grandiflora Lanceolata. 2 feet. Large single golden yellow flowers with lanceolated petals; splendid for cutting. (Pkt. 10c) (1/4 oz. 15c) (1 oz. 40c).

20P—COREOPSIS, Sunburst Double. Early large golden yellow, double and semi-double flowers, on long stiff stems, fine for cutting. (Pkt. 10c) (1/4 oz. 30c).

21P—DAISY, Shasta (Chrysanthemum), Alaska. Extra large pure white flowers on long stiff stems. The best Shasta Daisy. (Pkt. 10c) (1/4 oz. 30c) (1 oz. 80c).

22P—DELPHINIUM, Belladonna Improved. Very free flowering. This extra-select strain comes in clear turquoise blue, on 4-foot plants. (Pkt. 15c) (1/8 oz. 30c) (1 oz. \$1.50).

23P—DELPHINIUM, Bellamosum Improved. Uniform in color with spikes 2 1/2 inches across. Each dark blue floret has a white bee. (Pkt. 15c) (1/8 oz. 30c) (1 oz. \$1.50).

25P—DELPHINIUM, Pacific Giants. Blue, lavender, violet shades mixed. A remarkable strain; flowers extremely large, borne on long spikes; plants 5 feet tall. (Pkt. 20c) (1/8 oz. 45c) (1 oz. \$2.75).

26P—DIGITALIS (Foxglove), Monstrosa Mixed. Extra large bell-shaped flowers; wide range of beautiful colors from white and shell-pink to deepest rose, many delightfully blotched or spotted with crimson and maroon. Grow about 6 ft. tall with flowering spikes often 3 ft. in length. These are biennials. So for continuous display sow every year. (Pkt. 15c) (1/4 oz. 25c) (1 oz. 80c).

DIANTHUS (Hardy Clove Pinks). Brilliant colored flowers, bloom all summer, fine for beds and borders.

28P—Single Mixed. Large fringe-edged flowers, many colors. (Pkt. 10c) (1/4 oz. 20c) (1 oz. 60c).

29P—Mayflower. Dwarf compact plants with fringed flowers in varied tints of pink and rose with deep zone, 10 in., early flowering. (Pkt. 10c) (1/4 oz. 40c) (1 oz. \$1.40).

ENGLISH DAISY, BELLIS (Biennial). Bright, colorful double flowers, popular for spring bedding plants. They succeed best in a medium moist soil, fail in dry soils and hot positions. Sow seed in August for bloom following spring. Set plants 4 to 6 inches apart and protect lightly over winter.

30P—SUPER ENORMA, GIANTS. New improved extra large-flowering strain. Ball-shaped fully double flowers measuring 2 1/2 to 3 inches across. 6 inches tall. Separate colors of crimson, pink, rose, white or mixed. (Pkt. 20c) (1/8 oz. 50c) (1 oz. \$3.00).

HOLLYHOCK
(Chater's Double)

35P—GAILLARDIA, Portola Hybrid. 2 feet. Large flowers, often 4 in. across, of bronze-red scarlet intensified by golden yellow petal tips. (Pkt. 10c) (1/4 oz. 30c) (1 oz. 70c).

37P—GYPSOPHILA. (Baby Breath), Paniculata Single. Tiny white single flowers on strong thread-like stems. Plants 3 feet; large bushy. (Pkt. 10c) (1/4 oz. 40c).

38P—GYPSOPHILA. (Baby Breath), Paniculata Double. Forms 2 1/2 ft. sphere-shaped bush plant; feathery pinnacles bearing starry, double, white flowers. (Pkt. 20c) (1/4 oz. 60c) (1/2 oz. \$1.00).

39P—GEUM, Mrs. Bradshaw. Flowers double orange red. 2 feet. Graceful, attractive flowers, June to September, for cutting and borders, on long stems. (Pkt. 15c) (1/4 oz. 50c).

PRIMULA (Primrose). A beautiful early Spring and late Fall free-flowering perennial. Prefer shade and rich moist soil. Plants 6 inches, covered with blooms. Wide color range and shades of soft yellow, orange, red, bronze and white. Best to start seed early indoors, slow to germinate.

40P—Veris Colossea Superb Mixed. This variety does best in this area (Pkt. 25c) (1/4 oz. \$1.00) (1/2 oz. \$3.25).

HOLLYHOCK. Are most striking when seen in groups or long rows against evergreen hedges, shrubbery, etc., and in their turn, form a very fine background for plants of lower growth. Seed sown in late spring or early summer will bloom profusely the next year.

42P—HOLLYHOCK (Chater's Extra Double Mixed). Tall spikes 7 feet high. Closely set with double showy flowers of beautiful colors. (Pkt. 15c) (1/4 oz. 50c) (1/2 oz. 90c).

43P—HOLLYHOCK, Single Mixed. (Pkt. 10c) (1/4 oz. 25c) (1/2 oz. 50c).

44P—HONESTY (Peter's Penny). Grown for the silver, paper-like, flattened, rounded seed pods, which, when dried, make very attractive winter decorations. Purple flowers. (Pkt. 10c) (1/4 oz. 40c).

46P—LATHYRUS (Everlasting Pea), Latifolius. Trailing plant suitable for arches, trellises or rough banks, bearing numerous large racemes of 8 to 10 pink, red and white pealike flowers. (Pkt. 15c) (1/4 oz. 30c) (1 oz. \$1.00).

47P—LINUM PERENNE (Blue Flax). 18 in. Has dainty sky-blue flowers on graceful, arching stems. Blooms produced continuously in profusion. For other varieties see Annual List. (Pkt. 10c) (1/4 oz. 25c) (1 oz. 60c).

LUPINES, RUSSELL

LINUM PERENNE

All Prices Postpaid

48P—LUPINES, Russell's (Special Mixed). Beautiful stately perennials with bold symmetrical, 3-ft. spikes of pea-shaped flowers, closely set from top to bottom. They like a warm, sheltered position. For annual varieties see page 30. (Pkt. 10c) (1/4 oz. 25c) (1 oz. 60c).

PINKS. See Dianthus.

PENTSTEMON. Sensation. Long flowered spikes, brilliant and varied colors. If started indoors in March will bloom freely first year. In northern states needs winter protection.

54P—Large Flowering Mixed. (Pkt. 15c) (1/4 oz. 40c) (oz. 2.25).

55P—POPPY, Iceland (Nudicale). Giant Kelmscott. Flowers very large on strong stem. Brilliant mixture of pink, rose and red. Cool moist soil best. (Pkt. 15c) (1/4 oz. 45c) (1 oz. \$1.70).

56P—POPPY, Oriental Scarlet. Large fiery red flowers. Plants 30 inches tall. (Pkt. 15c) (1/4 oz. 30c) (1 oz. \$1.75).

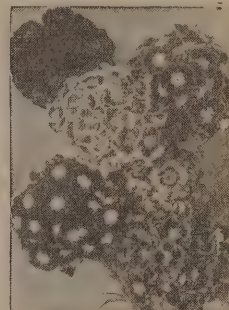

57P—POPPY, Oriental Mixed. Enormous, brilliant; produces flowers from salmon pink to dark crimson. Often 5 to 6 inches across. (Pkt. 15c) (1/4 oz. 30c) (1 oz. \$1.75).

POPPY, Annual. See page 27.

59P—PYRETHRUM HYBRIDUM (Painted Daisy). Large Flower Single. Easily grown from seed. Bloom in June. If plants are cut back will bloom later in season. Wonderful for cut flowers. Fernlike foliaged plants are beautiful even when not in bloom. Florists Strain. (Pkt. 10) (1/4 oz. 50c) (1 oz. \$1.50).

POPPY, Iceland

SWEET WILLIAM
(Single)

69P—PYRETHRUM DOUBLE. All colors mixed. 80% extra double. Florists strain. Mixed. (Pkt. 20c) (1/4 oz. 40c) (1/2 oz. \$1.40).

61P—PYRETHRUM. James Kelway. Daisy-like flowers, bright vermilion red with yellow center, very showy, excellent cut flowers. (Pkt. 20c) (1/4 oz. 60c).

63P—STRAWBERRIES. Alpine New Baron Solemacher. A new everbearing strain producing an abundance of dark red elongated berries of unusual flavor half as large as commercial varieties. Easily picked. Plants bush form produced from seed only, makes no runners. Very effective in borders or beds. (Pkt. 20c) (1/4 oz. 45c) (1/2 oz. \$1.50).

65P—STATICE (Sea Lavender). Caspia. 2 1/2 ft., small lilac flowers on much branched stems. Latifolia. 1 1/2 ft., large spreading pinnacles of tiny blue-purple flowers. (Pkt. 10c) (1/4 oz. 40c).

66P—SWEET WILLIAMS, Double Mixed. Easily grown, blooms early, produces showy full flower heads composed of numerous large double blooms. For best results treat as a biennial but will usually reseed itself. (Pkt. 10c) (1/4 oz. 25c) (1 oz. 60c).

68P—SWEET WILLIAMS. Single Mixed. Many colors and markings will be found in this mixture. (Pkt. 10c) (1/4 oz. 20c) (1 oz. 50c).

69P—VIOLET ODORATA. The Czar. Double. The true dark purple, sweet scented violet. Plants very hardy. Thrives best in shady place. (Pkt. 20c) (1/4 oz. 75c).

70P—WALLFLOWER. Fine Double Mixed. (Biennial). Long spikes of sweet scented double flowers. In northern states needs some winter protection. Also Annual Wallflowers page 36. (Pkt. 15c) (1/4 oz. 50c).

NURSERY STOCK

All of our nursery stock has been STATE INSPECTED and free from diseases

We have an excellent stock of carefully grown Fruit and Shade Trees, Roses, Shrubbery, Plants, Roots, etc., the QUALITY of which we wish to call your particular attention. Our stock is all First Grade or Number One, and includes the varieties which are most popular and do best in our western climate. LOW GRADE Nursery Stock is priced to attract the frugal buyer. However, it is a poor investment.

NURSERY STOCK WILL NOT BE SENT C.O.D.

BLEEDING HEART

Dielytra Spectabilis. (Old-fashioned Bleeding Heart). A hardy perennial plant with finely cut foliage. Graceful, heart-shaped, pink and white flowers early in the spring. 8 to 5 eyes.

(Each 95c) (3 for \$2.70).

Add postage and packing: (Each 35c) (3 for 41c).

BABY'S BREATH

Gypsophila, Bristol Fairy. A beautiful double white flowered variety. When in full bloom it forms a symmetrical mass 2 to 3 feet in height of pure white flowers. Cannot be excelled for cutting purposes, especially in combination with highly colored flowers. Can also be cut and dried and used in bouquets long after other outdoor flowers are gone.

(Each 95c) (3 for \$2.65).

Add postage and packing: (Each 35c) (3 for 41c).

SWEET PEA

Perennial (Lathyrus). Flowers much like the annual Sweet Pea. Can be used as a covering for walls and trellises, and as a border plant. Colors pink, red or white.

(Each 45c) (3 for \$1.25). Add postage and packing:

(Each 35c) (3 for 41c).

MISCELLANEOUS SPRING BULBS

The following bulbs should be started indoors if early blooms are desired and then transplanted out of doors when danger of freezing is past.

TUBEROSES

Grown for their fragrant spikes of heavy waxen flowers. For best results, plant in pots early in season, leave in dark place and transplant to outdoors when weather is suitable. We are offering the most commonly grown, and an old standard of the garden.

Pearl. Dwarf and double. White. Very fragrant.

(3 for 50c) (Doz. \$1.75). Add postage and packing:
(3 for 15c) (12 for 35c).

BEGONIAS

Double Tuberous Rooted. Use as potted plants or in beds out of doors. For early blooms pot them indoors using flat boxes or pots with about three inches of $\frac{3}{8}$ peat moss and $\frac{1}{8}$ enriched soil. Place bulbs just below the surface 3 to 4 inches apart. Keep moist and in a well lighted position, but not in direct sun. Transplant to pots or out of doors when shoots are about 4 inches tall or as weather permits. Dig them in the fall before severe freezing weather. It is necessary that they be planted in a shady location. Separate colors or mixed, red, pink, yellow, white, orange or copper.

Giant Size Bulbs, No. 1, 2 in. and larger, (3 for 79c) (Doz. \$2.89) (50 for \$10.00). Add postage and packing: (3 for 15c) (12 for 35c) (100 for 59c).

CONDITION OF SALE

Claims for any cause must be made promptly on receipt of stock. We will not allow any claims after goods have been accepted, or if report is not received by us within 10 days after arrival of goods.

If, however, within 30 days after planting, the stock fails to leaf out and start growing, we will replace for one-half (50%) the catalog price, plus postage. We cannot be responsible for winterkill.

Don't overlook our FREE Pen Offer
on Page 1

DELPHINIUM

PACIFIC HYBRIDS. An outstanding delphinium. Grows tall and stately with long tapering spikes. They will grow in almost any soil but do their best in a good rich loam, making a height of from 5 to 7 feet. Mildew resistant. One of the best as a background for the perennial flower garden. Large field grown plants. Your choice of color: Deep blue, white, lavender, pink or purple.

(Each 89c) (3 for \$2.55).

Add postage and packing: (Each 35c) (3 for 53c).

FERNS

GOLDIE'S WOOD (Aspidium). Hardy evergreen variety. Grows about 2 feet.

MAIDEN HAIR (Spleenwort Asplenium Tricomane). Does best in shade. Growing to 2 feet. Very attractive native variety. Black stems with green fronds. Likes moist spots.

OSTRICH PLUME (Onoclea Struthiopteris). Very graceful with finely cut pinnules. Grows 2 to 3 feet.

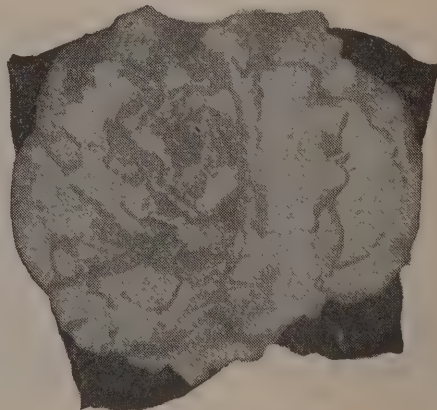

Your choice of above: (Each 49c) (3 for \$1.35).

Add postage and packing: (Each 35c) (3 for 41c).

CALADIUM ESCULENTUM

Sometimes called "Elephant Ear." Very large leaves, dark waxy green bearing a resemblance to elephant's ears, on sturdy plants. Nice specimen for the flower garden.

(Each 39c) (3 for 98c). Add postage and packing:
(Each 15c) (3 for 35c).

BEGONIA, TUBEROUS

HARDY CUSHION CHRYSANTHEMUM

Low growing Mums forming a mound of colorful blooms resembling the old-fashioned Azalea. Plants grow 12 to 16 inches high. Start blooming early August and continue until freezing weather. Very hardy and easily grown. One plant will produce hundreds of blooms. Following named varieties:

Bronze Cushlon. Rich red bronze, turning to bronzy yellow.

Purple Cushlon. 2 inch double flowers of rich purple.

Red Cushlon. Good red, multitude of 2 to 2½ in. blooms.

Pink Cushlon. Opens a deep orchid pink, later salmon pink.

White Cushlon. Snow white flowers with faint yellow center.

Yellow Cushlon. Brilliant golden yellow, dense growth, large clumps covered with blooms.

(Each 49c) (3 for \$1.35) (Dox. \$5.25)
Add postage and packing: (Each 35c) (3 for 41c) (Dox. 59c).

HARDY GARDEN CHRYSANTHEMUM

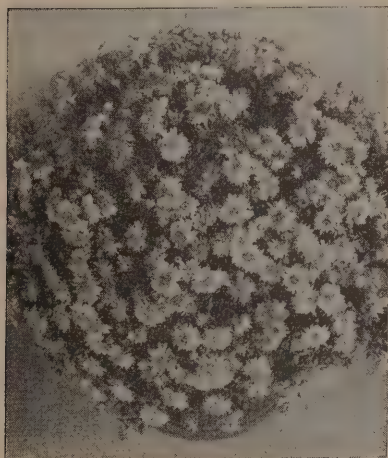

The following fall blooming Mums are earlier blooming varieties and well adapted to our western climate, producing beautiful flowers of autumn colors from mid-August to freezing weather. Hardy, field grown divisions.

Alabaster. Beautiful 4 to 5 inch white flowers with incurved petals, blooming latter part of August. Excellent for cutting. Grows about 2 feet tall.

Allegro. Beautiful glowing shrimp-pink, and a heavy bloomer. Starts blooming about Sept. 15, height 20 inches.

Carnival. Pompon type with gleaming burnt-orange flowers. A heavy bloomer and a good grower. First blossoms about the middle of September. Height 2 feet.

Chippewa. Large aster-purple flowers with slightly incurved petals, silver edges. Grows about 2 ft. tall.

PINK CUSHION CHRYSANTHEMUM

Chiquita. Deep yellow button pompon. Good cut flower. Height 2 feet, blooms about the middle of September.

Early Crimson. Flat, bright crimson flowers on rigid upright plants. Very hardy and an early bloomer, starting about the middle of August. Plants grow to about 2 feet.

Kathleen Lehman. Bright orange-gold, deepening to red-gold at center. Height 2 feet and blooms about September 15.

Malinda Brown. Clear lavender-pink flowers on strong healthy plants. High centered, globular shaped blooms with incurved twisted petals. September 15. Height 2 feet.

Remembrance. Deep ruby carmine, very good red. Holds color for the life of the bloom. September 15. Height 2 feet.

September Dawn. Large bright rose-pink flowers. Plants about 2 feet tall. Blooms about September 15.

Tasiva. Beautiful double white blooms about 2 in. to 2½ in. across. Delicate creamy center. A good grower and a prolific bloomer.

Your choice (59c each) (6 for \$3.29)
Postage: (Each 35c) (6 for 47c).

REGAL LILY

HARDY LILIES

Add postage and packing all lilies
(Each 15c) (3 for 35c) (6 for 47c).

ELEGANS ATROPURPUREUM. A good one for bedding, growing 12 to 15 inches. Deep red flowers, shaded crimson, large size. Blooms in June. Plant 4 to 5 inches deep.
(Each 49c) (3 for \$1.35)

HENRYII. The Golden Speciosum. Golden yellow flowers in August and September. Plant 6 to 8 inches deep.
(Each 54c) (3 for \$1.49)

REGALE. A lily of rare beauty. The flowers are white, slightly suffused with pink, creamy yellow throat, and very fragrant. Blooms in July. Plant about 5 inches deep. Large bulbs 6 to 8 inches.
(Each 45c) (3 for \$1.25) (Dox. \$3.49)

SPECIOSUM RUBRUM. Grows 3 to 5 feet tall. Blooms in September. Flowers of white background and shading from pink to carmine with pink dots. Plant 6 to 8 inches deep.
(Each 69c) (3 for \$1.95)

LILY-OF-THE-VALLEY. It does best in a shady location and spreads rapidly. Every year you find more plants. They show early in the spring and are one of the first to bloom. It is very hardy and needs no attention in the fall to carry through the winter.
(For a clump of 10 pips, 49c) (3 clumps for \$1.35)

EVERBLOOMING CANNAS

For best results in our climate canna bulbs should be planted indoors during April in pots or flats and then transplanted to the garden when danger of frost is past. When planted outdoors spade soil about 12 inches deep and if possible mix some manure with the soil. Place bulbs or plants about 5 or 6 inches deep and about 2 feet apart. Will do well in most any location, even in partial shade. They should have 4 to 5 hours sun per day. Will bloom until frost. Dwarfs 2 ft. Medium 3 ft. Tall 4 ft.

Red King Humbert. Large light red flowers; bronze foliage; medium tall.

City of Portland. Large beautiful plain pink flowers; green foliage; medium tall.

Yellow King Humbert. Large yellow flowers variegated with lighter and darker shades of yellow; green foliage; medium height.

Hungaria. Large dark pink flowers; green foliage; dwarf.

Copper Giant. An extremely large and beautiful salmon copper shaded pink flowers; green foliage; medium tall.

Richard Wallace. Extra beautiful large clear light yellow flowers; thick fine textured green foliage; dwarf.

President. Very large bright red flowers, beautifully shaped contrasting even growing green foliage. Genuine dwarf, extra large flowering.

Wyoming. Large orchid flowering dark orange; bronze purple foliage; medium height.

All varieties (6 for \$1.10).

Postage and packing: (6 for 35c) (12 for 41c).

YELLOW KING HUMBERT

GLADIOLI

GOLD SEAL GLADIOLI ARE BEST QUALITY

They do best in deeply spaded rich soil and a sunny location. Plant 4 to 5 inches deep and about the same distance apart with the crown of the bulb uppermost. The amount of water given the ordinary garden is sufficient. Plantings may be made at different times from April to June 1, thus insuring beautiful cut flowers throughout most of the summer.

Bloomfountain. Peachypink.
Chamouny. Deep rose, edged with silver.
Elizabeth the Queen. Orchid lavender.
Ethel Cave Cole. Large, light pink.
Friendship. Apple blossom pink.
Gold. Good golden yellow.
Hauptmans Glory. Deep yellow.
Johann Strauss. Bright red.
Karen. Rose pink.
Lady Jane. Cream with yellow throat.
Lelf Ericson. Tall, cream color.
Pactolus. Apricot yellow, orange throat.
Ravel. New blue shade. Very good.
Red Charm. Good crimson, large blooms.
San Soucl. Bright blood red.
Silentium. White with red throat.
Sweet Sixteen. Sparkling pink, plain petals, rounded florets.
Snow Princess. Best commercial white.
Spic and Span. Tall bright pink.
Spotlight. Yellow with red throat.
Valaria. Brilliant scarlet. Good cut flower.

SPOTLIGHT

White Goddess. Ruffled pure white.

Your choice of above bulbs: (12 for 98c) (100 for \$7.29).

Add postage and packing, first 12, 35c. For each additional 12 add 6c postage.

To kill Gladiolus Thrip we recommend DDT 5 per cent dust.

NEWER VARIETIES

Special Gladioli Collection

Dr. Fleming. Early. Light pink.
Early Rose. Deep rose. Silvery undertone.
Florence Nightingale. Large pure white.
Gold Bond. Beautiful golden yellow.
Indian Summer. Smoky brown tones.
Mabel Violet. Bright violet.
Merry Widow. Purple with white throat.
Myrna Faye. Early light lavender.
Pink Chiffon. Beautiful light pink.
Red Radiance. Brilliant bright red.
Regina. Apricot peach.
Sunny Boy. Creamy yellow, red throat.

The above selection, all No. 1 and newer varieties 12 for \$1.19.

Add postage and packing: For 1 collection 35c. Each additional collection add 6c.

GLADIOLI NO. 1 MIX

This mixture of gladioli bulbs consists of 10 to 12 varieties in a dozen of No. 1 bulbs that are sure to bloom and make nice cut flowers. Larger orders would have the same number of color selections of our choice. Per doz. 69c, per 100 \$5.15. Add postage and packaging per doz. 35c, per 100, 59c.

FREE

"Bulb Booklet" concerning the planting and care of Begonias, Dahlias and Gladioli. Request one of these with your order.

JUMBO MIX

A selection of large bulbs mostly 2 inches or better that will produce large spikes of flowers. Hand sorted from good bulb stocks. 6 to 8 varieties mixed.

Per doz. 79c. Per 100 \$5.95. Add postage and packing, per doz. 41c. Per 100, 77c.

The culture of peonies is very easy and it does not require any certain soil, either sandy or heavy will do. The earth must be spaded deep. A little manure mixed in would not hurt. After your ground is in shape, plant the roots from 2 to 3 feet apart, covering the crown only 1 to 2 inches. Then give them plenty of water for best results. Peonies do better if not crowded by other shrubs or plants. 3 to 5 eyes per division.

(E) denotes Early, (M) Midsummer, (L) Late.

Edulis Superba (E). Bright clear pink.

Felix Crousse (M). Ruby red.

Festiva Maxima (E). White.

Karl Rosenfield (M). Velvety crimson.

PEONIES

BARONESS SCHROEDER

Monsieur Jules Elie (E). Lilac pink. Very good.

Richard Carvel (E). Bright crimson. Above peonies (Each 89c) (3 for \$2.55).

Add postage and packing: (Each 35c) (3 for 47c).

We have many varieties not listed above. If interested in lots of 10 or more, please write for prices and varieties.

MIXED PEONIES

\$2.55 Value

Good roots. Overstock of good varieties. Choice of red, white or pink peonies, unnamed varieties. (3 for \$1.90).

Add postage and packing: (Each 35c) (3 for 47c).

FALL BULBS

We do not issue a Fall Catalog but will be glad to send you our list of top quality tulips, narcissus and other Dutch bulbs next fall.

Shall we put your name on the list to receive one of these money saving price lists?

DAHLIAS

Culture: Pick a sunny spot if possible and spade well. Then lay the root on its side about 4 inches from the surface. In covering, be sure to have the soil packed firmly about the tuber; plant only when the soil is dry, then water sparingly. Bulbs require one to two weeks to come up.

The following named varieties are decorative types and make a beautiful addition to any flower garden.

Arthur Godfrey. Large decorative. Variegated, apricot and orange.

Avalon. Pure yellow blooms on long stems. Good for cut flowers.

Cardinal. Beautiful red flowers, large and on long stems.

Commando. Good clear lavender blooms, 10 to 14 inches on long stiff stems.

Golden Goblet. Beautiful golden yellow flowers on long stems.

Jane Cowl. Massive blooms, orange to salmon. One of the best.

Jersey's Beauty. Distinctive rose pink, a tall grower with fine stems.

Kunzman. Large orange to buff flowers, 10 to 12 inches in diameter. Good grower.

Michael Black. Flowers to 8 inches. Real dark maroon, almost black. Decorative.

Michigan White. Beautiful large white blooms on long stems. Fine for cut flowers.

Mrs. Carl Salbach. 10 to 12 inch lavender flowers on good strong stems. Fine for cut flowers.

Mrs. E. A. Wheeler. Dark purple flowers, 8 to 10 inches.

Mrs. Geo. Leboutillier. One of the best reds. Large blooms on long stems. Deep crimson red.

Mrs. Keene. Large fluffy yellow.

Oakleigh Champlon. Large bronze flowers. Good stems and a fine grower.

Ogden Reid. A large flower of light mauve pink. Vigorous grower. Free blooming on long curved stems. Early.

Pink Wonder. Large pink flowers on long stems. Makes good cut flowers.

Rosa Nell. Large rose red with long stems and a good cut flower.

White Wonder. Large fluffy white flowers.

Your choice of dahlias listed. (Each 49c) (3 for \$1.30) (Dox. \$4.10) Add postage and packing: (Each 15c) (3 for 35c) (Dox. 47c).

POMPON DAHLIAS

Bushy lowgrowing plants. Good cutflowers.
BRONZE BEAUTY. Deep bronze.
CARDINAL. Red.
GOLDEN QUEEN. Yellow.
MARY MUNN. Lavender.

COMMANDO

DAHLIA COLLECTION \$3.89

Add postage or packing charge, 1 collection—41c. Each additional collection—15c.

CLIMBING ROSES

NON PATENTED CLIMBING ROSES

IMPROVED BLAZE. Hardy recurrent blooming climber, with the beautiful scarlet shades of Paul's Scarlet climber; but a much heavier bloomer.

CLB. ETOILE de HOLLANDE. A hardy and vigorous grower. Blooms similar to hybrid tea Etoile de Hollande.

PAUL'S SCARLET. A profuse spring bloomer of vivid scarlet. Hardy. One of the best.

CLB. INSPIRATION. A free blooming and hardy climber, producing successive bursts of sparkling pink blooms throughout the season after it is established. Large semi-double and fragrant blossoms. Grows to moderate height.

CLIMBING TALISMAN. For description see multi-colored HT, page 44.

WHITE DAWN. A hardy everblooming white climbing rose. Double snow-white flowers and a heavy bloomer. Fragrant. Usually blooms the first year.

Prices same as Hybrid Teas on page 44.

PATENTED CLIMBING ROSES

Add postage and packing. (Each 35c) (3 for 47c) (Dox. 83c).

CL. CRIMSON GLORY. (Pat. No. 736.) Fragrant deep velvety-crimson blooms. Free blooming and a good grower. (Each \$2.50).

DON JUAN. (Propagation Rights Reserved). Climber. Deep velvety red flowers to 5 inches both singly and in clusters. Delightful fragrance. Deeper red pointed buds. Fine for cutting. Recurrent blooms on 8 to 10 foot plants. Lustrous foliage of leathery texture and highly disease resistant. (Each \$3.00).

GOLDEN SHOWERS. Climber. (Plant Pat. 1557.) A 1957 AARS winner and the only climber ever to win this coveted award. Literally showers of bright golden flowers on a plant that can be used as a climber or pillar. Attractive glossy bronze foliage. Quite hardy in colder climates. (Each \$2.75).

CL. PEACE. (Pat. No. 932.) Lemon yellow, edged rose pink. Very double. Very vigorous habit of growth and blooms heavily with large flowers. (Each \$2.25).

CLB. PICTURE. (Plant Pat. No. 524). Clear pink buds and lovely blooms on long stems. Dark glossy foliage and a good grower. (Each \$2.50).

EVERBLOOMING HYBRID TEAS

Hybrid Tea or H. T. roses will bloom
the first year and intermittently during
the summer. A favorite with rose grow-
ers.

PINK VARIETIES

COUNTLESS VANDAL. Orange and cop-
per buds, flowers open to brilliant
pink with yellow base.

DAINTY BESS. Dainty, bluish pink,
single flowers, and fragrant. Blooms
are open and the stamens are a
distinct darker color. Heavy foliage.

MRS. CHAS. BELL. Beautiful shell pink
with shades of soft salmon. Hardy.

PICTURE. Velvety clear rose pink with
undertone of salmon-rose.

PINK DAWN. Bud long pointed. Large
double flower, high centered, very
fragrant. Deep rose-pink opening to
a lighter shade. Vigorous.

THE DOCTOR. Large beautiful buds.
Flowers cupshaped and semidouble,
satiny pink. Bushy plants and a
vigorous grower.

RED VARIETIES

CHARLOTTE ARMSTRONG. One of
the best for years. Beautiful, well
shaped, long, tight, cerise-red buds
slowly open to peony type full rose.
Prolific bloomer. Hardy and a good
grower.

CHRISTOPHER STONE. Still a favorite
of the older red roses. Long pointed
buds. Scarlet red flowers, deeper red
in the cooler fall weather. Fragrant,
semi-double flowers, showing gold
stamens.

CRIMSON GLORY. Perfectly formed
blooms, intense vivid crimson, soft
velvety sheen. Fragrant.

ETOILE DE HOLLAND. Large, dark
velvety red. Very fragrant and a
heavy bloomer.

POINSETTIA. Long pointed buds. Large
double flowers of bright scarlet. Pro-
lific bloomer.

TEXAS CENTENNIAL. Long pointed
buds, well formed double flowers,
brick red with light center. Vigorous
upright grower.

MULTI-COLORED

AUTUMN. Vigorous grower with long,
strong stems. Blooms of rich burnt
orange, yellow and red.

CONDESA DE SASTAGO. Golden yellow
buds. Yellow and copper-scarlet
blooms. When the flower is open the
inside of the petal is a fiery red, and
the outside a rich gold. Disease re-
sistant. A fine spicy scented rose.

DUQUESA DE PENARANDA. A popular
variety, large pointed buds of copper-
apricot with glossy foliage. Grows
tall and well shaped.

WE CARRY NO TEXAS GROWN ROSES

All are high altitude No. 1 Roses.
When we say NUMBER ONE, we
mean that the roses have strong
unwaxed canes and a mass of vigor-
ous roots containing many small
fibrous roots that enable the plant
to get the much needed start when
first planted. We would also like
to call your attention to the fact
that EARLY PLANTINGS bring
EARLY FLOWERS and better
growth. Hot weather plantings are
never as good as when planted dur-
ing the cooler spring weather.

Planting and cultural directions
with each order.

MME. HENRI GUILLOT. Raspberry pink
blooms with orange at base of pet-
als. Fine medium length stems for
cutting. Beautiful foliage.

PRESIDENT HOOVER. Large double
blooms of creamy yellow tinted with
flame pink. Long stems.

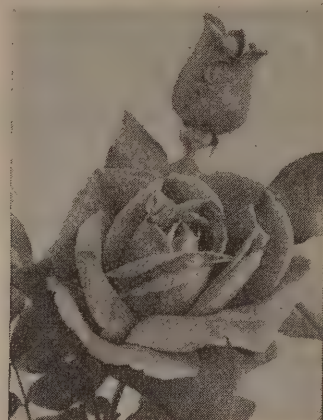

SIGNORA. Long, pointed orange-red
buds. Flowers, large, double, frag-
rant of orange-apricot turning to
apricot suffused gold. A vigorous
grower with glossy foliage.

TALISMAN. A favorite of rich yellow
and rose red. Good stems for cutting.

WHITE VARIETIES

McGREDY'S IVORY. Long pointed buds
opening to beautifully formed and
fragrant ivory-white blooms. Dark
green foliage. A favored white among
rose growers.

REX ANDERSON. Buds open slowly to
well-shaped blooms of ivory-white.
A good white rose, fragrant. Vigor-
ous with gray-green foliage.

CRIMSON GLORY

OUR NO. 1 BARE ROOT ROSES

Have root systems that are too
large to be used as package roses.
We keep them at a low temperature
and in damp peat moss to maintain
their vitality and freshness until
sold. The larger the root the more
vigorous the plant. In rose plants
it is the roots that count.

YELLOW VARIETIES

ECLIPSE. Long pointed buds, deep gold.
Yellow flowers on long strong stems.
Leathery foliage on strong canes.

McGREDY'S YELLOW. Well formed
blossoms of buttercup yellow. Fra-
grant. Hardy and a good grower.

SOUER THERESE. Long pointed buds;
large golden yellow flowers, slightly
fragrant. Leathery foliage, vigorous
grower.

PATENTED EVERBLOOMING HYBRID TEAS

ADD POSTAGE AND PACKING: (35c each) (3 for 47c) (Doz. 83c)

ARLENE FRANCIS. (Plant Pat. No. 1684). Long pointed buds, opening to large
double high-centered flowers. Rich golden yellow blooms, fragrant. Vigorous
plants and glossy foliage. Medium height.
(Each \$3.00).

ANGEL WINGS. (Pat. applied for). Beautiful long tapering buds opening to
silky-like creamy white and pink blooms with outcurved petals. Fragrant
blooms on tall growing and upright plants.
(Each \$3.00).

AZTEC. (Plant Pat. No. 1648). Ovoid buds opening to big orange-scarlet blooms,
that are lasting and colorfast. Plants are vigorous and spreading. Medium
height.
(Each \$2.75).

CHRYSLER IMPERIAL. (Pat. No. 1167). All-American for 1953. Its vivid rich tones
of crimson are enriched by darker tones of ox-blood red. Produces an abundance
of high centered, very fragrant flowers 4½ to 5 inches across. Buds long and
tapered. Sturdy compact bush. Leaves large, dark.
(Each \$2.50).

CONFIDENCE. (Plant Pat. 1192). Large flowers, pastel bluish-pink shades. Strong
grower and a prolific bloomer.
(Each \$2.50).

DIAMOND JUBILEE. (Pat. No. 824). Honeycomb yellow or buff-orange with a
touch of orange-yellow at base of petals. Large, beautiful, high-centered, and
long lasting blossoms. Free bloomer, hardy.
(Each \$2.25).

HOWARD'S PATENTED ROSES

The Finest Grown Anywhere

PRICES

on Patented Roses are set by the originator, and cannot be changed by the retailer. So, why not get the best quality in sturdy bushes with large fibrous roots. They cost no more.

PATENTED EVERBLOOMING HYBRID TEAS

ADD POSTAGE AND PACKING
(35c each) (3 for 47c) (Doz. 83c)

FIRST LOVE. (Pat. No. 921). An exquisite bud of beautiful dawn pink. Deeper color in cool weather. Lovely flower with curved petals.
(Each \$2.25).

GARDEN PARTY. (Plant Pat. No. 1814). An AARS winner for 1960. Long buds and high centered flowers of excellent form. These large blooms provide beautiful pastel shades of creamy ivory, flushed a dainty pink at the outer edge of petals. Sturdy plants with olive green foliage. Abundant bloomer.
(Each \$3.50).

GOLDEN MASTERPIECE. (Plant Pat. 1284). Large rich golden yellow flowers, well shaped and lasting. Glossy green foliage on upright vigorous plants.
(Each \$3.00).

GOLDEN SCEPTER. (Plant Pat. 910). Slender, tight, long-lasting buds on graceful stems that are fine for cut flowers. Non-fading yellow with slightly ruffled petals, very attractive. Does well in hot weather.
(Each \$1.85).

HAPPINESS. (Plant Pat. No. 911). Brilliant red flowers changing to crimson-carmine. Very full high centered blooms. Erect and vigorous plants.
(Each \$2.00).

HEART'S DESIRE. (Plant Pat. No. 501). Long pointed buds. Fine fragrant, scarlet red blooms on good stems, and a good bloomer.
(Each \$1.85).

HELEN TRAUBEL. (Pat. No. 1028). The color varies with the weather, sometimes a light sparkling pink but more often a glowing apricot. Unusually large and long buds that are magnificent. A wonderful display of color when fully open. Very vigorous grower. A.A.R.S. Award for 1952.
(Each \$2.75).

ISOBEL HARKNESS. (Plant Pat. No. 1650). Lovely long yellow buds which develop gracefully into bright shining clear yellow flowers. Vigorous and free blooming plants of medium height.
(Each \$2.75).

KORDES PERFECTA. (Plant Pat. No. 1604). Creamy white buds edged with carmine. As the flower opens the lower petals are creamy white with edges splashed pink curling outward. A vigorous disease-free plant.
(Each \$3.50).

LADY ELGIN. (Plant Pat. No. 1469). Large ovoid buds of reddish apricot and opening to double fragrant flowers that are an exciting combination of apricot, orange and pinkish tinge. Long strong stems on tall sturdy plants.
(Each \$2.50).

LOVE SONG. (Plant Pat. No. 1360). Large very double blooms, free blooming and fragrant. Inside of petals are a deep salmon pink, reverse yellow. Offspring of Peace.
(Each \$2.50).

LOWELL THOMAS. (Pat. No. 595). Large, long pointed buds. Flowers large and very double. Lasting canary yellow. Strong stems. Vigorous bushy plants. Intermittent bloomer.
(Each \$2.25).

MIDNIGHT. (Plant Pat. 1542). A brand new rose of velvety blackish maroon-red. Long slender buds with spicy fragrance. A vigorous grower and resistant to mildew.
(Each \$2.75).

MIRANDY. (Pat. No. 632.) Long ovoid buds opening to very double blooms of maroon red. Long lasting and of penetrating fragrance. (Each \$2.25).

MOJAVE. (Pat. No. 1176). Glowing apricot-orange. Slender buds and double flowers borne single on long straight stems. Upright and vigorous.
(Each \$2.75).

NEW YORKER. (Pat. No. 823.) Large velvety scarlet. Fragrant. An abundance of blooms on vigorous, bushy plants.
(Each \$2.50).

NOCTURNE. (Pat. No. 713.) Bright cardinal red with dark shadings of crimson. Large petals, long lasting fragrant flowers. A.A.R.S. award for 1948.
(Each \$2.25).

PEACE. (Pat. No. 591.) Ovoid buds and golden yellow etched with pink as they open. Color changes from canary yellow to pale golden, to cream. Petals are edged with apple blossom pink that deepens as the flowers open to about 6 inches.
(Each \$2.50).

PINK PEACE. (Pat. No. 1759). A direct descendant of Peace. Deep dusty pink blooms, large and borne one to a stem. Holds color for the life of the flower. Strong, pleasant perfume. Tall growing, disease resisting plants.
(Each \$3.00).

ROSE OF FREEDOM. (Plant Pat. No. 791). Big ovoid buds of rich cardinal-red open to full blooms of 60 petals. Excellent bloomer with heavy penetrating fragrance. Tall strong grower.
(Each \$2.00).

10% DISCOUNT ALLOWED

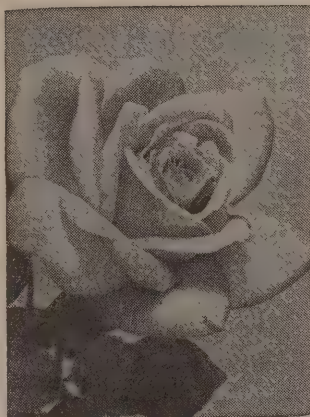

If you order six or more Patent Roses
on page 45 and 46

(Each \$1.85).

SHOW GIRL. (Pat. No. 646). Long pointed buds opening to large, fragrant, deep pink flowers. Long stems and a good grower.
(Each \$2.25).

STERLING SILVER. (Plant Pat. No. 1433). Warm lilac-lavender in color. Long pointed buds, large double fragrant flowers. Sturdy free blooming plants with dark foliage.
(Each \$3.00).

SUTTERS GOLD. (Pat. No. 885.) Beautiful, long pointed, yellow bud, richly shaded with orange and red. Rich tea fragrance. High centered richly colored blooms. A.A.R.S. award for 1950.
(Each \$2.25).

HELEN TRAUBEL

TALLYHO. (Pat. No. 828). Cardinal red buds opening to beautiful pink blooms. Reverse cardinal red. A vigorous grower.
(Each \$2.25).

TIFFANY. (Pat. No. 1304) Long pointed buds with golden yellow shading at base, open to beautiful phlox pink flowers, golden yellow at base. Upright, vigorous with dark green foliage. Noted for fine fragrance and length of stem and bud.
(Each \$2.75).

WHITE KNIGHT. (Plant Pat. 1359.) A 1958 A.A.R.S. winner. Pure white and exquisitely formed buds. Blooms open with heavy waxy petals. Strong upright plants.
(Each \$3.00).

Howards Patented Grandiflora and Floribunda Roses

PATENTED GRANDIFLORA ROSES

BUCCANEER. (Plant Pat. No. 1119). Bright buttercup yellow. Long tapering buds and large double flowers. Tall upright vigorous grower.
(Each \$2.50).

CARROUSEL. (Pat. No. 1006.) Dark red, semi-double flowers. Fragrant and a profuse bloomer. Glossy leathery foliage.
(Each \$2.00).

EL CAPITAN. (Plant Pat. No. 1796). A new one in the grandiflora family. Medium-size buds. Flowers are a rich glowing cherry-red color. A prolific recurrent bloomer. Bushy upright plants.
(Each \$3.00).

STARFIRE. (Pat. No. 1742). 1959 AARS. A vigorous well foliated plant producing rich currant-red, urn shaped buds. Keeps well as a cut flower. Bronzy green foliage.
(Each \$3.00).

MONTEZUMA. (Plant Pat. 1383.) Long tapering buds opening to high-centered flowers of scarlet-orange, changing to salmon-orange in warm weather. Vigorous grower, good foliage.
(Each \$2.75).

QUEEN ELIZABETH. (Pat. No. 1259.) Blends of soft carmine rose and dawn pink. Tall upright and exceptionally vigorous.
(Each \$2.50).

ROUNDELAY. (Plant Pat. No. 1280). Deep red buds opening to long lasting full blooms of rich glowing red. Fine stems. A tall vigorous grower.
(Each \$2.50).

PATENTED FLORIBUNDA ROSES

BABY BLAZE. (Plant Pat. No. 1362.) Bright red floribunda similar to the Blaze climber. Medium height plants continuously in bloom with large clusters of cherry red flowers. Old spice fragrance.
(Each \$2.00).

CIRCUS. (Pat. No. 1382.) Perfect bright orange and yellow buds. High centered flowers with everchanging tones of yellow, buff, pink and bright red. Good foliage and of compact growth.
(Each \$2.50).

FASHION. (Pat. No. 789). Coral-pink overlaid with gold. Large blooms on vigorous bushy plants. Well formed Hybrid Tea shape and true rose fragrance.
(Each \$2.00).

FIRE KING. (Plant Pat. No. 1758). An AARS winner for 1960. Brilliant orange red flowers with attractive gold stamens in center. Spreading plant growing to medium height. Blooms freely throughout the season.
(Each \$2.50).

FUSILIER. (Pat. No. 1709.) Clusters of fiery orange-red flowers. Lustrous dark foliage, plants 2½ to 3 feet, vigorous and well shaped. Color darkens in cool weather. Fragrant. A 1958 A.A.R.S. winner
(Each \$2.50).

HEAT WAVE. (Plant Pat. No. 1786). Well formed floribunda flowers, medium size, of fiery Chinese red. Heavy bloomer and tall vigorous plants. Good cut flower.
(Each \$2.75).

IVORY FASHION. (Pat. No. 1688.) An AARS winner for 1959. An ivory colored Fashion equal to its parent, Fashion. Long slender buds opening to high-centered, fully open, fragrant flowers. Plants 2 to 2½ feet with dark green disease resistant foliage.
(Each \$2.75).

JIMINY CRICKET. (Plant Pat. 1346.) A beautiful floribunda with tangerine-red buds opening to coral-orange open flowers, with old rose fragrance. Glossy bronze foliage turning to glossy green. A 1955 A.A.R.S. winner.
(Each \$2.00).

RED PINOCCHIO. (Pat. No. 812.) Masses of ¾ inch flowers in clusters. Rich carmine, gradually deepens as blooms open. Does not fade. Wild rose fragrance. Vigorous, prolific bloomer.
(Each \$1.75).

SARABANDE. (Plant Pat. No. 1761). 1960 AARS winner. Medium size, single flowers of light orange-red with prominent circle of yellow stamens. Borne in large clusters on bushy spreading plants. A profuse bloomer. Semi-glossy foliage.
(Each \$2.50).

SPARTAN. (Pat. No. 1857.) Buds of burnt-orange opening to orange-red and then to reddish-coral. Fragrant. Flowers almost perfect on vigorous well foliated plants.
(Each \$2.75).

TEXAN. (Pat. No. 1471.) Fiery red blossoms, on sturdy plants. Cross between Peace and Improved Lafayette.
(Each \$2.50).

VOGUE. (Pat. No. 926.) A Floribunda with Hybrid Tea shaped flowers of perfect form, three to four inches in diameter. Dark cherry ovid buds opening to cherry-coral open flower. Spicy fragrance.
(Each \$2.00).

NONPATENTED FLORIBUNDA ROSES

DAGMAR SPATH. Large clusters of semi-double blooms of pure white. Fragrant and vigorous.

EUTIN. Glowing carmine-red flowers in huge clusters on long strong stems. Cup shaped and slightly fragrant. Vigorous grower to about 3 feet.

GARNETTE. Long, long lasting garnet-red buds, full open flowers that are double and ideal for cutting. Decorative, crinkled, bronzy foliage.

PINOCCHIO. Large clusters of pointed buds, opening to salmon flushed gold blooms. Hybrid tea shape. Fine for corsage or miniature arrangement.

POULSON'S YELLOW. Copper colored buds opening to yellow flowers in clusters. Glossy foliage.

SUMMER SNOW. Clear white flowers in large clusters, almost continuously in bloom. Low growing, fine for hedges or mass planting.

WORLDS FAIR. Deep velvety red, rather large, semi-double flowers borne in clusters. A dependable floribunda. AARS winner in 1940.

Your choice of the above: (Each \$1.29) (3 for \$3.69) (Doz. \$13.89). Postage and packing: (Each 35c) (3 for 47c) (Doz. 83c).

PLANTING AND CARE OF ROSES

THE BUD UNION (the knot-like structure above the roots) should be just at or slightly below the soil level. After planting, cover entire plant with soil, burlap or paper for about ten days to prevent stems drying out. Uncover gradually when shoot buds begin to grow. Plant hybrid teas about 24 inches apart, floribundas about 24 to 30 inches and climbers not closer than 4 feet apart.

FERTILIZING: Do not fertilize newly planted bushes. If well rotted cow manure is available use it once a year in the early spring, otherwise use a commercial fertilizer of the 4-12-4 or 5-10-5 grade about once a month until August. Use one heaping tablespoonful per bush.

WATERING: Roses need plenty of moisture and unless there is rain they should be watered thoroughly during dry periods. Soaking the soil to a depth of 8 inches at least once a week is desirable. Do not wet the foliage, but flood the beds under the plants.

CLIMBING VINES

ADD POSTAGE AND PACKING ON ALL VINES: (Each 35c) (3 for 47c)

IVY

BOSTON IVY. This is the variety that clings tightly to all surfaces, whether smooth or rough. Leaves are deep glossy green, smaller than the other ivies. Does best in this area on north or east walls. 2-year-old plants. (Each \$1.35) (3 for \$3.75).

SAINT PAULI (Improved Englemanni). Very rapid growing ivy. Beautiful fall coloring with clinging tentacles like the Boston Ivy. 2-year No. 1 plants. (Each \$1.15) (3 for \$3.25).

HONEYSUCKLE

HECKROTTI. Summer King. To 15 feet. Large, fragrant, flame red trumpets, lined with gold. Producing immense clusters from early summer to frost. Blooms first year of planting. Dark bluish green foliage, free from pests and disease. Fine for covering banks. Hardy 2-year No. 1. (Each \$1.15) (3 for \$3.25).

HALLIANA. Color, an intermingling of white and yellow, extremely fragrant and most satisfactory. (Each 95c) (3 for \$2.65).

SCARLET TRUMPET HONEYSUCKLE (Lonicera Sempervirens). Trumpet shaped flowers from July to September. Slow growing, but very showy. (Each 95c) (3 for \$2.40).

GOLD FLAME. An everblooming honeysuckle, blooming from early summer to frost. The foliage is almost evergreen. Tubular flowers with recurving petals, flame red outside and bright yellow inside. Very fragrant and perfectly hardy. (Each \$1.15) (3 for \$3.25).

SILVER LACE VINE (Polygonum)

CLEMATIS

Clematis today is the most showy and effective of all the hardy climbing vines known, so far as richness of color and elegance of form of flower is concerned. Their exceedingly rapid growth makes them very valuable for pillars and trellises, pegged down for rockwork, old trees and stumps.

LARGE FLOWERING VARIETIES. Blooms single, 4 to 5 inches diameter, petals deeply furrowed. 2½ inch pots.

Jackmani. Velvety, violet-purple.

Henryl. Creamy white.

Mme. Ed. Andre. Crimson red. (Each \$1.39) (3 for \$3.90).

CLEMATIS JACKMANII

ASSORTED VINES

BITTERSWEET (Celastrus Scandens). A hardy, useful and ornamental vine. Does well in partial shade and common soil. Good cover for walls and trellises, and to stop erosion on steep banks. Yellow flowers in June, followed by bright orange and crimson fruits. 2-year-old No. 1 roots. (Each 95c) (3 for \$2.65).

POLYGONUM

SILVER LACE VINE (Polygonum Auberti). A rapid climber averaging 20 feet in a season, with fresh green foliage, lightly bronzed at the tips and a profusion of silvery, lacy flowers in erect sprays. 2-year-old No. 1 roots. (Each \$1.15) (3 for \$3.25).

REYNOUTRIA. One of the finest ground covers. Does best in full sunlight. Foliage light green and hovers 4 to 12 inches from the ground. Deep red buds developing to fragrant pink sprays in September, similar to Silver Lace vine. Foliage turns red in fall. 2 year No. 1 plants. (Each \$1.35) (3 for \$3.70).

HEDGE PLANTS

MULTIFLORA ROSE

Rose Multiflora Japonica. A hedge plant that has many uses. Can be used as a low growing hedge from 2 to 3 feet by keeping it trimmed to the desired height. If not trimmed it will reach a height of 6 to 8 feet and spread almost as wide. Has white flowers in June followed by fruits that are liked by the birds. A good one for erosion control and wildlife refuge. Has thorns. 12 to 18 inch plants.

(100 plants \$11.30) (50 at 100 rate) (25 plants \$2.95)

Add postage and packing; 100, 61c; 50, 44c; 25, 34c.

PRIVET HEDGE

AMOR RIVER (L. Amurensis). A very hardy northern grown type, vigorously upright and tall growing. The leaves are dark green, somewhat lustrous, tardily deciduous. Makes a strong, bold hedge with quite conspicuous bloom in erect white panicles. 18 to 24 inch plants.

(Per 100 \$27.70) (50 at 100 rate) (25 for \$7.45) Add postage and packing; (per 50, 90c) (per 25, 59c) (On 100 plants double the 50 rate).

EUROPEAN PRIVET (Vulgare). A very hardy and satisfactory variety. Heavy dark green foliage with white flowers followed by blue-black fruits. Growth is inclined to be more horizontal than some of the other varieties and fills in heavily from the ground up. Plant in single rows 9 to 10 inches apart. Plants are 12 to 18 inch, 3 cane.

(Per 100 \$32.95) (50 at 100 rate) (25 for \$8.95) Add postage and packing; (per 50, 90c) (per 25, 59c) (On 100 plants double the 50 rate).

AMOR RIVER HEDGE

LODENSE. A low growing privet. Can be used as a low growing hedge or kept cut down to a low height for borders in flower beds or along paths and patios. For hedging, plant 8 to 10 inches apart. 12 to 15 inch plants (100 for \$41.90) (50 at 100 rate) (25 for \$10.90). Add postage and packing; (per 25, 59c) (per 50, 90c) (Per 100, double the 50 rate).

ORNAMENTAL SHRUBS

"T" denotes shrubs 12 to 15 feet.
 "L" denotes shrubs 8 to 12 feet.

"D" denotes shrubs 2 to 3 feet.

"M" denotes shrubs 6 to 8 feet.

"S" denotes shrubs 3 to 6 feet.

BARBERRY

JAPANESE (*Berberis Thunbergi*) (D).

A popular low hedge plant of great hardiness; flowers followed by bright red berries that remain on plant until February. Leaves small dark green, turning to brilliant colors in fall. Effective for use in edging shrubbery or in masses.

2 to 2½ ft. Transplants (Each \$1.20) (3 for \$3.39).

Add postage and packing: (Each 29c) (3 for 44c).

NEW RED-LEAVED JAPANESE BARBERRY (D). Similar in all respects to the green-leaved, but the foliage is of rich, lustrous bronzy red. It should be planted in a sunny exposure to bring out and retain its full red color.

Large Transplants 2 to 2½ feet (Each \$1.59) (3 for \$4.49).

Add postage and packing: (Each 29c) (3 for 44c).

**LARGER SHRUBS
AT NO EXTRA
COST**

BEAUTY BUSH

BEAUTY BUSH (*Kowlkwitzia Amabilis*) (S). A graceful shrub with arching branches. Pink honeysuckle shaped flowers in May. Very hardy. Bushy plants. 3 to 4 feet.

(Each \$1.89) (3 for \$4.95).

Add postage and packing: (Each 29c) (3 for 39c).

BUTTERFLY BUSH

BUTTERFLY BUSH (*Buddleia*) (S). A very beautiful shrub, with long graceful stems terminating in tapering panicles of rich colored flowers. Although hardy, it will freeze down in Colorado and it is best to cover the roots with leaves or manure to insure a heavier growth the next season. They will bloom from June until frost.

Burgundy. A dark red *Buddleia* with blood red eye shading lighter to edge of petals.

Dubonnet. New dark wine flowers on large, firm spikes.

Empire Blue. (Pat. No. 557). A beautiful shade of Aster-blue with a delicate tone. Almost a Royal Blue.

Royal Red (Pat. No. 556). A new variety producing an abundance of round sprays 18 to 24 inches long. Rich dark purple, showing almost red when displayed under artificial light. Grow 4 to 6 feet tall with deep leathery green foliage.

Your choice of above: (Each 95c) (3 for \$2.70).

Add postage and packing: (Each 29c) (3 for 39c).

COTONEASTER

COTONEASTER (*Acutifolia*) (S). Growing from 6 to 8 feet in height, this perfectly hardy shrub makes an ideal foundation or full sun plant. Has graceful arching branches, colorful fall foliage and black berries that hang on well into the winter. 3 to 4 ft. shrubs. (Each \$1.69) (3 for \$4.79). Add postage and packing (Each 29c) (3 for 39c).

COTONEASTER (S). (*Divericata Spreading Cotoneaster*). Of spreading growth. 5 feet in height. Foliage nearly evergreen. Pink flowers followed by red berries. A good hardy attractive plant. 2 to 3 ft. shrubs. (Each \$2.19) (3 for \$5.95).

Add postage and packing: (Each 29c) (3 for 43c).

DOGWOOD

CORNUS, *Alba Siberica* (M). Red stemmed. Clusters of white flowers, succeeded by fall crop of white berries; stem and branches turning to blood-red in winter. 3 to 4 feet.

GOLDENTWIG, *Stolonifera Lutea* (M). Yellow stemmed. Clusters of white flowers, stems and branches are yellow. 3 to 4 feet.

Either dogwood (Each \$1.89) (3 for \$5.35).

Add postage and packing (Each 34c) (3 for 54c).

GOLDEN BELL

FORSYTHIA *SPECTABILIS* (M). This splendid spring flowering shrub is one of the earliest to bloom. The golden yellow flowers burst out close to the yellow stems and are followed by glossy green foliage. Branches slightly drooping. Hardy and easy to grow. 3 to 4 feet. (Each \$1.69) (3 for \$4.95).

Add postage and packing: (Each 29c) (3 for 47c).

GOLDEN PRIVET

IBOTA *VICARI*. (S). Hardy upright growing plant with golden yellow leaves. Neat and compact growth to 4 feet. Can be trimmed to desired shape or height. The golden yellow foliage makes a beautiful contrast throughout the season. Use as a hedge or specimen plant.

(Each \$1.29) (3 for \$3.69).

Add postage and packing: (Each 29c) (3 for 39c).

BLUE HYDRANGEA

Large heads of blue flowers during July and August. They are semi-hardy and need protection during the winter. In order to get and retain the blue color, plants must be fed by mixing in the soil about one tablespoonful per plant, of aluminum sulphate. 2 year dormant plants.

(Each \$1.65) (3 for \$4.95).

Postage (Each 34c) (3 for 44c).

TARTARIAN HONEYSUCKLE

HONEYSUCKLE

TARTARIAN *LONICERA* (M). The upright honeysuckle have bright and fragrant flowers, followed by showy berries that last through the early fall. Make very desirable and attractive shrubs. Very hardy. Ultimate height 6 to 8 feet. Separate colors, white, rose-pink and red. 3 to 4 feet.

(Each \$1.39) (3 for \$3.95).

Add postage and packing: (Each 29c) (3 for 47c).

COMPACTA *NANA*, Clavey's Dwarf Honeysuckle. A new honeysuckle of compact and bushy growth. Grows 5 to 6 feet, hardy. Blooms in May with small yellow flowers, followed by red berries. 2 to 3 foot plants.

(Each \$1.69) (3 for \$4.80).

Postage (Each 34c) (3 for 44c).

INVOLUCRATA. Dwarf, hardy honeysuckle growing to about 3 feet. Branches grow upright. Yellowish flowers sometimes tinged pink in May and June. Shiny black fruit. 18 to 24 inch plants.

(Each \$1.95) (3 for \$5.40).

Postage (Each 34c) (3 for 44c).

HYDRANGEA

ABORESCENS *GRANDIFLORA* or HILLS OF SNOW (S). This hardy American shrub grows 4 to 6 feet high and is one of the finest of this class of plants. The blooms are of largest size, pure snow-white and the foliage is finely finished. Blooms after all the early shrubs from June until August.

PANICULATA *GRANDIFLORA* (S). A good one to follow Hills of Snow, blooming profusely when other flowers are falling in the fall. Blossoms open white, assuming rose and bronze tints on the sunny side and drooping gracefully of their own weight. 2 to 3 feet.

Your choice of Hydrangea (Each \$1.59) (3 for \$4.49).

Add postage and packing: (Each 29c) (3 for 47c).

FLOWERING SHRUBS

LILAC (Syringa)

CHINESE (Rothomagensis) (M). Has small, slightly pointed leaves, on slender, straight branches. Fragrant reddish purple flowers are borne in loose panicles a little later than the common purple variety. Free blooming and very hardy.
3 to 4 feet.

COMMON PURPLE (Syringa Vulgaris) (M). Lilac flowers which are of a delightful fragrance and borne in magnificent clusters in May.
3 to 4 feet.

VILLOSA. Large panicles of violet flowers shaded a pronounced pink. Blooms in June. Very bushy.
2 to 3 feet.

Your choice of above lilacs: (Each \$1.59) (3 for \$4.49).
Add postage and packing: (Each 29c) (3 for 47c).

FRENCH LILAC

Named varieties. Hardy hybrids. Chosen for their attractive flowers of different colors and foliage. The letter (D) denotes double and the letter (S) single types of blossoms.

CONGO. (S). Red.

GLOIRE de MOULINS. (S). Pink.

MME. CASIMER PERIER. (D). White.

MRS. W. E. MARSHALL. (S). Reddish purple.

PRES. GREVY. (D). Blue.

Choice of above, 2 to 3 ft. size: (Each \$2.15) (3 for \$6.25)
Add postage and packing: (Each 29c) (3 for 47c).

FRENCH LILACS

**OUR LANDSCAPING SIZES COST
NO MORE**

MOCK ORANGE

CORONARIUS (L). Blooms in May, in very graceful sprays, slightly scented. Good for tall screens. Milk white flowers, in most cases, and beautiful for cutting.
3 to 4 feet. (Each \$1.69) (3 for \$4.69)
Add postage and packing: (Each 29c) (3 for 47c).

MINNESOTA SNOWFLAKE. Pat. No. 538 (S). A hardy variety of mock orange that winters well in cold climates. Grows to medium height. Makes a symmetrical bush covered with large double white flowers. Thrives in sun or shade.

2 to 3 foot shrubs: (Each \$1.95).

Add postage and packing: (Each 35c) (3 for 47c).

VIRGINIAL. (M). This variety of Mock Orange is very popular. The bush does grow moderately tall, the flowers are large, semi-double, sweetly scented.

3 to 4 feet. (Each \$1.79) (3 for \$5.10).

Add postage and packing: (Each 34c) (3 for 51c).

NINEBARK

PHYSOCARPUS, OPULIFOLIUS NANA (Dwarf Ninebark) (S). Dwarf dense growth, beautiful foliage, white flowers in May and June followed by many small red pods. Very hardy, growing 4 to 5 feet tall.

GOLD LEAF NINEBARK, OPULIFOLIUS AUREUS. 8 to 10 ft. Hardy golden leaf variety. Single white flowers in June.

Either of above: 2 to 3 ft. size (Each \$1.39) (3 for \$3.95).

Add postage and packing: (Each 29c) (3 for 47c).

ROSE OF SHARON

ALTHEA (Hibiscus Syriacus) (S). One of the best known shrubs with handsome, plain and variegated foliage. Used for screens, group and specimen planting. Large, double, rose-like flowers in bloom from August until frost. Colors red, pink, purple, blue and white.

3 to 4 feet. (Each \$1.59) (3 for \$4.49)

Add postage and packing: (Each 29c) (3 for 44c).

SPIREA (Bridal Wreath)

All of the Spireas bloom with a riotous extravagance which makes them quite striking. Their individual style, color and habits of growth differ so markedly that a collection of varieties will insure bloom the entire season and still avoid the monotony of repetition.

BILLIARDI (S). A strong grower; dull green foliage, cone shaped bright pink flowers. Bloom during July and August and occasionally during the fall.

3 to 4 feet. (Each \$1.39) (3 for \$3.95)

Add postage and packing: (Each 29c) (3 for 44c).

BLUE SPIREA, CARYOPTERIS (Blue Mist) (D). A low growing shrub blooming from August to frost, with many clusters of powdery blue, fringed flowers. Silvery green foliage, slightly toothed leaves. Hardy No. 1 plants.

(Each 98c) (3 for \$2.70). Add postage and packing: (Each 23c) (3 for 39c).

FROEBELI (D). Similar to Anthony Waterer; grows a little taller; the flowers are flat heads and rose-pink and bloom from June until fall. On account of its purplish bronze foliage, it is extensively planted for color effect.

2 to 2½ feet. (Each \$1.29) (3 for \$3.59)

Add postage and packing: (Each 29c) (3 for 51c).

JAPONICA COCCINEA. A spirea with beautiful dark green foliage, dense and well shaped plants. Rich red clusters of flowers from midseason to fall. Grows 3 to 4 feet. A good one for foundations or foreground.

15 to 18 inch plants: (Each \$1.59) (3 for \$4.49).

Postage (Each 29c) (3 for 39c).

SPIREA CONTINUED ON PAGE 50

SPIREA

PRUNIFOLIA (True Bridal Wreath). A dainty shrub but hardy. Perfectly formed double white flowers along the stems. A profuse and graceful bloomer a little later than Van Houttei. 2 to 3 feet. (Each \$1.29) (3 for \$3.59).

Add postage and packing. (Each 29c) (3 for 39c).

VAN HOUTTEI (Bridal Wreath) (S). This is one of the finest ornamental shrubs in our whole collection, and much used in all good landscape work. Its branches droop with singular grace under their white burden of flowers in late spring.

3 to 4 feet. (Each \$1.29) (3 for \$3.59).

Add postage and packing: (Each 35c) (3 for 47c).

Hedging size, 18 to 24 inches (Each 69c) (10 for \$5.90).

Add postage and packing. (Each 29c) (10 for 49c).

SNOWBERRY SYMPHORICARPUS

RACEMOSUS (Common Snowberry) (S). A very hardy plant that succeeds in most locations. Good for shady spots and not particular as to soil. Attractive green leaves, not too large but heavy enough to make good screens for coverage. Pink flowers in June and July followed by pure white berries that hang on well into the winter.

CHENAULTI (Improved Coralberry) (S). Grows about the same height as Racemosus, but leaves are smaller and berries are a coral red. Hardy.

Your choice of either of above. 3 to 4 foot size. (Each \$1.19) (3 for \$3.29).

Add postage and packing: (Each 35c) (3 for 47c).

FLOWERING SHRUBS

WEIGELIA

TAMARIX

HISPIDA (Kashgar Tamarix) (L). Feathery, silvery foliage. Bright coral pink blooms during July. This variety remains in bloom longer than others and is very hardy.

2 to 3 feet. (Each \$1.39) (3 for \$3.95)

Add postage and packing: (Each 35c) (3 for 47c).

VIBURNUM

VIBURNUM OPULUS. High bush cranberry. Grows 8 to 12 ft. Well shaped shrub with single white flowers in May. Edible, bright scarlet berries, hanging through the winter. 3 to 4 ft. shrubs.

OPULUS STERILIS (Snowball) (L). The old-fashioned snowball. Large, double, pure white flowers in May. A heavy bloomer.

3 to 4 foot size.

Your choice of above. (Each \$1.95) (3 for \$5.55).

Add postage and packing: (Each 29c) (3 for 51c).

WEIGELA

BRISTOL RUBY. Plant Pat. No. 492. (S). Improved Weigela Eva Rathke. Hardier and better grower. Large soft ruby eyed flowers, shading to garnet crimson.

3 to 4 ft. (Each \$2.59).

Add postage and packing: (Each 34c).

ROSEA (Pink Weigela) (S). An exceedingly pretty variety with pink flowers in May and June.

3 to 4 ft. (Each \$1.69) (3 for \$4.95)

Add postage and packing: (Each 29c) (3 for 39c).

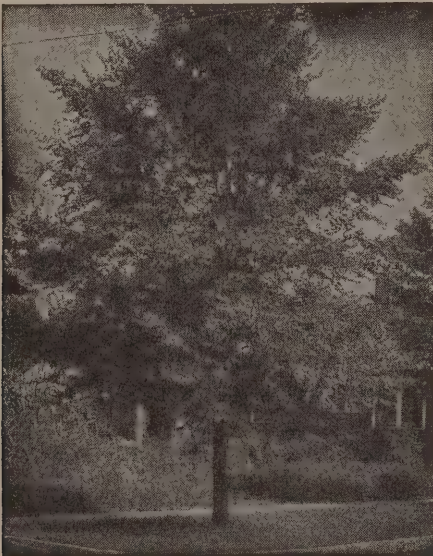

SHADE AND ORNAMENTAL TREES

NOTE: (A)—Denotes trees suitable for street planting. (B)—Denotes trees suitable for lawn planting. (AB)—denotes trees suitable for either of above.

There is an ornamental deciduous tree for almost every purpose, whether for shade, for hiding objectionable sights, or for beauty, or utility. Our list comprises all those varieties which are well adapted to our western climate. You will find many interesting trees suitable for your individual tastes.

SHIPPING INFORMATION

The ornamental trees 6 to 8 ft. size cannot be sent by parcel post as they are too large. Consequently we are quoting them net prices and they will be sent to you express or freight charges collect.

AMERICAN ELM

JUNIPERUS

During the nursery season we will have a large selection of spreading and upright Juniperus trees in one and five gallon containers at attractive prices. We feel this stock is well worth your attention as it is grown by one of the foremost nurseries that specialize in container grown nursery stock.

See back cover page

ELM

CHINESE ELM. Extremely hardy, rapid grower and withstands severe drought conditions. Brought from northern China, it is well adapted to our western climate. 6 to 8 feet. (Each \$2.49).

Chinese Elm Seedlings. Good, sturdy stock. 18 to 24 inches. (Per 100 \$8.95). Add postage and packing: (54c).

ASH

EUROPEAN MOUNTAIN (B). Hardy tree; head dense and regular, beautiful fernlike green foliage; covered with clusters of bright red berries from August till winter. Needs fall watering.

6 to 8 feet. (Each \$5.95).

BIRCH

EUROPEAN WHITE (B). A hardy tree with smooth white bark and handsome foliage. Thrives well in most any soil. Very attractive and ornamental. To further insure their growing we handle birch trees balled and burlapped in moss.

6 to 8 foot trees. (Each \$4.85).

COTTONWOOD

COTTONWOOD (Cottonless). A fast growing tree similar to the old-fashioned western type of cottonwood but does not develop seed or cotton. Easily grown. 6 to 8 feet in height.

(Each \$2.39) (10 for \$21.70).

HACKBERRY

HACKBERRY (*Celtis Occidentalis*) (A). A rapid growing and desirable shade tree of spreading growth. Leaves to 5 inches long, toothed, bright green. Orange red or dark red fruit. Very sturdy, limbs seldom broken by wind or heavy snows. 6 to 8 feet. (Each \$4.75).

MORaine LOCUST

MORaine LOCUST. (Plant Pat. 836). A round headed tree when young, changing to vase shape when older. Grows more rapidly than other locust varieties. Small leaves and the absence of seed pods and thorns make it a good one for most locations. Will stand pruning and transplants easily. 6 to 7 foot trees, branched, (Each \$7.95).

LINDEN

AMERICAN (*Tilia Americana*) (AB). This tall, stately tree with its large shining leaves makes an ideal street tree. Sweetly scented yellowish-green flowers in July. 6 to 8 feet. (Each \$4.90).

NORWAY MAPLE

WEeping DECIDUOUS TREES

CUT-LEAVED WEeping BIRCH (B). One of the most elegant of all weeping trees. Its tall, slender, yet vigorous growth, with graceful drooping habit, silvery white bark and delicate cut-leaved foliage make it one of the most attractive trees. It is especially ornamental.

6 to 8 feet. (Each \$7.35).

FLOWERING TREES

CRAB (Flowering Malus)

BECHTEL'S (Double) (T). Makes a well formed medium sized tree, perfectly hardy. Beautiful double, delicate pink blooms. Fragrant.

5 to 6 feet. (Each \$4.20). Add postage and packing (Each 49c).

DOLGA—See Crab Apples next page.

HOPA (Red Flowering Crab) (T). Of upright growth and very attractive bronzy red foliage. It grows a little taller than the Bechtel's. Covered with fragrant cerise red colored flow-

ers during April. Edible fruit, red inside and out and very good for making jellies. If not picked fruit will hang on until late autumn. Very hardy and free from disease. Grows 15 to 18 ft. tall. 5 to 6 feet size:

(Each \$2.89) (3 for \$8.40).

FLOWERING SHRUBS

FLOWERING ALMOND (M). A small spring flowering tree or shrub; blooming very gaily before the leaves appear. Their growth is dwarf, bushy and compact. Slender branches completely hidden by beautiful double flowers when in bloom. Pink only, on own root. 3 to 4 feet. (Each \$1.69) (3 for \$4.79).

Add postage and packing: (Each 34c) (3 for 61c).

FLOWERING QUINCE

CYDONIA JAPONICA. Very ornamental in early spring, as its bright scarlet flowers completely cover the branches before the leaves are formed. Sometimes used for hedging. 3 to 4 feet. (Each \$1.39) (3 for \$3.95).

Add postage and packing: (Each 34c) (3 for 61c).

MAPLE

NORWAY (*Platanoides*) (A). A hardy tree, of symmetrical but spreading growth, often 40 feet in height. Roots deeply, allowing grass to grow close to the trunk. Fine for park or street planting. 6 to 8 feet. (Each \$5.95).

SCHWEDLER'S MAPLE (AB). The beautiful leaves attract attention at all seasons but are especially fine in spring when their gleaming red and purple contrast brightly with the delicate green of other trees. In midsummer they are purplish green, in autumn golden yellow. 6 to 8 feet, branched. (Each \$6.89).

SOFT OR SILVER MAPLE (A). A hardy, rapid growing native tree of large size. Valuable for producing a quick shade. Excellent for street planting. 6 to 8 feet. (Each \$3.69).

SUGAR OR HARD MAPLE (A). Splendid ornamental tree, very hardy, not particular as to soil. Spreading habit of growth and fairly rapid grower. Cut leaves, silvery white underneath. Foliage turns bright orange or scarlet in autumn. 6 to 8 feet, branched. (Each \$6.89).

RED BUD

CERCIS CANADENSIS. Grows 20 to 30 feet. Produces a wealth of reddish-pink flowers in early spring. Forms a broad head of glossy, heart-shaped leaves that turn pale yellow in the fall.

3 to 4 foot size. (Each \$2.35) (3 for \$6.45).

Add postage and packing: (Each 29c) (3 for 44c).

RUSSIAN OLIVE

ELAAGNUS AUGUSTIFOLIA (AB). Very hardy, growing 8 to 12 feet high. The leaves are particularly handsome, willow-like and a rich silvery white. The flowers are small, golden yellow and very fragrant, followed by silvery fruits. Also used as shrub.

HEDGE SIZE. Plants 18 to 24 inches used for hedging, screens or windbreaks.

(\$11.90 per 100) (50 at 100 rate) (10 for \$1.40).

Add postage and packing: (10 for 34c) (50 for 49c) (100 for 69c).

WILLOWS

PUSSY WILLOWS. A small tree with upright branches. Catkins very numerous, handsome in flower; greatly esteemed by reason of extreme earliness.

3 to 4 feet. (Each \$1.29) (3 for \$3.69).

Add postage and packing: (Each 29c) (3 for 44c).

PRUNUS

(Flowering Plums)

CISTENA (M). A small treelike shrub. The young branches are a dark purple and the leaves a lustrous crimson changing to a dark purple. Dwarf habit of growth.

2 to 3 feet size.

PRUNUS NEWPORT. A large shrub, habits of growth like the Cistena, but growing larger. Bronze or reddish tipped leaves, well foliaged. Does very well in most locations and very hardy. Fine specimen shrub or as a hedge.

3 to 4 feet size.

TRILOB. A hardy shrub or small tree growing 8 to 10 feet, that will do well in most any territory. Double pink flowers in May before leaves appear. Attractive green foliage, turning red in fall.

Your choice of above.

3 to 4 feet size. (Each \$2.89) (3 for \$8.30).

Postage (Each 39c) (3 for 69c).

FRUIT TREES

Directions—As soon as you receive your shipment remove the packing, sprinkle the roots and heel the bundle in moist ground. In planting, take out only a few trees or shrubs at a time and never allow them to lie exposed to the air and sun at any time. Dig the hole large enough to admit all the roots in the natural position, keeping the surface and the subsoil separate. In filling in, sift the best soil in around the roots. When most of the soil is filled in, pour in the water to wash the soil around the roots, then pile up the remainder and tread down firmly with the foot. After this the tree or shrubs should have a good watering at least once a week. A mulch around the base of the tree, two or three inches thick is very beneficial.

CRAB APPLES

DOLGO. A very hardy and desirable crab apple. Trees bushy, 12 to 14 feet tall, almost free from disease. Bears an abundance of large, fiery, all red fruit, excellent for making jelly. Also, a very satisfactory ornamental tree.

WHITNEY. An old favorite. Larger than most crab apples. Not as tart as desired by some, but a good all purpose fruit. Some users like it as an eating apple.

SUMMER APPLES

EARLY HARVEST. Medium to large; pale yellow, white fleshed, tender and sub-acid; ripens early during the summer.

YELLOW TRANSPARENT. Early to ripen; pale yellow when fully ripe, of medium size, tender and good; free-growing and fruitful. Bears in July.

AUTUMN APPLES

WEALTHY. The most popular early variety known; heavy producer of medium size red apples. One of the finest early eating or cooking varieties, everyone should plant Wealthy apples. Hardy. Bears young. Ripens September.

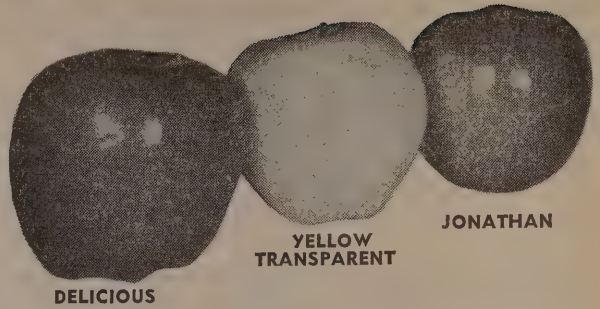

WINTER APPLES

DELICIOUS, RED. A most wonderful apple of unusually fine flavor; originated in our western country. The fruit is large, of a brilliant dark red color; juicy and crisp.

JONATHAN. The old standby—heavy producer, brilliant red, sweet and juicy; excellent keeper.

PRICES OF APPLES (Except Delcon and Multiple)

11/16 caliper		Add postage and packing
1 tree	\$2.12	.41
3 trees	5.95	.71

RED ROME BEAUTY. Extra large; yellow with crimson cheek; juicy, bears heavily.

CRIMSON WINESAP. Larger and more prolific than the old Winesap. Rich, dark red; fine grained and juicy. Well adapted to our western soils and climate.

YELLOW DELICIOUS. One of the best yellow apples. Large, juicy fruit, fine flavor. Trees bear young. Ripens late.

MULTIPLE APPLE TREES

Are apple stocks that have been grafted with 5 different varieties of apples on the same tree. They are grafted with Yellow Transparent, Red Delicious, Red Jonathan, Wealthy, Crimson Winesap and Yellow Delicious. We are unable to tell which of the types will be on each tree, but each tree will have 5 varieties from the above list. 4 1/2 to 5 ft. size: (Each \$3.49).

Add postage and packing: (Each 39c).

DELCON

A true semi-dwarf apple. Grows to about 12 feet. Full size dark red fruit similar to Delicious but with a flavor the combination of Delicious and Jonathan, its parents. Developed, tested and approved by Missouri State Experiment Station. 9/16 to 11/16. (Each \$2.40) (3 for \$6.75) Postage (Each 41c) (3 for 71c).

PLUMS

BLUE DAMSON. An old favorite and well known. Fine for preserves. Hardy, heavy bearer. Freestone.

ITALIAN PRUNE. Very well known and widely planted. Oblong shape, almost black skin and yellowish-green flesh. Freestone.

LOMBARD. Medium size, red plum. Good sweet flavor for table use or canning. Bears soon after planting.

STANLEY PRUNE. A dark blue-skin, green fleshed prune. Sweet and delightful flavor. Flesh turns to reddish tint when ripe. Good for eating fresh or canning. Freestone.

SUPERIOR. Large, red fruit and very hardy. Has been tried and proven very successful in Colorado. A good plum for both canning and eating fresh. Ripens latter part of August. Fine pollenizer for other plums.

***UNDERWOOD.** Large red fruit, very small pit, hardy and fine flavor. Ripening late July. Freestone.

***WANETA.** This wonderful large plum of Professor Hansen's production is the most delicious of all plums. It is hardy and very prolific, fruit of largest size, deep red color and a delicious flavor. *On native roots.

PRICES ON PLUM TREES

All plum trees listed are 11/16 caliper size and approximately 4 to 5 ft. tall.

PLUMS AND CHERRIES

ITALIAN PRUNE
CHERRIES

More satisfaction can be had from Cherry trees than any other tree. They are a beautiful sight from blossom to fruit and very seldom fail to produce; every farm, garden or ranch should have cherries. They do not demand much attention.

PIE CHERRIES

EARLY RICHMOND (Pie Cherry). A reliable old standard, with bright red fruit of medium size, very productive. Trees bear early and are the first cherries of the season about the latter part of June. Very hardy.

ENGLISH MORELLO. Trees bear heavily and very young. Fruit is tender and slightly acid, almost black when ripe. Good for sauce, canning or cider. Fruit is large and ripens about two weeks after Montmorency.

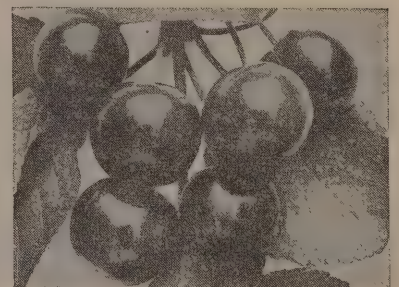

LARGE MONTMORENCY. One of the best for canning and eating fresh. Fruit is large bright red and fine flavor. Bears heavily a week to 10 days after Early Richmond. Also good for freezing.

SWEET CHERRY—See next page.

MONTMORENCY

SWEET CHERRIES

In planting sweet cherries, one Black Tartarian should be planted to every four or five of other varieties of sweet cherries as the former acts as pollenizer for the latter, and they will not bear successfully without the help of the Black Tartarian. All of the sweet cherries we list have the same blossoming period.

BLACK TARTARIAN. Very large, black; sweet and juicy. Bears in July.

BING. One of the largest of the sweet cherries. Deep dark red. Flesh firm and juicy. Tree is a strong grower and producer. July bearer.

LAMBERT. Large dark red, wonderful flavor. Bears later than either of above varieties.

SWEET CHERRY PRICES

Size, 11/16 in. Caliper and up,	Add postage and packing
1 tree ----- \$2.89	\$.41
3 trees ----- 7.95	.71

HANSEN'S BUSH CHERRY. A very useful as well as ornamental shrub. A mass of white flowers in the early spring, followed by fruits, cherry flavored but plum shaped. Foliage quite decorative in the fall, turning to red and bronze. 3 to 4 feet (Each \$1.35) (3 for \$3.69). Add postage and packing: (Each 29c) (3 for 49c).

PEARS

DWARF BARTLETT. Same good fruit as the regular Bartlett but of dwarf growth, attaining a height of only 10 to 12 feet at maturity.

11/16 in. caliper trees: (Each \$3.15). Add postage and packing. (Each 29c).

BARTLETT. Large, juicy, high flavored yellow fruit with slight blush. Bears early and abundantly.

FLEMISH BEAUTY. Large, red cheeked and beautiful, of excellent quality, hardy and productive. Very popular in the west. Ripens September and October.

PEAR PRICES

Size, 11/16 in. caliper: (Each \$2.49) (3 for \$7.10)
Add postage and packing: (Each 41c) (3 for 71c).

APRICOT

CHINESE APRICOT. Best general purpose apricot. Well colored and ripens from outside in. Medium size, round, with red blush when ripe. Used extensively on Western Slope of Colorado and in Utah. Ripens late June to July. 11/16 size: (Each \$2.59) (3 for \$7.30). Add postage and packing: (Each 41c) (3 for 71c).

BLACKBERRIES

ALFRED. A variety which is very hardy and a heavy bearer. Berries are large, up to 1½ inches long, almost coreless and a wonderful flavor. Will stand below zero weather. Ripens about a week earlier than Eldorado.

ELDORADO. Of late introduction, being vigorous and hardy in most localities. The berries are large, coal black, flavor sweet and melting and have no hard core. Very firm and therefore an excellent market variety.

Everyone should plant Grapes in the home garden. Grapes are easy to grow and do well in any ordinary soil. They can be trained over frames, trellises or doorways and are ornamental as well as practical. Make your own grape juice, jam or jelly.

All grapes listed are 2 year No. 1 quality.

BETA. It is a cross between tame and wild. Hardy, prolific and fine for cooking and jelly. Color similar to Concord.

CACO. Hardy in Colorado. Fine for table use. Red skinned and sweet. Large compact bunches.

CONCORD (Black). The fine old market leader, with large, handsome clusters of big, luscious grapes. Entirely hardy, productive and reliable; succeeds well over a great extent of country.

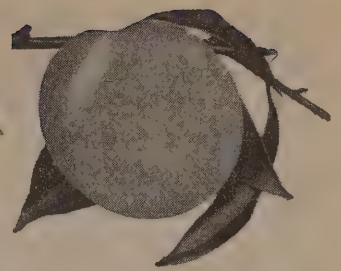

CONCORD

HARDY GRAPEVINES

BARTLETT PEAR

ELBERTA PEACH

PEACHES

ELBERTA. Large, juicy freestone peach that adapts itself to various soils. Yellow flesh, fine flavor and a good one for canning. Ripens about mid-September.

HALEHAVEN. Hardy. Large dark yellow fruit with red meat. Ripens evenly with distinctive red blush. Wonderful as a canner.

POLLY. Hardy, white meat, yellow skin. Freestone and an early bearer. Fine flavor and good for home use or the market.

J. H. HALE. Yellow skin, overlaid with carmine. Freestone, good flavor and midseason bearer. Helps as pollenizer for other peaches, increasing yields.

PEACH PRICES

Mailable only by severe pruning

Choice of above, 11/16 size: (Each \$1.89) (3 for \$5.40).

Add packing and postage: (Each 41c) (3 for 71c).

MULBERRY

RUSSIAN MULBERRY (Morus Tartarica). Very hardy type, makes good shade. Hard wood, not susceptible to insects or worms, growing 25 to 30 feet. Edible black fruit to two inches long. Thrives in a dry sunny location. For orchard purpose plant 25 to 30 feet apart. If used for hedge or screen plant from 8 to 20 feet apart. 5 to 6 feet branched trees.

(Each \$1.75) (3 for \$4.60).

Add postage and packing: (Each 41c) (3 for 71c).

SMALL FRUIT BUSHES AND PLANTS

Small fruits are very profitable for the home and market. They are all of delicious flavor and can be used for the table in many ways. Their canes should be protected during winter by covering with dirt or straw.

PLEASE DO NOT ORDER LESS THAN 5 OF ANY ONE VARIETY OF RASPBERRY PLANTS LISTED.

BLACK RASPBERRY

CUMBERLAND. It is of wonderful productiveness; producing regularly and uniformly very large crops. The large sweet fruit comes in midseason; far surpasses any other variety. Few seeds, fine flavor.

No. 1 transplants (5 for \$1.95) (10 for \$3.59).

Add postage and packing: (5 for 35c) (10 for 47c).

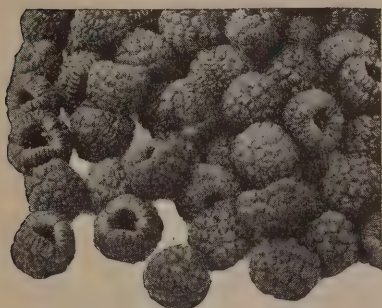

RED RASPBERRY

LATHAM. This berry is the leading berry wherever raspberries can be grown. High quality, large, hardy, better shipper than many other varieties. Good color. On account of its good qualities, it is now planted more extensively than any other red raspberry.

CHIEF. A bright red "no crumbling," good shipper, and of delicious taste. Supplements Latham by ripening ten days earlier.

EVERBEARING RASPBERRY

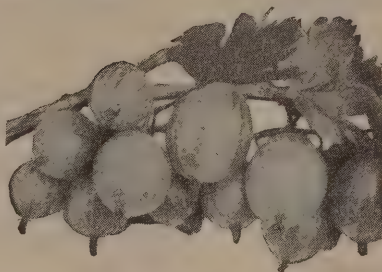

ST. REGIS. Good hardy everbearing raspberry. Medium size red berry. Vigorous, rapid grower. Winters well in Colorado without covering.

LATHAM RASPBERRY

DOWNING GOOSEBERRY

GOOSEBERRIES

(2-year, No. 1)

The Gooseberry differs little from the Currant in its requirements as to soil and general care. The plant is hardy, a vigorous grower, and free from mildew in our climate.

DOWNING. Large pale green berry. Midseason bearer. Strong, robust plants and very hardy.

HOUGHTON. An enormously productive and always reliable old sort. Of vigorous yet rather slender, spreading growth, not subject to mildew. Fruits of medium size, smooth, dark red, tender and good.

CURRANTS

(2-year-old No. 1)

The Currant is an indispensable garden fruit for the table and is a money-maker as well. It grows and bears easily in any kind of soil with very little care, but if properly cared for it will bring greater returns in money.

CHERRY. Medium size berries on short clusters; a robust, faithful sort.

FAY'S PROLIFIC. As its name implies this variety is very productive, bunches and berries being very large. Excellent quality and easily picked. Very hardy.

PERFECTION. Beautiful bright red fruit, larger than Fay, holding its size to end of branch; easy to pick; a superior bearer, less acid and of better quality than any other large currant in cultivation.

WILDER. One of the strongest and most productive. Bunch and berries very large, attractive dark red color, and even when dead ripe they hang on bushes in fine condition for handling until very late. A valuable market variety.

CURRANT PRICES

	Each	10	25
All Varieties ..	\$.49	\$4.39	\$9.90

PERFECTION CURRANTS

STRAWBERRIES

CULTURE: Strawberries will succeed in any soil that is adapted to ordinary farm or garden crops. For field culture set in rows three feet apart, 18 inches in rows; for garden, 15 inches each way, leaving pathway every third row. The ground should be cultivated often to a depth of about 1½ inches. In winter, a covering of leaves, straw or some kind of litter will protect the plants. It is best to change the location of the bed about every three years.

PLANTING. Before planting pinch off large leaves, leaving only 3 or 4 of those inside close to crown. Use trowel or spade for setting, push trowel in ground deep enough for length of roots, leaving crown of plant just at surface of soil. Then press soil firmly around roots. Those planted with crown too high or buried will not survive.

FERTILIZER. For best results in fertilizing use manure worked in the bed before planting. If not available, use commercial fertilizer sparingly, at the rate of ½ ounce per plant applied at a distance of from 3 to 6 inches.

EVERBEARING PLANTS bear the same year they are started, but if a large amount of late berries are desired, it is better to pinch the blossoms during May and June, which causes the heaviest crop to come on during September and October.

**Plants Ready
After April 1st**

BRILLIANT. A newer variety that does well in Colorado. Berries are round, dark red and good size. Does not winterkill easily and will do well with ordinary care.

MINNESOTA 1166. An excellent variety, abundant yielder. Berries large, dark red to the center. Excellent quality, bears early, continues until late in the fall.

RED RADIANCE. A new variety, large berries, good flavor, prolific bearer. Trials to date promise it to be a good, easily grown berry.

HARDY 21 ALFALFA

HARDY 21 BRAND ALFALFA SEED—An important new development that increases Alfalfa yields! Better in six ways than ordinary alfalfa—yet costs no more! An exclusive Western Seed Co. development. Blended for your area. Three way treatment. Read what enthusiastic farmers say.

- Wheatland, Wyoming—"The Hardy 21 Brand Seed is really fine. I planted this plot in extremely sandy soil, where it had been almost impossible to grow alfalfa. It was planted at about 14 pounds to the acre with a bushel of oats. I believe it was too heavy as during the dry spell in July it burned quite badly, but as of now, it is coming back real good. I now have a real good stand."
- Westcliffe, Colorado—"I have a report on the Hardy 21 Brand Alfalfa Seed planted from the farmer I gave the seed to for trial. As you know, we had quite a drought in this immediate area during the best growing season and did not have even a sprinkle for more than 60 days. Consequently, he did not have any water for irrigating; so our report will be more or less for a dry area for this year. He reports he got an excellent stand with no sign of disease in any part of the patch. It ranges in height from 4 inches to 12 inches depending upon lower damp areas and high dry points. He reports he will be a Hardy 21 customer from now on."
- Keenesburg, Colorado—"A five acre patch of Hardy 21 Brand Alfalfa Seed was planted next to a field of Ranger Alfalfa Seed. The Hardy 21 produced an extremely thriving patch of hay with considerably more healthy plants."
- Greeley, Colorado—"I planted my Hardy 21 Brand Alfalfa Seed with oats as a nurse crop and after a hard rain and wind my son and I thought sure we would never have a stand as the hay would be smothered out. It was amazing how this patch came back in comparison with others in the area planted under the same conditions. To our surprise we will get a good cutting this first year."

Write for free pamphlet.

CERTIFIED ALFALFAS

The following varieties of alfalfa seed are certified when produced under State supervision. The certified varieties have been selected and registered on account of their hardiness.

GRIMM ALFALFA. This variety is probably the earliest and best known of the pedigreed varieties. It has proven ability to withstand drought and winter-killing and these fine qualities have been increased by continuous selection. A short rooted variety which spreads out for moisture.

**CLEANED
TESTED**

ALL SEED IS TESTED FOR
PURITY AND GERMINATION

Western Clovers

Clovers, being leguminous crops, are soil builders, and are very useful for the farm or ranch. They are used for mixtures of hay and pasture as well as sown alone. The culture of Sweet Clover is practically the same as for Alfalfa. It may be sown in early spring or any time up to late fall. Sow 8 to 12 pounds per acre in a firm seed bed.

YELLOW BLOSSOM SWEET CLOVER (*Medicago officinalis*). Like White Blossom Sweet Clover this will grow on almost any kind of soil. It is semi-dwarf in habit, very drought-resistant, and is very desirable for forage, hay, and pasture. *Medicago officinalis* is a biennial.

MADRID SWEET CLOVER is an improved variety of biennial Yellow Sweet Clover, has early seedling vigor, resists fall frosts, is slightly later in maturity and produces greater yields than the Common Yellow biennial. It is particularly adapted to the Great Plains and the Corn Belt. It contains less Coumarin which is the substance that prevents blood from clotting and causes cattle that have been fed Sweet Clover Hay to bleed to death. This danger would seem to be lessened by using Madrid Sweet Clover.

BALTIC ALFALFA. Seed of this hardy variety, grown in Colorado, is known as Colorado Baltic and Meeker Baltic. Brought to Meeker, Colorado, where it has consistently withstood drought and extreme cold for many years. It produces high yields of forage.

LADAK ALFALFA. A wilt-resistant variety. It is hardy and produces a heavy first cutting, recovers slowly after cutting, but again makes rapid growth. Ladak is recommended for short season areas where two cuttings would be maximum and where water for irrigation is short.

RANGER ALFALFA. The most popular named variety. A synthetic variety developed by compositing five strains. The origin of the strains was inbred lines subsequently outcrossed among other selected lines from Cossack, Turkestan, and Ladak varieties. It is resistant to bacterial wilt, is winter hardy and has colored flowers.

NOMAD GRAZING ALFALFA. New alfalfa you can pasture and keep, too. A spreading crown type of alfalfa—has a deep seated crown area that increases in size year after year. Persists under rough grazing treatment and survives long periods of drought. Responds to irrigation. Very leafy and fine-stemmed. Recommended for any range or pasture where alfalfa is desirable and a long time persistent legume is needed. Seed one or two pounds per acre with grass—four or five pounds alone. Use only Certified Seed. Write for free pamphlet.

HARDY WESTERN ALFALFAS

is the name applied to the purple flowered, smooth strains of alfalfa. We are usually able to supply such seed grown from Colorado, Utah, Wyoming and New Mexico; from northern latitudes, high elevations and dry lands. As a safeguard to buyers, we have adopted certain grade standards that have been scrupulously maintained for so long, they are recognized as dependable. Gold Seal grades of Alfalfa seed are packed in branded bags. All seed is tested for purity and germination and tag showing the analysis is attached to each bag.

GOLD SEAL GRADE. Alfalfa seed 99.25 or better pure, standard or better germination, good color, free of noxious weeds, branded with Gold Seal emblem as the safeguard for quality.

KNOWN ORIGIN

We keep a certificate of the locality where each lot of non-certified Alfalfa seed is grown.

Prices of Alfalfa seed will be given on Farmers and Ranchers Price List at your request.

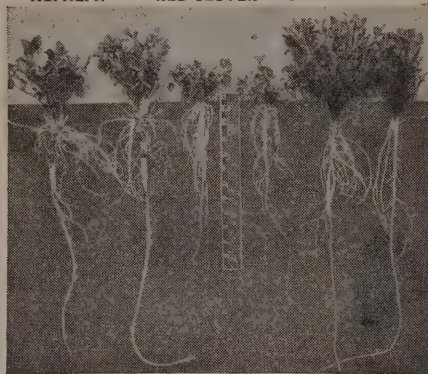

A GREAT ADVANCEMENT IN FIELD SEED PLANTING. PLANT "SEAL-GRO-TREATED SEEDS." ACTUAL TESTS HAVE PROVEN 33% MORE GERMINATION. SEE PAGE 79

SEEDS**

ALFALFA RED CLOVER SWEET CLOVER

SHOWING ROOT DEVELOPMENT

SWEET CLOVER. Mostly *Melilotus alba* which is also known as Bokhara Clover. It is a hardy biennial plant that will grow in all climates and with little regard to the character of the soil. Withstands extreme heat and cold, is quite drought-resistant, and will tolerate alkali. This Sweet Clover has value as a forage crop and hay crop and is very efficient as a soilage crop, and should be given consideration in crop rotations.

HUBAM SWEET CLOVER (*Mellilotus alba annua*) is an annual white, resembling the biennial white in appearance but making no resting buds and producing seed the season of sowing. When a catch crop is wanted, especially when the field is to be fall-plowed, it is useful.

MEDIUM RED CLOVER (*Trifolium pratense*) is sown at rate of 15 pounds per acre and may be seeded any time from April to October. Makes good hay and pasture and is adapted for planting with numerous grasses when either hay or pasture is desired. 8 to 10 lbs. per acre.

LADINO CLOVER (*Trifolium repens latum*) is a giant white variety—a perennial of the creeping type and is not badly affected by freezing and thawing. It has good carrying capacity and is therefore desirable for pasture, doing well in mixtures with tall growing grasses. The seed is small and must be planted shallow in a firm seed bed and may be sown either in the spring or fall. The growing season seems to be nine months. It is not subject to alfalfa diseases and is considered hardy up to 5,280 feet. Four to six pounds per acre is generally sufficient.

MAMMOTH RED CLOVER is especially valuable for light, sandy soil for fertilizing purposes. It grows more luxuriously than Medium Red in the same length of time but only affords one cutting. It does make excellent grazing and good hay if cut when young, but if left too long it then becomes thick and woody. Sow 8 to 10 pounds of seed to the acre.

SPECIALLY PREPARED BULLETINS on most of the clovers available free on request.

**TESTED
TAGGED**

**ALL SEED IS TESTED FOR
PURITY AND GERMINATION**

Millet, Etc.

**ALL SEED PASSES OVER
EFFICIENT CLEANING MACHINES**

**FIELD
SEEDS**

The many varieties of Millets serve well for hay, forage, and growth crops. They afford a quick, luxuriant crop of hay of good feeding value without cultivation. On account of their quick luxuriant growth, they aid in checking weeds and are of value for this purpose on irrigated lands. As millets can be planted late in July, they are used extensively for emergency crops. As a smut preventive, soak millet seed in formaldehyde solution for two hours, using one pint of formaldehyde to 45 gallons of water. Sow about 1/4 inch deep and in rows 12 to 16 inches apart.

HOG MILLET is the Proso or Common Millet of the old world. It is also known as Hershey, Broom Corn Millet, Manitoba and Dakota Millet. When forage or hay is desired the crop should be cut early. The seed has a slightly higher feeding value than oats and is used extensively in mixed feeds. Of the Hog Millets, Red Turgai, Early Fortune and Yellow Manitoba are the best adapted varieties.

GERMAN TYPE (Foxtail) MILLET has long heads crowded full with myriad seeds; small stems, luscious and highly palatable, clustered thick with fine

narrow leaves. This is a very valuable variety for hay and forage, for general feeding, for milk production.

SIBERIAN or RED RUSSIAN MILLET is a very fine, early, extremely hardy, drought-resistant variety. Produces big. Forage is quite palatable. Seed has high feeding value.

WHITE WONDER MILLET is early and productive. Heads are from 8 to 18 inches long. The foliage is heavy; the leaves broad but the fodder cures readily. The seed contains a low percentage of fiber, is therefore very fattening and makes good feed.

MISCELLANEOUS SEEDS

DWARF ESSEX RAPE is a forage plant of highest value. It can be sown in April for early crop and for fall crop in July, August, and September. It is used as a catch crop, also for summer pasture for hogs and cattle.

COLORADO STOCK or SAN LUIS VALLEY FIELD PEAS are valuable for their grain and straw. They provide good forage and hay and are valuable as a silage crop. They are also excellent as a nurse crop for alfalfa. When sown for seed about 80 pounds per acre is necessary, but for hay may be sown at the rate of 100 pounds per acre and as late as July.

SOUTHERN BLACK-EYED PEAS resemble beans in shape, make a large vine growth and are an excellent soil improver. The peas make a most desirable and healthful table dish and are in great demand during the winter. They are also used green during the summer.

Prices: (1 lb. 30c) (5 lbs. \$1.25) Postpaid.

SUNFLOWERS are a good silage crop for dry land. They may be sown earlier than corn as light frosts do not injure. The silage is very palatable and has high feeding value. Plant close in drills 4 to 5 inches apart, and rows 30 to 42 inches apart. Cultivate and handle similar to corn. Five to six pounds per acre are sown.

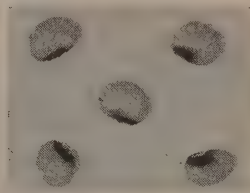

RED CLOVER

STRAWBERRY CLOVER (*Trifolium fragiliferum*) is a most important crop for converting seepy, alkaline soils into income-producing pasture. It is one of the pasturage plants for the conditions under which it thrives but is not a hay plant. It is a perennial and may be propagated from seed or by its creeping stems or runners. Grows very dense, spreads rapidly and tends to crowd out all other forms of vegetation. Strawberry Clover likes "wet feet." It has been found making good growth with most of the vegetative parts submerged in water. Rate of seeding varies from 2 to 6 pounds per acre.

BIRDSFOOT TREFOIL (*Lotus Corniculatus*). A long-lived perennial legume. Its principal use seems to be in permanent pasture mixtures where it stays green and produces excellent feed during the hot summer months.

Prices will be given on request on Farmers and Ranchers Price List.

SOUTHERN BLACK-EYED PEAS

PEANUTS can be successfully grown in almost any place where corn succeeds, but thrive best on light sandy soil. The vines are valuable feed for horses, cattle, and sheep. One acre will produce from 1 to 8 tons of vines. We will be able to supply improved Large Virginias and also Spanish varieties.

Prices: (1 lb. 50c) 5 lbs. \$2.25) Postpaid.

PRICES WILL BE GIVEN ON REQUEST ON FARMERS AND RANCHERS PRICE LIST

SEED BARLEY

BALD or NEPAL BARLEY. An early variety that withstands drought remarkably well and oftentimes surviving when wheat fails. It has no beard and shells off its hulls the same as wheat. A very desirable crop for green feed or hay or for grain.

TREBI. Six-row, bearded, hulled barley with large, bluish kernels, and comparatively weak straw. The standard for irrigated sections of the state.

BEECHER BARLEY is a new semi-smooth awned barley adapted to dry land. It is stiff strawed. Has a high bushel weight and outyielded Club Marioult. Has replaced older Flynn Production.

SEED OATS

BRUNKER OATS are well adapted to dry land, being early maturing, smut and drought resisting. They are a red oat and were developed by the Akron Experiment Station. This variety suggested in place of Texas Red Rust Proof. It is the leading dry land oat.

COLORADO NO. 37 OATS. This oat is well adapted for irrigated areas of Colorado. It is a midseason white oat. It is characterized by its high yield; its straw and awnless kernels.

FULTON OATS. Generally known as a red oat, but the kernel is not as red as Kanota which it has replaced. Well adapted to dry land. It is smut resistant, stiff strawed and early enough for mountain planting.

SEED SPRING WHEAT

LEE WHEAT. A beardless, hard red spring wheat that yields at the Fort Collins Station about the same as Komar. It is adapted to irrigated conditions only. It is rust resistant.

SEED RYE

WINTER or FALL RYE serves a very useful purpose for pasture and hay. May be sown in spring and summer as well as fall. When Winter Rye is sown after frost it goes into the following season before maturing, making it a biennial.

BALBOA, WINTER or FALL RYE is an improved variety, producing grain and pasture in abundance. It is claimed that milk from cows pastured on Balboa Rye will not be tainted.

SWEET SORGHUMS

ATLAS SORGO is a large, long-season forage sorghum developed at the Hays, Kansas, Experiment Station. It is quite drought resistant and produces big yields under favorable conditions. Being very leafy, it is used to a considerable extent for the production of silage in Kansas, eastern Colorado and Arkansas valley.

AMBER CANE, maturing in 80 to 100 days, is the favorite in many sections because it is the earliest. Usually slightly mixed black and red, or red and black.

IMPROVED COES SORGO is a white seeded, semi-sweet dual purpose crop. The five stemmed, leafy stalk and the seed are very palatable. Seed threshes free from the hull.

LEOTI RED TYPE CANE produces a semi-compact reddish head that droops slightly at the tip when ripe. The stalk is sweet, juicy and leafy. Matures at about the average fall frost date when planted June 1 to June 6.

ORANGE CANE, maturing in 100 to 110 days, has higher sugar content and produces more fodder than black and red. There are two varieties in common use—Red Orange and Sourless Orange or African Millet.

RED TOP, OR SUMAC CANE matures 115 to 125 days, and is very popular where good forage is required. Very leafy and sweet; has high feeding value. Seed threshes free from hull.

GRAIN SORGHUMS

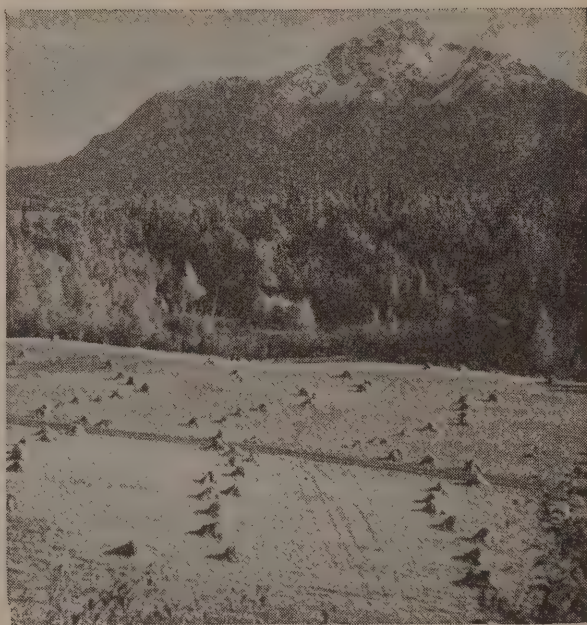

RELIANCE. The newest development in dwarf type grain sorghums. It is a combine variety which is extra early maturing. Needs warm ground for best yields.

MILO MAIZE stalks are stout, pithy and scantily supplied with leaves. Milo make poor silage, but the grain has a high feeding value.

SUDAN GRASS

COMMON SUDAN GRASS is an annual, non-saccharine, sorghum. The straw is very palatable, and under favorable conditions, two cuttings of hay may be obtained. It can be pastured to good advantage. Plant as soon as the ground is warm or at any time during the summer so long as 70 to 80 days intervene before the first expected frost.

SWEET SUDAN GRASS. An improvement over common Sudan that has found favor with feeders and stockmen for hay, forage, and pasture. It contains more saccharine than the common type and therefore better feeding value.

**ALL
HYBRID CORN
IS TREATED**

PLANT HYBRID CORN

All Hybrid Seed Corn is treated and the bags are labeled
"Disinfected Seed. Do not use for food purposes."

**TESTED
AND
TAGGED**

The worth of Hybrid Corn has been proven to such an extent that hybrids are being planted in greater amounts each year and in many sections have supplanted and eclipsed the open-pollinated varieties. Hybrid corn produces larger yields of both grain and fodder. Their growth and maturity is uniform. They are resistant to lodging due to greater strength in both root and stalks. They are decidedly more resistant to smut and root, stalk and ear-rot diseases. Hybrids with their immense root system withstand extreme drought and intensive heat remarkably well. Hybrid corn is packed in branded bushel bags. Prices per bushel (Subject to change) f.o.b. Denver: Gold Seal Hybrids, \$10.50.

GOLD SEAL HYBRIDS

This corn is grown and processed for us by a Registered Colorado Pure Seed Grower from open hybrid formulas, and supervised by Colorado State authorities. Each bushel bag bears the official, registered blue tag.

Grown from certified crossing stock. Dried artificially to insure strong germination. Graded accurately for uniform planting. Treated with recommended chemicals to prevent seedling root rots, blights and seed rotting.

In Colorado, Wyoming and New Mexico we have numerous conditions of altitude, temperatures, moisture, soils and length of growing season under which corn is grown.

To meet this situation, it is necessary to produce a number of hybrids of varying maturity dates. The number of dates to maturity refers to the average time required from emergence to maturity. Because of seasonal similarity, we use the same standards as the northern states. Corn belt hybrids sold here as 90 or 100 day corn would actually be about two weeks later because of our cool nights and lower day-time temperature. For silage purposes, a slightly later variety planted somewhat thicker will generally give maximum yields.

When corn is grown for grain, however, MATURITY is a very important factor in determining the value of your crop.

In case of late planting caused by weather or failure of crops, plant a variety of earlier maturity than usually used.

WISCONSIN 416AA (95 day). For the farmer who is interested in extra silage yields at high altitude or wants a tough hybrid for grain or replanting after other crops have failed. Particularly adapted to the high plateau area east of Colorado Springs, and sections in Wyoming.

WISCONSIN 464A (100 day). One of Colorado's earliest maturing hybrid corn. It is about seven days earlier than Minnesota 13, and is adapted for northern Colorado irrigated land, 5,000 feet elevation, with comparatively short corn growing season. Wisconsin 464A is a popular short season Colorado grown Hybrid similar to Colorado 125.

C-15—(107 day). This is truly a fine variety. It has an abundance of dark green leaves and a showy ear borne on a sturdy stalk. It is easy to pick. In 1948, C-15 was the highest yielding early hybrid at the Fort Collins Station. The heavy yield of mature grain and desirable stalk type make this variety ideal for some of the earlier areas.

COLORADO 152 (112 day). This hybrid is widely used as a silage corn. It grows unusually tall with a fair amount of leaves and a heavy yield of grain. In the dry land sections of Eastern Colorado this variety is giving top results in the field. Colorado 152 is probably the best hybrid corn offered in the medium maturity areas of this non-irrigated section. It is not recommended as a picking corn under irrigation.

OPEN-POLLINATED CORN

WHITE AUSTRALIAN is a hard flint corn well adapted for cool climates, short seasons and dry lands. Ears are of medium size; kernels are white, smooth, shallow, rounded and flinty. 85 to 90 days.

GEHU FLINT is a yellow dwarf, flint corn growing 4 to 6 feet high. It matures in 80 to 90 days. It is not a husking corn as the ears set close to the ground, but this makes it very desirable for early hogging down. It is the earliest yellow corn and its particular use is for short seasons and dry land planting.

SQUAW CORN is a mixture of various sorts once grown by North Dakota Indians. It is often called Blue Squaw. It is early, maturing in 90 days. The ears are small; kernels are shallow, rounded, smooth and flinty; yields well. It is selected for sections where the growing season is short where grain is required.

MINNESOTA NO. 13. A high yielding, yellow dent corn—well adapted to regions of the state at elevations of 4,800 to 6,000 feet. Matures in 90 to 100 days.

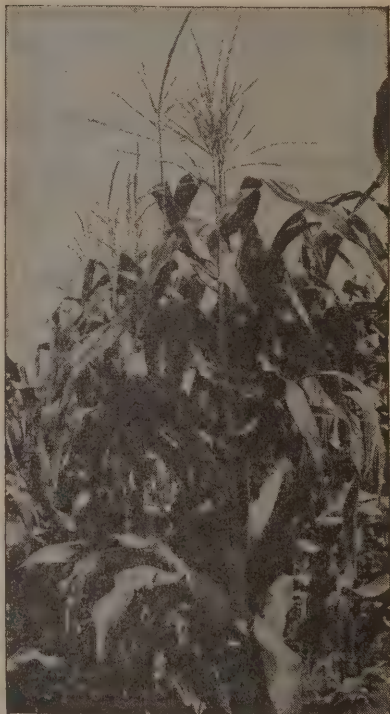

COLORADO YELLOW DENT adapted to Colorado conditions for altitudes from 4,000 to 6,000 feet. This is the leading variety of yellow dent, open-pollinated corn. Matures in 90 to 100 days.

WHITE DENT—A corn similar to Colorado Yellow Dent except color. A variety that has been bred for early maturity and will make a better yield per acre than the Yellow Dents, especially on thin soils.

RAINBOW FLINT—An early maturing corn for dry lands and short seasons. It is a flint resembling White Australian in habit and size of kernels. The grains are variegated and highly colored. It is adapted for short seasons, dry lands, big yields. 90 days.

POP CORN

HYBRID SOUTH AMERICAN POP CORN—This new four-way or double cross hybrid is a big vigorous-growing South American Pop Corn with tremendous yields. It has stiff vigorous stalks with tremendous root systems. Prices: postpaid (1 lb. 80c) (5 lbs. \$3.50).

RANGE GRASSES OF RECENT APPROVAL

TALL WHEATGRASS (*Agropyron Elongatum*) is a tall, coarse bunch grass that has proven itself a forage producer and in reclaiming abandoned farm lands. Livestock graze it well. Will tolerate some alkali.

RUSSIAN WILD RYE (*Elymus Junceus*) is an erect perennial bunch grass. It is better adapted for pasture than hay. Late in the season it is readily eaten by cattle with apparent relish. No other grass in the dry land areas seems to be as well suited for late grazing.

SAND LOVEGRASS. A vigorous long-lived bunch grass that is easily established and makes excellent growth when seeded alone or in a mixture on sandy soils. Sow 1 to 2 lbs. per acre.

INTERMEDIATE WHEATGRASS (*Agropyron Intermedium*). Has proven itself as one of the outstanding forage species in the northern and central parts of the Great Plains.

Prices will be given on request on Farmers and Ranchers Price List.

For Hay and Pasture

Specialty Prepared Bulletins on Most of the Grasses Available Free on Request.

MEADOW FESCUE, ENGLISH BLUE GRASS (*Festuca pratensis*) is one of the most used grasses for hay and for pasture. It succeeds best in cold, moist, light soils, in low valleys rich in organic matter, and does not thrive on worn, dry land. It reaches its full development the second and third years. It grows quickly after being mown. The forage, either green or dried, is much relished by cattle and is very nourishing.

ORCHARD GRASS (*Dactylis glomerata*) is a very early and valuable grass for pasture and hay and affords more than one cutting per season. However, when only one crop is cut the undergrowth is very heavy and gives splendid and rich pasture until late in the fall. It will withstand some drought and is hardy. Well suited for shady places such as orchards and groves.

REDTOP GRASS (*Agrostis alba*) is commonly used for hay, meadows, pastures and lawns. Belongs to the bent family. It grows rapidly and often thrives where Blue Grass fails. It does not compete with Blue Grass but supplements it; thriving in lime-poor and wet soils where Blue Grass is not at its best. It is useful in restraining the growth of weeds.

REED CANARY GRASS is native to the northern part of the country and is a leafy coarse species growing 2 to 3 feet tall. It tends to bunch but spreads underground by creeping branches or root stalks. It is very palatable as pasturage and as hay. Naturally it is a grass for moist or wet land on river or lake banks subject to overflow. It starts to grow early in the spring and withstands pasturing well, if not grazed too closely.

TIMOTHY (*Phleum pratense*). Timothy is the most popular grass for hay and pasture purposes in high altitudes. It is easy to sow; does not require much seed per acre; starts growing quickly. It has a high feeding value when cut at the proper time.

ALSIKE and TIMOTHY mixed make a hay crop much richer in feeding value than timothy alone. Timothy ranks high as a hay and pasture grass but its value is enhanced when alsike is mixed with it. Alsike is one of the best clovers for hay; it is fine and very leafy.

ALSIKE CLOVER (*Trifolium hybridum*) is undoubtedly the best high altitude clover for hay, being planted extensively throughout the Rocky Mountain regions at high altitude, where alfalfa winter-kills. The stems are thin, bearing a thick growth of leaves. It is a valuable forage crop sown alone or with timothy.

ALTA or TALL FESCUE (*Festuca Elatior*). A deeply rooted and strongly tufted perennial with stems 3 to 4 feet high, erect and smooth. Leaves are broad and flat. It was introduced from Europe about the same time as meadow fescue. Two strains are receiving most attention: Alta is a selection in Oregon from Tall; Ky. 31 is an increase in Kentucky from tall fescue. It is adapted to a variety of soils.

TALL OAT GRASS (*Arrhenatherum Elatius*) is a succulent, high yielding bunch grass. It comes on early in the spring and remains green until late autumn. An improved strain, developed in Oregon, is being crossed under the name Tulatin. Spring seeding is generally best. It has value in having high rainfall.

MORTON'S PASTURE MIXTURE for Irrigated Land—The following has been a popular formula for a well balanced permanent pasture mixture on irrigated land: Orchard Grass, 10 lbs.; Brome Grass, 10 lbs.; Meadow Fescue, 5 lbs.; Timothy, 3 lbs.; Yellow Blossom Sweet Clover, 2 lbs.

MIXTURE FOR ALKALINE LANDS. Experiments have shown that the following mixture gives fine results on lands infested with alkali: Yellow Sweet Clover, 6 lbs.; Slender Wheatgrass, 8 lbs.; Meadow Fescue, 6 lbs.; Brome Grass, 6 lbs.; Red Top Grass, 4 lbs.

Prices on Hay and Pasture Grasses will be given on Farmers and Ranchers Price List on request.

Specialty Prepared Bulletins on Most of the Grasses Available Free on Request.

CRESTED WHEATGRASS (*Agropyron desertorum*) is a long-lived perennial bunch grass, closely related botanically to Slender Wheatgrass and Western Wheatgrass. The stems are fine and leaves medium abundant. It has the ability to grow at low temperatures and starts growing earlier than most grasses; also it continues to grow later in the fall. It is well adapted to the northern Great Plains, and is suitable for hay and pasture.

CRESTED WHEATGRASS, Fairway Strain (*Agropyron cristatum*). Has finer and more leaves than the regular strain and can be used under dry land conditions as well as where more moisture is available. It will not grow as tall as the regular strain. Is often used in lawns where water is not readily available. See page 61.

INTERMEDIATE WHEATGRASS (*Agropyron intermedium*). Has proven itself as one of the outstanding pasture and forage species in the northern and central parts of the Great Plains and Pacific northwest. It is more drought-resistant than Smooth Brome and somewhat less hardy and drought-resistant than Crested Wheatgrass. The plants begin in early spring and reach a height of 3 to 4 feet. The abundant leafy foliage is relished by all classes of livestock.

WESTERN WHEATGRASS (*Agropyron smithii*) or Bluestem, is a long-lived perennial widely adapted. Tolerant of drought and a certain amount of alkali. It grows rather slowly, requiring two to three years from time of planting for seeds to mature. Western Wheatgrass produces excellent forage for grazing and hay. It is palatable.

SLENDER WHEATGRASS (*Agropyron Trachycaulum*). It grows in tall, erect bunches which sometimes cover a space one foot in diameter. It is perennial and very resistant to drought and cold. Has ability to grow in alkali land and is very palatable and nutritious to cattle and horses. It is well adapted for planting in Colorado, Wyoming, Montana, Nebraska, the Dakotas, and Idaho.

CRESTED WHEAT GRASS

BLUE GRAMA GRASS from the plains and prairies is undoubtedly one of the most valuable forage grasses of the Great Plains and Southwest. Herbage is eaten closely by all classes of livestock either when green, when made into hay or when cured on the ground. Its chief advantages are its high palatability and high nutrient qualities, both when dry and green. Will stand extreme drought. Thrives at altitudes between 4,000 and 8,500 feet.

SAND LOVEGRASS. A vigorous, long-lived bunch grass that is easily established and makes excellent growth when seeded alone or in a mixture on sandy soils. Sow 1 to 2 lbs. per acre.

SAND DROPSEED is a tufted widely distributed, perennial native grass. It is a pioneer or invader species on raw, denuded soil and is most prevalent on sandy soil. It produces fairly good forage where few other grasses grow. Because of its wide adaptation to soils and climate it is valuable for vegetation use.

BUFFALO GRASS (*Buchloe dactyloides*) is a native grass of the plains and is a low-growing perennial that spreads by surface runners. It withstands trampling, severe usage and grazing better than any other native short grass. Seed has been treated to hasten germination.

BROME GRASS (*Bromus laevis*) is also known as Hungarian brome, smooth brome, awnless brome, Russian brome, and Austrian brome. It is a sod former. Roots penetrate 5 to 6 feet into the soil. This makes it possible for Brome Grass to withstand drought conditions, close grazing, and trampling to a remarkable extent. It resists severe winters and is tolerant of considerable alkali, enduring up to 1 per cent white alkali. It is usually sown in the spring on well prepared land at the rate of 10 to 20 pounds of seed per acre. The yield of hay the first year is small, good the second, and best the third.

LINCOLN BROME. Kansas and Nebraska crop improvement associations are certifying superior strains of Brome Grass adapted to the Rocky Mountain area. Nebraska certifies its strain as Lincoln. Uncertified seed moves into trade channels as Southern, Nebraska or Kansas Brome. More leafy than regular Smooth Brome.

MOUNTAIN BROME GRASS (*Bromus Marginatus*) is a tall, hearty, perennial, bunch grass, one to three feet tall, its blades often reaching one foot in length. It is quite drought resistant and reproduces from seed and is highly palatable and nutritious. It is adapted to elevations 5,000 to 10,000 feet.

TALL WHEATGRASS (*Agropyron Elongatum*). A tall coarse, bunch grass. It does not produce underground stems. It is drought-resistant, later than Crested Wheatgrass and remains green well into hot summer, even in dry years.

PRICES

Prices on grasses will be given on Farmers and Ranchers Price List on request.

LAWN**

LAWN GRASS SEEDS

"How to Grow a Lawn" Bulletin Mailed Free.

**SOW
GOOD
SEED**

"A GOOD LAWN REQUIRES GOOD SEED, FERTILIZER AND CARE"

GOLD SEAL LAWN GRASS MIXTURE is an efficient mixture of pure and clean seeds. It contains only high grade grasses suitable for the purpose of making a beautiful, durable and lasting lawn. It germinates quickly, roots deeply, withstands extreme heat. Sow 1 lb. to 150 square feet in new lawns or 1 lb. to 250 square feet when reseeding established lawns. Seal-Gro-Treated at no extra cost to hasten germination.

KENTUCKY BLUE GRASS (Gold Seal Grade) is the most desirable grass for a beautiful lawn. The leaves are narrow and deep green in color. It forms a close turf, is slightly creeping and quite hardy. It is recommended alone or in mixtures for lawn purposes. Sow 1 lb. to 150 square feet in new lawns or 1 lb. to 250 square feet when reseeding established lawns. Seal-Gro-Treated at no extra cost to hasten germination.

DOMESTIC RYE GRASS is a quick growing annual, which does not have root-stalks nor stolons and does not form a compact sod. It affords a quick covering and is helpful as a nurse crop to other lawn grasses.

BENT AND OTHER

ASTORIA BENT has very pleasing green color with blades of fine texture. It produces stolons or creeping runners lightly above and heavily below the surface. It is a good grass for lawns as well as golf courses. Sow 1 lb. to 300 square feet.

HIGHLAND BENT is a type of Colonial Creeping Bent grown in the uplands of Oregon. It is very hardy, a vigorous grower and will withstand more dry weather than other strains of Bent Grasses. Sow 1 lb. to 300 square feet.

SEASIDE BENT is fine leaved, bright green in color, and creeps both below and above the ground. It requires frequent cutting, does well on golf greens.

BUFFALO GRASS FOR LAWNS—A low-growing, long-lived drought resistant perennial grass that spreads by numerous surface runners. Forms a dense sod. Slow germinating. After lawn is established it requires very little water, making it ideal for farm lawns, parks, etc. Sow 1 lb. to 200 square feet.

MERION KENTUCKY BLUE GRASS—The newest turf grass, an improved Kentucky Blue Grass, but is more drought resistant, can be cut closer than other grasses, very hardy with a strong root system. Seed still in short supply and while the price may seem high, 3 lbs. is sufficient to cover 1000 square feet. The great saving comes in the years ahead. Merion will not need annual reseeding for repair as most grasses do. Use alone, or if sowing with other perennial grasses, use at least 50% Merion, and under natural conditions you should have a solid Merion lawn in two years or less.

WHITE DUTCH CLOVER. This is a small, close growing, dwarf clover, used extensively in making lawns. It is a rapid grower of spreading habits and can be cut very close to the ground without injury to the plant. It starts regrowing at once after cutting. White Dutch Clover helps the grasses by adding nitrogen to the soil.

PERENNIAL RYE GRASS is a tufted, short-lived perennial. It does not form root-stalks or stolons and does not form a compact sod. It grows rapidly, making a quick covering and is used in lawn grass mixtures with Kentucky Blue Grass and Red Top.

LAWN GRASSES

CHEWINGS FESCUE. It has a very fine blade and is a beautiful and lasting green. It is used for fairways on sandy soils and for lawns in shady places. Sow 1 lb. to 200 square feet.

CREEPING RED FESCUE—One of the best fescues obtainable, it spreads from roots, making a dense turf which tends to crowd out weeds. Does well in shade and is good on sandy soil. Sow 1 lb. to 200 square feet.

FAIRWAY CRESTED WHEATGRASS. This strain of turf grass is highly drought-resistant and is used extensively where rainfall is limited and artificial water is not too plentiful. Sow 1 lb. to 100 square feet.

SHADY LAWN MIXTURE (Gold Seal) a carefully blended mixture recommended for use under shade trees and on sides of the building where little or no sun is available. Sow 1 lb. to 200 square feet.

Football, baseball and playground mixtures quoted on request. Different grasses are used depending on location.

DOG REPELLENTS

ORTHO SCRAM DOG REPELLENT BOMB—Keeps dogs away from shrubs, flowers, trees, lawns, store fronts, tires, porches, fences, posts, garbage cans or other areas where dogs are in a habit of returning.

Price: (12 oz. bomb \$1.49)

ANT CONTROL

CYANOGEN ANT KILLER is not a bait. It is different. Simply enlarge entrances of nests with long shank screw driver or pointed stick; adjust spout on can and allow a small amount of Cyanogas to flow into the enlarged hole. This immediately destroys the queen and worker ants. Prices: (4 oz. spouted can 50c) (1 lb. \$1.25)

CHLORDANE kills ants in the nests or in lawns; around foliage; without harming foliage. The killing effect lasts for weeks. Prices: (4 oz. bottle 89c) (8 oz. \$1.39) (16 oz. \$2.45) (1 lb. duster 10% 89c)

PEST EXTERMINATORS

MICE AND RAT CONTROL

D-CON RAT AND MICE MIX—Exclusive LX 3-2-1 Blend. In repeated test entire colonies of rats and mice have been destroyed with D-CON . . . even where many other poisons have failed. No mixing. Money back guarantee.

Price: (1 lb. \$1.69)

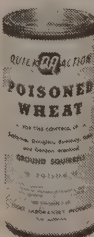

D-CON MOUSE PRUFE—The efficient, clean, ready to use way to kill mice. In handy box with tear out tab in package and inner bag. No muss. Money back guarantee. Price: (2 oz. 49c) (4 oz. 89c)

ORTHO HOUSEHOLD INSECT BOMB. New household insect space spray bomb. Contains powerful Malathion, Strobane, Pyrethrins and Piperonyl Butoxide. Kills flies, mosquitoes, roaches, ants, spiders, fleas and many other household pests. Price: (10 oz. only 98c)

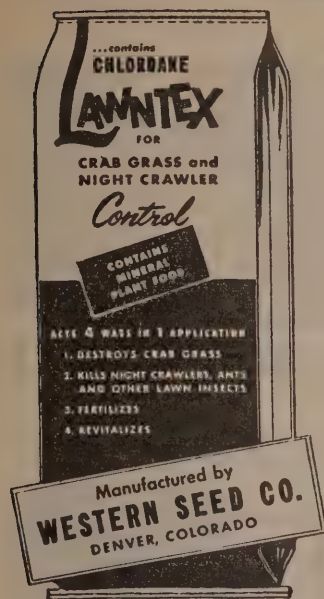

ORTHO CYANI-KIL BOMBS. A new way to control ground rodents, gophers, ground squirrels, etc. 10 years of successful use. Insert in hole, light fuse. Shoots gases into burrows, runways, channels or holes. Price: (Pkg. 2 Bombs 39c) (Postpaid).

POISONED WHEAT. Quick action. A simple way to kill ground squirrels and other ground rodents. Scatter near the holes where rodents find their food.

Price: (1 lb. Ctn. \$1.15) (Postpaid)

WEED KILLERS AND CRAB GRASS CONTROL

Price: (\$4.95) (Not postpaid)

LAWNTEX. The new formulation that acts 4 ways in one application. Destroys ugly crabgrass, kills night crawlers, ants and other lawn insects, fertilizes, revitalizes. Will not injure permanent grasses. The plant food in **LAWNTEX** is organic. Apply with a spreader or by hand. Contains chlordane plus new **LSN6**. Use in early spring before crabgrass seed germinates or in late fall. 40 lbs. covers 1000 sq. ft. Contains 6% nitrogen. It is not necessary to use additional fertilizer on your lawn in the spring when using **Lawntex**. The organic fertilizer in **Lawntex** is also long-lasting and contains 24 important trace minerals essential to the soil. Many like products contain very little fertilizer value and the home-owner finds it necessary to apply additional fertilizer to promote good growth and color.

ORTHO LIQUID CRAB GRASS KILLER AND FUNGICIDE—An effective control for ugly crab grass in lawn and turf. Contains new Disodium Methyl Arsenate. Easy to apply with Ortho Lawn and Garden Sprayer. Easy as sprinkling your lawn with the garden hose.
Prices: (16 oz. \$2.29) (32 oz. \$3.98) (Gal. \$13.98) (Postpaid)

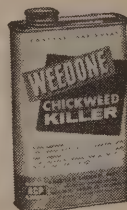

WEEDONE LIQUID CRAB GRASS KILLER—Containing **Sodar**, the newest chemical for the control of crabgrass and common chickweed. Also effective on nutgrass, foxtail, barnyard grass, witch grass and dallis grass. Will not injure most lawn grasses (including Bents or clover). A really superior crab grass killer.

Prices: (16 oz. \$1.95) (32 oz. \$3.50) (Postpaid)

WEEDONE LIQUID CHICKWEED KILLER—Chickweed is fast becoming a serious pest in lawns. **Weedone Chickweed Killer** is a very effective formulation for the selective control of chickweed and crabgrass.

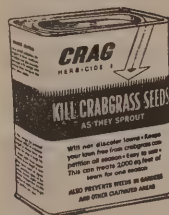

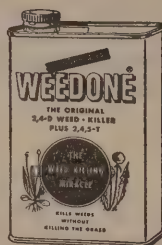

Prices: (8 oz. \$1.49) (32 oz. \$3.75) (Postpaid)

WEED CONTROL

NEW IMPROVED WEEDONE contains 2,4-D and 2,4,5-T, the two most effective chemicals for killing lawn weeds. Non-poisonous to animals or humans. Does not give off vapors.

Prices: (8 oz. \$1.00) (16 oz. \$1.69) (quart \$2.75) (gallon \$6.75) (Postpaid)

CRAG HERBICIDE 1. For lawn and garden. Here is a New Way to Control Crabgrass. Also prevents weeds in vegetable and flower gardens, shrubs, evergreens and hedges, driveways and walks. **Crag Herbicide 1** kills crabgrass and weeds as they sprout. Will not discolor grass.

Prices: (4 oz. can treats 400 sq. ft. of lawn for the season or 3,000 sq. ft. of garden—\$1.50) (1 lb. can treats 1,500 sq. ft. of lawn for the season or 12,000 sq. ft. of garden—\$4.49) (Postpaid)

Soil Treatments, Fungicides and Inoculants

See Page 79 for Exclusive Seal-Gro-Treated Process Containing Orthocide® (Captan)

ORTHOCIDE GARDEN FUNGICIDE—Amazing versatile Fungicide (one of the safest known) containing **Captan**. Controls Black Spot on Roses; Powdery Mildew on Tuberous Begonias; Rot and Damp-off on certain seeds and is the safe control for Brown Patch and other diseases on lawns which has fast become a problem in the Rocky Mountain area.

Prices: (½ lb. \$1.39) (1 lb. \$2.19) (Postpaid)

ORTHORIX. An excellent soil corrective will open up the soil much like aeration and allow water to penetrate.

Prices: (8 oz. 59c) (16 oz. \$1.00) (32 oz. \$1.65) (1 gal. \$4.98) (Postpaid)

ORTHO SOIL & BULB DUST. New multi-purpose soil, seed bed, bulb treatment and general purpose floral dust. Contains **Dieldrin**, **Captan**, **D.D.T.** and **Sulphur**. Kills wireworms, ants, cutworms, sowbugs, earwigs, aphids, thrips and other insects. Controls damp-off, leaf spot, root rot, Brown Patch, certain other diseases.

Price: (10 oz. plastic dusters, \$1.49) (Postpaid)

MIXED OR COMPLETE FERTILIZERS

SOILTONE fertilizer is a combination of chemical ammonia nitrate and organic humus from sewage disposal containing twenty-four known minerals. It is assured all the 6% available nitrogen in Soiltone will be used by plant life because it is completely surrounded by organic humus which has an affinity for rainfall and moisture and prevents leaching by wind or water. Soiltone has humus of manure plus minerals which manure does not have. 4 to 6 lbs. per 100 sq. ft.

Price: (50 lbs. \$2.70)

FERTILIZER ELEMENTS, ETC.

AMMONIUM SULPHATE is a valuable fertilizer for all plants in which a large leaf development or rapid growth is desired. It is a highly concentrated nitrogenous product, containing 25% per cent ammonia, 20% per cent nitrogen. Prices: (5 lb. 80c) (10 lb. \$1.20) (25 lb. \$1.75) (50 lb. \$3.00) (80 lb. \$4.50)

IRON SULPHATE is a highly effective treatment for chlorosis of trees, shrubs, etc. For lawns, apply at the rate of 2 lbs. per 100 square feet. As a spray, mix ½ lb. of Iron Sulphate in 10 gallons of water. Prices: (5 lbs. 98c) (100 lbs. \$7.15)

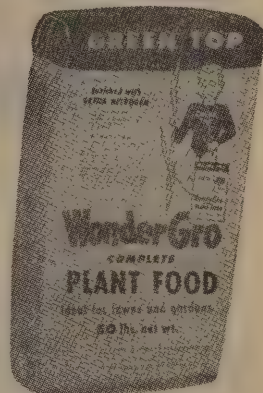

BONE MEAL contains phosphoric acid and some nitrogen. A very satisfactory food for roses. Prices: (5 lb. 98c) (10 lb. \$1.60) (50 lb. \$6.00) (100 lb. \$10.50)

SEQUESTRENE 330 FE. Restore green color and vigor to yellowing plants. Correct iron deficiency. Gardens grow green with Sequestrene (Iron Chelates). Now you can have the "secret touch" nurserymen use to grow plants and turf with beautiful dark green color. One big secret to this lush dark green growth is plenty of iron. Use in the soil or as a spray on foliage. Prices: (4 oz. \$1.19) (1 lb. \$3.19) (5 lbs. \$9.75) (Postpaid)

ORTHO LAWN AND GARDEN FOOD. (16-16-8). The first truly modern fertilizer for use on the home lawn and garden. Outstanding features: (1) The only pelleted fertilizer for the home garden; (2) The only fertilizer that is chemically blended, for uniform application; (3) easy to apply by hand or any standard lawn spreader; (4) concentrated; no bulky, heavy filler; (5) the best all-around ratio for both lawn and garden; (6) the only fertilizer with 2 forms of nitrogen and 2 forms of phosphate, plus potash and trace elements.

Prices: (20 lbs. covers 2,000 sq. ft. \$2.69) (40 lbs. covers 4,000 sq. ft. \$4.79)

WONDER GRO (10-6-4) PLUS

4% IRON SULPHATE—New Wonder Gro is enriched with nitrogen, phosphorous and potash in a ratio recommended by soil experts for use on Colorado soils. 1 lb. per 100 sq. ft.; 50 lbs. covers 5000 sq. ft.

Prices: (25 lbs. \$2.20) (50 lbs. \$3.50)

Plant Foods, Stimulants, Etc.

Prices not prepaid unless specified.

FULTON'S PLANTABBS will give an extra boost to everything that grows in the soil, whether potted plant, flower, vegetable, or ornamental. The rich formula provides 11% Nitrogen (for stems and leaves), 15% Phosphoric Acid (for roots and blooms), 20% Potash

(for form and color), plus Vitamin B1.

Boxes at 19c, 39c, 59c, \$1.00 and \$3.50. (Postpaid)

HYPONEX PLANT FOOD. Complete, balanced plant food. Dissolves readily and will not burn. Clean and odorless. Excellent for seedlings, cuttings and transplants. Use indoors or outdoors in soils, sand and water. 1 oz. makes 6 gals. Prices: (2/3 oz. 15c) (2 oz. 29c) (5 oz. 59c) (10 oz. \$1.00) (10 lb. \$9.00) (Postpaid).

TRANSPANTONE. Very useful when plants are moved or transplanted; helps grow new roots.

Prices: (½-oz. pkt. 35c) (3-oz. can \$1.25) (lb. can \$4.00) (Postpaid)

ROOTONE. This is a root-forming stimulant when applied to cuttings, seeds, or bulbs. When seeds and bulbs are dusted with Rootone and planted, the germination is quicker and root growth is faster. Also applied to grass seeds.

Prices: (¼ oz. pkt. 35c) (2 oz. jar \$1.25) (lb. can \$5.00) (Postpaid)

NEW FOR EVERY HOME OWNER!

RP® SPOT SOAKER—Attaches to garden hose for fast, deep-down, gentle soaking of shrubs, trees, grass, plants. Fast, thorough soaking. The Spot Soakers unique design, with hundreds of tiny outlets breaks up the water stream, distributing the water gently, even though turned on at maximum flow. No damage to grass, splashing or soil-washing. It's large volume soaking, in a minimum of time. With the Spot Soaker water flow is directed downward, where it does the most good, at the plant roots. Permits watering of a selected lawn area, a plant or a shrub, and eliminates plant starvation often caused by inadequate overhead sprinkling. The Spot Soakers unusual design utilizes aluminum foil—slit, expanded and compressed. It's rustproof and corrosion-resistant. Has no moving parts. Will provide years and years of dependable service. (Price \$1.49) postpaid.

3-TUBE SPRINKLER

Superior large center tube design that sprays more water—farther. Thick, tough vinyl plastic body, resists sun-light and weathering. The special perforation pattern in the top of the sprinkler sends out a soaking gentle spray. Fitted with specially constructed brass couplings on each end, with threaded end cap for easy flushing. Green color. Prices: No. 7773-2 (50 feet \$4.95) No. 7773-1 (25 feet \$3.25) (Postpaid).

BOND SOD-SAVER. Gives new life to old lawns! A valuable garden tool that aids in restoring lawns where plowing and reseedling might be required. The sod-saver cores out the soil 4 in. deep and 1/2 inch in diameter. The holes permit water, air, and fertilizer to nourish the grass from the roots. Old lawns become packed over the years, reducing the amount of air in the soil, water penetration becomes limited and the grass becomes shallow rooted. This makes the lawn more vulnerable in time of drought.

Price: (Postpaid \$6.95)

BAMBOO PLANT STAKES. A garden necessity for supporting plants; perennials; tomatoes and many other uses. Tough; dark green color.

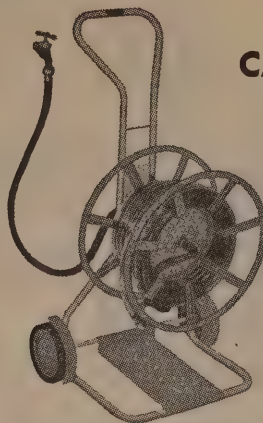

Prices: 25 To The Bundle

2 ft.39c
4 ft.89c

(Postpaid)

DOWNPOUT EXTENSIONS. Prevents damage from wash-outs on newly seeded lawns. Lasts until the grass is up without shading. Easy to handle and install. Fits various shapes of downspouts. Inexpensive. Made of tough polyethylene film in continuous seamless tube form.

Prices: (50 ft. \$1.25) (100 ft. \$1.95) (Postpaid)

CAL-DAK HOSE REEL

Longer life for any hose, as hose on reel is safe from abuse—ready to use from 5 ft. to full length. No drag—free reeling and unreeling while the water flows. Capacity 150 ft. 3/4 in. O.D. garden hose. Complete with 3 1/2 ft. flexible leader hose assembly. Reel lifts from stand which becomes a sturdy hand truck. Shipping weight 17 lbs.

Price: \$14.95 (Not Postpaid)

CRESCENT SPRINKLER. Sprinkles a half circle 20 ft. to 30 ft. diameter. Can be moved while operating without getting wet. Very useful along walks and drives. Brass top, galvanized bottom. Will withstand exceptional water pressure.

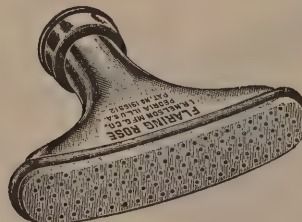

Price: (Postpaid \$2.15)

NELSON FLARING ROSE

A handy sprayer for use when hand-watering a new lawn seedlings, etc. The many perforated holes cause a gentle, light "rain-fall" spray that will not wash. Can be used in the garden, hothouse or greenhouse.

**NOW! BIGGEST CHOICE
FOR YOUR
EVERY GARDEN
NEED**

SCOTSMAN
\$142.20

Model with 2 h.p. engine, comes equipped with Mulching Rotors and extensions for tilling widths of 16" and 28". Tills to 10" deep. This compact unit will out-work any other low-priced tiller in the field. Ideal power package for small garden plots.

SUBURBAN
\$169.95

Model with light-weight, aluminum 3 h.p. engine. An exceptional value for small farms, as well as home gardens, the Suburban offers big-tiller power and performance at a small-tiller price. Equipped with 10" stabilizer wheels and the same rugged transmission as on the Professional.

PROFESSIONAL
\$205.95

Model features heavy-duty, 3 h.p. cast iron engine; heavy-duty handles and extra heavy skid grip. Widely used for commercial purposes, this machine is built for the toughest jobs. Tills, mulches, prepares seed beds in any soil—up to 12" deep and 40" wide. Notched, rectangular hitch—no tools required for height setting.

A GREAT ADVANCEMENT IN FARM SEED PLANTING

CONTAINS NEW ORTHOCIDE® (CAPTAN)

STRONGER PLANTS

**A PRIVATE BRAND OF CHEMICALLY DISINFECTED SEED WITH
A STIMULANT ADDED — ALL DESIGNED FOR BETTER GROWTH**

The Most Economical Seed You Can Buy

Extensive tests show as high as 33 per cent more plants from **Seal-Gro-Treated Seeds** than seed not so protected. Seeds that show these results are far more economical to use because a good heavy stand means more profit to the grower.

Seal-Gro-Treated Formula Is Different

Seal-Gro-Treated protection is more than an ordinary chemical treatment. It is based on a private formula made possible by working with one of the country's leading entomologists in cooperation with California Spray Chemical Corporation, the world's largest manufacturer and formulator of agricultural chemicals.

Plant Vitality Added

In addition to chemical disinfectants we have incorporated into our **Seal-Gro-Treated** formula a product which is especially designed to increase and hasten root growth. Stronger, healthier plants are the result. Greater Vitality in Plant Growth!

We recommend Seal-Gro-Treated Seeds to Increase Stand and Vigor!

HOW TO ORDER

How to Order: If possible please order by number when the item you desire has a number in the catalogue. Give correct address, with Delivery Zone, if you are in a large city.

Seed and Bulb Orders: Write quantities and prices distinctly in the column provided on the order blank.

Plant and Tree Orders: State quantity, size or age of each variety, with price for each item.

C. O. D. Orders: No bulbs, trees, plants or other perishable stock, are sent C. O. D.

Mistakes: If we make any error in filling your order, write us at once.

Charge Accounts. Customers desiring to open charge accounts are cordially invited to inform our credit department, which will be pleased to make the necessary arrangements.
